Welcome to the

JEA Awards Meeting

November 16, 2023, 10:00 AM EST

You have been joined to the meeting with your audio muted by default.

At the designated public comment time we will provide opportunity for you to unmute to speak.

During the meeting, public comments received via e-mail regarding any matter on the agenda for consideration will be read out. Per the Public Notice Agenda posted on <u>JEA.com</u>, public comments by e-mail must be received no later than 9:00 a.m. on the day of the meeting to be read during the public comment portion of the meeting.

Please contact Victoria Holloway by telephone at (904) 651-7171 or by email at hollvl@jea.com if you experience any technical difficulties during the meeting.

4	Bid Opening - 10/17/2023 For Additional Information Contact: Rodney Lowgren The scope of services is for a contractor to provide new silencer equipment for Greenland Energy Centers Units 61 and 62 to replace the current silencer equipment design that is failing after just over five years of operation. The RFP was evaluated on price, manufacturer's equipment design approach, experience and fibrication plans. Three responses were received and JEA is awarding to the highest evaluated Respondent. SVI Dynamics is the higher priced company and was evaluated overall highest due to their computational fluid dynamic (CFD) analysis integrated into the proposed equipment design changes. The two other equipment providers did not provide viable solutions to meet JEA's concerns and needs. One manufacturer's equipment design changes that the other manufacturer (proposed for JEA to manage the installation contractor and had proposed design changes that would have required permit compliance reviews to determine if the proposed changes could be accepted, which would have been unknown until well into the contract. Additionally, it is noted that SVI completed a silencer replacement project at Brandy Branch in 2018, while the project at BBGS was an in kind replacement and the designs were different than GEC, SVI did provide CFD analysis, which gives JEA confidence in their engineering expertise to provide a solution, which will resolve the current issue at GEC. JEA Awards Agenda November 9, 2023

225 North Pearl St., Jacksonville, FL 32202 - Hydrangea Room 1st Floor Teams Meeting Info

Consent Agenda

The Chief Procurement Officer offers the following items for the JEA Awards Consent Agenda. Any item may be moved from the Consent Agenda by a committee member asking that the item be considered separately. All items on the Consent agenda have been approved by OGC, Budget and the Business Unit Vice President and Chief. The posting of this agenda serves as an official notice of JEA's intended decision for all recommended actions for Formal Purchases as defined by Section 3-101 of the JEA Procurement Code, if you wish to protest any of these items.

Formal Bid and Award System

Award #5 December 12, 2019

Type of Award Request: INVITATION TO NEGOTIATE (ITN)

Request #:

6462

Requestor Name:

Edgar, Cindy L. - Dir Eng Systems & PMO

Requestor Phone:

904-665-7653

Project Title:

JEA Global Positioning System (GPS) and Telematics with Mobile Hot Spot

Capability, Driver ID, and Panic Button Solution

Project Number:

8005596 and HEB0500

Project Location:

JEA

Funds:

Capital and O&M (Year 2 and 3 Subscription cost)

Budget Estimate:

\$2,500,000.00

Scope of Work:

The scope and overall goal of GPS and Telematics consists of capturing real-time and historic information regarding JEA's fleet and employees such that JEA (1) obtains better data on vehicle usage, condition and location; (2) is better able to manage resources and assign work; and (3) achieve lower cost of operations. In addition to the GPS and Telematics requirements, the scope also includes a requirement for a communication mechanism to be installed in JEA vehicles that provides Wi-Fi and Bluetooth for locally connected devices. The primary communication device installed in each vehicle would use cellular uplink and allow multiple devices (GPS, Phones, Laptops, Sensors, Tablets, etc.) to connect which would provide access to hosted platforms, Internet sites and JEA. The solution will also include Driver ID and emergency panic button components. The scope of the GPS deployment will include vehicles, trailers, and equipment for the following business groups: Fleet, Electric System, Water/Sewer, Customer Relationships and Telecommunications. JEA has approximately 1,322 total on-road and off-road assets that will require GPS installation.

This project will impact the following JEA Measures of Value:

- Customer, Community & Environmental: This solution will provide enhanced route optimization to improve response to electric and water/wastewater emergencies
- Financial: The solution will result in a lower cost of operations due to enhanced route optimization, as well as the ability to monitor and track workforce for accountability and peak performance. integration of the work order management system with the GPS system will assist with workload leveling and staffing model.

JEA IFB/RFP/State/City/GSA#:

038-19

Purchasing Agent:

Dambrose, Nick

Is this a Ratification?:

NO

RECOMMENDED AWARDEE(S):

BSM ANALYTICS	\$2,222,473.00	Not Shortlisted	N/A	N/A
USAT CORP	\$2,788,955.94	Not Shortlisted	N/A	N/A

Background/Recommendations:

Advertised on 12/18/2018. Six (6) prime companies attended the optional pre-Response meeting held on 01/03/2019. At response opening on 01/23/2019, JEA received six (6) Responses. In addition to price, the supplier Responses were also evaluated on Past Performance, Ability to Meet the Business Requirements, and the suppliers' Design Approach and Workplan. LB Technology was disqualified for not meeting the minimum qualifications. MarshallGIS, Verizon & Source Inc, and Synovia Solutions were short-listed and invited to present their solutions to the evaluation team. A Best and Final Offer (BAFO) was requested from MarshallGIS, Verizon, and Synovia. On 05/28/2019 following the shortlist written and presentation scoring completion, Synovia Solutions was ranked number one (1) and JEA issued an intent to award pending a five (5) asset pilot agreement completion with JEA. During the pilot, it was discovered that Synovia's solution did not satisfy all of JEA's Wi-Fi mobile hotspot business requirements and was disqualified. On 09/13/2019 JEA issued a new intent to award to the new highest ranking company MarshallGIS and also started a five (5) asset pilot which verified their solution met all of JEA's requirements. The solicitation allowed for a lease versus buy option and the buy option was determined to be less expensive over three (3) years. A copy of the Marshall GIS BAFO Response Form, Workbook, and final post pilot quote are attached as backup.

The business case for the purchase of GPS, mobile Wi-Fi hotspot, Driver ID, and panic button equipment and installation of all the equipment includes many benefits to JEA. This solution will provide enhanced route optimization across JEA's fleet to improve response to emergencies, as well as the ability to monitor and track workforce through Driver ID for accountability and peak performance. The solution will also increase employee safety with and emergency panic button and location to provide assistance in a time of need. Integration of the work order management system with the GPS system will assist with workload leveling and staffing model. The mobile Wi-Fi hotspot will provide at minimum a 100 foot range from the JEA vehicle to also provide a high level of access for JEA and for mutual aid crews in times of emergency. The mobile Wi-Fi hotspot will run on JEA's existing Verizon wireless network. The vehicle area network (VAN) will provide a local Wi-Fi vehicle hotspot that allows handheld (laptops, tablets) and other devices in the area to communicate with each other and connect to broadband. VANs connect to public 4G LTE, FirstNet, land mobile radio, satellite, and other networks. This technology will allow JEA vehicles to leverage the mobile hotspots for daily work, as well as, special projects and disaster/incident response. In the future, vehicles may also have advanced collaboration toolsets over the vehicle area network (VAN) or other functionalities like mobile warehousing. The ability to use standard, commercially available handheld devices to securely access video and other data -or to provide live video to headquarters—greatly enhances productivity and safety. In public safety settings, a VAN also supports

easier agency interoperability. For responders, a VAN helps share video, infrastructure, GIS and other information among personnel both inside and outside the vehicles. JEA plans to do an initial 100 vehicle rollout before installing on the entire fleet to ensure a successful result. JEA will decide prior to contract execution if a one-time complete install or a two-phase approach would be more beneficial.

The request is for the purchase of GPS, mobile Wi-Fi hotspot, driver ID, and panic button equipment and hardware, installation of all the equipment on JEA's fleet and for a three (3) years LiGO Platform as a Service (PaaS) license and software subscription contract from 12/18/2019 to 12/17/2022 for \$3,474,554.00 total. LiGO® is the brand name of MarshallGIS' GPS vehicle tracking produt. The annual subscription pricing of \$274,688.00 is fixed for the initial three (3) year term of the contract and will be CPI adjusted during renewals.

The post pilot final quote amount of \$3,459,404.00 increased from the BAFO pricing of \$2,673,409.00 due to a number of discoveries during the five (5) asset pilot with MarshallGIS. JEA vetted the equipment price changes with another third party provider. At the recommendation of the manufacturer, Cradlepoint, JEA decided to upgrade to more capable Cradlepoint wireless router (600M to 1200M) and parsec antenna (5-in - to 9-in-1) hardware devices than originally quoted. This upgrade will also include three years of NetCloud Essentials for mobile routers and the LiGO software key necessary to connect all the peripherals (HID, Buzzer, Panic button, LiGO Engine) to the Cradlepoint wireless router hardware. Cradlepoint recommended the upgrade in the antenna over what was originally quoted by MarshallGIS due to significant higher performance during the pilot field testing. The larger antenna hardware upgrade also resulted in a higher installation cost. The driver ID solution using JEA's badge was quoted as a higher price optional solution in the BAFO, however, JEA decided to proceed with this higher priced solution in the final quote due to the many benefits of using existing JEA badges for Driver ID. Finally, the cost of GPS Engine Diagnostics for the equipment and trailer assets specifically was included as optional in the BAFO but JEA required this capability be included in the final post pilot quote. The total award amount is over the original expected budget, however, new capital funding has been secured.

The cost breakdown is shown in the table below including a BAFO vs. final post pilot quote comparison (Numerous other items are included at no additional cost on the backup final post pilot quote attached):

Item Description	Quantity	BAFO Unit Price	Post Pilot Final Unit Price	Final Extended Cost
Cradlepoint Wireless Router/GPS	1010			
Telematic Tracking 3 yr NetCloud	1010	\$1,080.00	\$1,245.00	\$1,257,450.00

Quote Assumptions

- 1. Upon Acceptance of this Quote, JEA acknowledges that they have read and understand both the "Master License Agreement", and the "Software Maintenance and Services Delivery Agreement".
- 2. MarshallGIS will deliver a vehicle information sheet to JEA to finalize the appropriate devices and cabling to use for each particular vehicle.
- **3.** Only those services provided by this quote, and accepted by JEA, are provided for this project's scope of work. Additional services above and beyond this quote may be subject to additional charges.
- $\textbf{4.} \ \ \text{This quote assumes that payment will be made upfront, and on a recurring annual basis.}$
- 5. Installation services costs are included with this Quote. Installation costs are subject to change and will be finalized based on completed vehicle information list.
- 6. Data plan for Wireless Router/GPS Telematics/Wireless Hotspot device is not included in this quote. MarshallGIS understands that JEA will provide data plan.
- 7. MarshallGIS is including our LiGO® ACCESS API for integration to the JEA's existing ArcGIS, FMS, Maximo and other business systems.
- **8.** Applicable taxes not included in this quote but will be added upon final determination.

Award #2 Supporting Documents PRECISE MRM LLC TERMS AND CONDITIONS

<u>Acceptance</u>: These Terms and Conditions shall govern all contracts for the sale of any goods to Buyer by PreCise MRM LLC and/or its subsidiaries and divisions (collectively "Seller"). These Terms and Conditions shall control over any conflicting terms and condition set forth in any request for quotation, purchase order, confirmation or other transaction document submitted to Seller by Buyer.

<u>Delays in Delivery</u>: Seller shall not be responsible for any delay in delivery of goods to Buyer due to fires, strikes, riots, Acts of God, government orders or restrictions, delays in transportation delays by suppliers or materials or parts, inability to obtain necessary labor or other causes beyond Seller's control. In the event of such delay, the delivery date shall be extended for a reasonable period of time.

<u>Damage or Loss in Transit</u>: All risk of loss shall pass to Buyer at the time of delivery of the goods. Deliver of the goods to any carrier shall constitute delivery of the goods to Buyer, regardless of which party retained or hired the carrier.

<u>Warranties</u>: Seller warrants that any goods sold by Seller to Buyer shall be free from defects in material and workmanship for a period of one (1) year from the date of delivery. THIS WARRANTY SHALL BE THE SOLE AND EXCLUSIVE WARRANTY MADE BY SELLER TO BUYER. SELLER HEREBY DISCLAIMS ANY IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Exclusive Remedy: If within the aforementioned one-year warranty period, any goods sold by Seller are proven by Buyer to be defective to Seller's reasonable satisfaction, then such defective goods shall be repaired or replaced, at Seller's sole option. THIS REMEDY SHALL BE THE SOLE AND EXCLUSIVE REMEDY AVAILABLE TO BUYER. BUYER SHALL NOT, UNDER ANY CIRCUMSTANCES, BE ENTITLED TO RECOVER ANY INCIDENTAL, CONSEQUENTIAL OR CONTINGENT DAMAGES, INCLUDING, WITHOUT LIMITATION, LOST PROFITS.

Payment: Buyer shall pay Seller's invoices within thirty (30) days of receipt. Buyer agrees to pay interest to Seller on any past-due amounts at the rate of 18% per year.

<u>Security Interest</u>: To secure payment of Seller's invoices, Buyer hereby grants Seller a security interest in all goods sold by Seller to Buyer. Buyer hereby authorizes Seller to file financing statements on behalf of Buyer to perfect Seller's security interest. In the event Buyer fails to timely pay Seller for any goods sold to Buyer, Seller may proceed, at its option, to utilize the remedies available to a secured party under Article 9 of the Uniform Commercial Code.

Freight Terms: All sales made by Seller to Buyer shall be F.O.B. Seller's Distribution Center.

<u>Returned Goods</u>: Goods may only be returned by Buyer with Seller's prior authorization and consent. Only unused goods in original containers of current design will be considered for return. Specially manufactured, custom or modified goods shall not be returnable. Buyer shall pay all transportation charges for any goods accepted for return by Seller. Buyer shall also pay a restocking charge equal to 15% of the original price of any goods accepted by Seller for return.

<u>Taxes and Other Charges</u>: Buyer shall be responsible for paying any taxes, duties, fees, or other charges imposed by any governmental entity based upon Buyer's purchase of any goods from Seller.

Legal Action: These Terms and Conditions and the terms of any contract for the sale of goods by Seller to Buyer shall be governed by and construed in accordance with Minnesota law. Any action relating to or arising out of any contact for the sale of goods by Seller to Buyer shall be venued in state or federal court in Minnesota. Buyer consents to the personal jurisdiction of Minnesota courts and waives any defense that venue in Minnesota is in any manner inconvenient. Buyer shall pay all attorney fees, costs and disbursements incurred by Seller in collecting any amounts due from Buyer, enforcing these Terms and Conditions and/or enforcing the terms of any contract for the sale of goods by Seller to Buyer. Any legal action by Buyer against Seller relating to or arising out of any contract for the sale of goods by Seller to Buyer shall be brought within one (1) year after the delivery of the goods or be forever barred.

Date: <u>01/26/2023</u> Item# <u>5</u>

Formal Bid and Award System

Award #5 January 26, 2023

Type of Award Request: INVITATION FOR BID (IFB)

Request #: 669

Requestor Name: Breadon, William A. - Project Administrator Construction

Requestor Phone: (904) 665-4285

Solicitation Title: Blanding Blvd Driveway Entrance

Project Number: 8007903
Project Location: JEA
Funds: Capital
Business Unit Estimate: \$723,958.00

Scope of Work:

The purpose of this Invitation for Bid for construction services (this "Solicitation") is to request bids for a new lift station entrance driveway located at 7703 Blanding Blvd, Jacksonville, FL. Reconstruction of the existing driveway will include an improved connection to Blanding Boulevard with associated improvements to abutting driveways. The contract will include a new asphalt driveway approximately 20 feet wide that extends approximately 1,100 linear feet with curbs and gutters, pond and required drainage and stormwater improvements as needed to provide access to lift station. Construction shall meet all the requirements of JEA Standards, state and local building codes (the "Work").

JEA IFB/RFP/State/City/GSA#: 1410996446

Purchasing Agent: Selders, Elaine

Is this a Ratification?:

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Amount
KIRBY DEVELOPMENT INC	Brian Kluge	bkluge@kirbydevelopment.com	108 Lee Rd, Jacksonville, FL 32254	\$694,621.51

Amount for entire term of Contract/PO: \$694,621.51 **Award Amount for remainder of this FY:** \$350,751.51

Length of Contract/PO Term: Project Completion

Begin Date: 02/15/2023

End Date: Project Completion (Expected: December 2023)

JSEB Requirement: Five Percent (5%) Requirement

Comments on JSEB Requirements: Kirby Development, Inc is a JSEB.

BIDDERS:

Name	Amount NOT including SWA
KIRBY DEVELOPMENT INC	\$694,621.51
CGC, INC.	\$754,337.00
CALLAWAY CONTRACTING, INC.	\$1,144,700.00

Background/Recommendations:

Advertised on 12/01/2022. Seven (7) prime contractors attended the mandatory site visit held on 12/12/2022. At Bid opening on 1/10/2023, JEA received three (3) Bids. Kirby Development, Inc is the lowest responsive and responsible Bidder. A copy of the Bid Form and Workbook are attached as backup.

The bid for the construction cost of this project without the Supplemental Work Allowance (SWA) is \$694,621.51, which is approximately four percent (4%) lower than the business unit estimate of \$723,958.00. A SWA in the amount of \$70,000.00 was included on the Bid Form but the decision was made to not include it in the award amount as the design was recently completed and the work is fairly straightforward. There are funds in the budget if needed for unforeseen circumstances if any should arise. The bid was reviewed by JEA and has been deemed reasonable.

1410996446 – Request approval to award a contract to Kirby Development, Inc for construction services for the Blanding Blvd Driveway Entrance in the amount of \$694,621.51, subject to the availability of lawfully appropriated funds.

Manager: Poteet, Matthew D. - Manager Facilities Construction & Planning

Director: Brunell, Baley L. - Dir Facilities & Fleet Services

VENDOR CONFLICT OF INTEREST DISCLOSURE FORM INSTRUCTIONS

Vendors shall not try to gain an unfair competitive advantage or influence the ability of JEA officers and employees to make impartial and objective decisions on behalf of JEA.

All vendors interested in conducting business with JEA must complete and return the Vendor Conflict of Interest Disclosure Form found on the following page in order to be eligible to be awarded a contract with JEA. Please note that all vendors are subject to comply with JEA's conflict of interest policies provided below.

- 1. No JEA officer (e.g., JEA Board member and elected City official) or employee has an ownership interest of more than 5% in vendor's company.
- 2. No JEA officer or employee is an officer, director, partner or proprietor of vendor's company.
- 3. No JEA officer or employee is employed by or being considered for employment by vendor's company.
- 4. No JEA officer or employee work as a consultant or has a contractual relationship with vendor's company.
- 5. No JEA officer or employee will derive a personal financial gain or loss from this contract.
- 6. No relative of a JEA officer of employee will derive a personal financial gain or loss from this contract. (Relatives include a father, mother, son, daughter, husband, wife, brother, sister, father-in-law, mother-in-law, son-in-law, or daughter-in-law.)

If a vendor has one or more relationships with a JEA officer or employee or a relative of a JEA officer or employee that meets the criteria described above, then the vendor shall disclose the information by completing the Conflict of Interest Form on the following page.

1411441046 GEC Silencer Replacment Project Appendix B - Bid Forms

CONFLICT OF INTEREST DISCLOSURE FORM

Disclosing a potential conflict of interest does not disqualify vendors. In the event vendors do not disclose potential conflicts of interest, and they are detected by JEA, vendor may be **disqualified** from doing business with JEA.

THE GRAY INSURANCE COMPANY THE GRAY CASUALTY & SURETY COMPANY

GENERAL POWER OF ATTORNEY

Bond Number: Bid Bond Principal: Southeast Valve, Inc DBA SVI Dynamics

Project: JEA GREENLAND exhaust silencer retrofit project per the Technical Specification G61 and G62 Exhaust Silencer Replacement

KNOW ALL BY THESE PRESENTS, THAT The Gray Insurance Company and The Gray Casualty & Surety Company, corporations duly organized and existing under the laws of Louisiana, and having their principal offices in Metairie, Louisiana, do hereby make, constitute, and appoint: Heather Segrist, Julia C. McElligott, Bobbi D. Pendleton, Kenneth J. Peeples, Christopher A. Lydick, Adam Pfanmiller, James Holden Keen, Ronda W. Bush, Katherine L. Pearce, Phillip Knower, Chelsea Craney, Turner A. Estep, Camille Moye Edwards, Margo G. Roberts, David Liggett, Joseph Zoller, Michael McCreadie, and Megan S. Bartman of Durham, North Carolina jointly and severally on behalf of each of the Companies named above its true and lawful Attorney(s)-in-Fact, to make, execute, seal and deliver, for and on its behalf and as its deed, bonds, or other writings obligatory in the nature of a bond, as surety, contracts of suretyship as are or may be required or permitted by law, regulation, contract or otherwise, provided that no bond or undertaking or contract of suretyship executed under this authority shall exceed the amount of

\$25,000,000.00.

This Power of Attorney is granted and is signed by facsimile under and by the authority of the following Resolutions adopted by the Boards of Directors of both The Gray Insurance Company and The Gray Casualty & Surety Company at meetings duly called and held on the 26th day of June, 2003.

"RESOLVED, that the President, Executive Vice President, any Vice President, or the Secretary be and each or any of them hereby is authorized to execute a power of Attorney qualifying the attorney named in the given Power of Attorney to execute on behalf of the Company bonds, undertakings, and all contracts of surety, and that each or any of them is hereby authorized to attest to the execution of such Power of Attorney, and to attach the seal of the Company; and it is

FURTHER RESOLVED, that the signature of such officers and the seal of the Company may be affixed to any such Power of Attorney or to any certificate relating thereto by facsimile, and any such Power of Attorney or certificate bearing such facsimile signature or facsimile seal shall be binding upon the Company now and in the future when so affixed with regard to any bond, undertaking or contract of surety to which it is attached.

IN WITNESS WHEREOF, The Gray Insurance Company and The Gray Casualty & Surety Company have caused their official seals to be hereinto

these presents to be signed by their authorized officers this 4th day of November, 2022.

SEAL By:

Michael T. Gray President The Gray Insurance Company

Cullen S. Piske
President

The Gray Casualty & Surety Company

Parish of Jefferson

State of Louisiana

On this 4th day of November, 2022, before me, a Notary Public, personally appeared Michael T. Gray, President of The Gray Insurance Company, and Cullen S. Piske, President of The Gray Casualty & Surety Company, personally known to me, being duly sworn, acknowledged that they signed the above Power of Attorney and affixed the seals of the companies as officers of, and acknowledged said instrument to be the voluntary act and deed, of their companies.

Leigh Anne Henican Notary Public Notary ID No. 92653 Orleans Parish, Louisiana

JEA Solicitation No.: 1411441046

Proposal #: P23-0116

This is a confidential version of the proposal for JEA internal use only, exempt from public record. Please refer to the redacted version for public dissemination per Sunshine Laws.

Sections of this proposal include:

- A. Executive summary
- B. Proposed design approach
- C. Experience narrative
- D. Shop fabrication planning approach
- E. Clarifications
- F. Project duration schedules
- G. Technical evaluations and proposal GA drawing sets
- H. Option 2 parallel baffle FEA analysis report
- I. Existing system and option 1 upgrade CFD report
- J. Appendix A: SVI key personnel bios
- K. Bid bond

A. Executive summary

Thanks for the opportunity to bid on this project. Southeast Valve Inc. (DBA SVI DYNAMICS) meets and exceeds the minimum qualifications required for this solicitation scope with our references included as well as our inhouse engineering resources holding 25+ years' experience in gas turbine exhaust structural, acoustic, and aerodynamic design and engineering. Additionally, our sister company BREMCO adds to our engineering & design, fabrication, and delivery capabilities by performing the turnkey site work scope without needing a sub-contract to a field work contractor. By reviewing our proposal, we hope you find us acceptable in every regard to help support this CT exhaust work at the Greenland Energy Center.

Safety is the highest priority for SVI/Bremco at every project stage including fabrication, shipping, and site work. Our safety record is exemplary as shown by our safety records which are available to JEA for review. A project with SVI/Bremco includes the utmost consideration for safety which includes a clean and neatly organized site throughout the duration of the project. Additionally, the outage scopes proposed for this project include a dedicated, full-time safety representative onsite with the sole task of monitoring and enforcing safety requirements.

Corporate Office

12261 Nations Ford Road Pineville, NC 28134 USA Phone: +1 704.688.9800 sales@svidynamics.com

Included in this proposal are two exhaust silencer retrofit options for JEA to consider. Both options will eliminate the silencer structural issues that have occurred on the previous two silencers while meeting the required acoustic and aerodynamics requirements. The first option presented is an ideally engineered case for structural, acoustics, and aerodynamics to improve the exhaust gas flow properties which, in combination with a unique silencer, greatly reduce the structural loading on the silencer and efficiently attenuates exhaust noise. The second option is a more standard silencer in a new upper stack with a larger gas path diameter to provide room for noise attenuation without creating excessive gap velocities. This option requires relocation of the CEMS testing ports.

Please refer to the attached preliminary duration schedules for SVI/Bremco proposed outage schedules and lengths. SVI/Bremco will work seven days per week, one shift during pre- and post-outage activities and two shifts during the outages. Additionally, please note the extended lead time for equipment. Working backwards from the first outage start date, and considering engineering, customer approval, material purchasing, and fabrication, the required order date is important to meet the Fall 2024 outages. Please reach out if this date is not attainable and we can review potential ways to still meet your outage deadlines.

SVI/Bremco is ISO9001 certified with an accompanying ISO 9001:2015 quality management system in place to include the design, fabrication, and installation of our engineered gas path solutions. Certification and manual can be submitted to JEA upon request. The quality requirements for this project will be met, at a minimum. Inspection and test plans including witness and hold points are part of the SVI standard quality data book submitted for any manufacturing and site work project.

B. Proposed design approach:

SVI has analyzed the existing system extensively through engineering review and visits to site for acoustic surveying and visual inspection of equipment. A computational fluid dynamics (CFD) report has been put together to provide more advanced insights into the existing system as well as proposed retrofit options. Preliminary structural engineering has been completed to confirm the validity of proposed silencer retrofit options and further demonstrate SVI's commitment to an engineered solution. To start, a thorough review of the existing exhaust system is required.

The current system exhausts from a GE MS7000FA and flows through a truncated diffuser duct and short exhaust stack inlet duct in the horizontal position. A cylindrical elbow duct then ejects 90 degrees and immediately into a vertical, cylindrical silencer duct with two rows of parallel baffles with full gap arrangement which then send flow through a cylindrical upper stack and eventually to atmosphere.

The JEA Greenland energy center has seen silencer baffle premature failure two times now with the existing silencer arrangement, even with a new vendor using more robust material section and material thickness utilized in the aftermarket silencer replacement. We understand JEA's frustration with this outcome and the desire to replace the silencer again, not with an in-kind solution but, an engineered alternative aimed at extending the next silencer installment life to a more typical industry standard. The following conclusions have been made by SVI as result of CFD modelling (attached), site visits & discussions, and our 25+ years of combustion gas turbine exhaust system design:

- The short approach length to the silencer segment suggests that regions of high velocity, cyclonic, turbulent flow are impinging on the leading edge of the first row of baffles.
- Regions of extremely high velocity and lateral (sideways) flow in the front section of the lower silencer
 baffle row may cause high cyclical loading of the baffle surfaces, translating to unexpected loads at the
 supports and guides. At temperature, this type of dynamic loading condition can cause premature
 structural fatigue, as observed at the Greenland site.
- An in-kind silencer arrangement, or an upgraded silencer in the same silencer duct without upstream elbow upgrade, cannot survive in this environment for an extended period as JEA would like.
- In order to resolve the extreme aerodynamic impacts on the silencer, a combination of the below must happen:
 - o Improvement of exhaust gas flow development prior to interaction with the silencer leading edge.
 - Use of proper baffle materials of construction based on ASME and material manufacturer published maximum allowable internal stress loads.
 - Implementation of a more suitable silencer design for this application to reduce the dynamic loading conditions on the silencer while improving system pressure loss and acoustic performance.

As is standard for all SVI silencer retrofit projects, pre- and post- outage site acoustic surveys will be performed by the SVI director of acoustic engineering in order to demonstrate the before and after retrofit site noise conditions.

SVI has two proposal exhaust retrofit options to present to JEA and its stakeholders for consideration based on the above discussed conditions:

Option 1 - Contoured elbow duct + Bar silencer retrofit:

Option 1 includes a retrofit exhaust solution utilizing a new round-to-square transition inlet duct, 90-deg. elbow duct with curved contouring at the upper forward and lower rearward walls, as well as a square bar style exhaust silencer which transitions into the existing, round upper stack.

12261 Nations Ford Road Pineville, NC 28134 USA Phone: +1 704.688.9800 sales@svidynamics.com

- A contoured elbow as analyzed in our CFD analysis and structural proposal general arrangement details is
 a required component of this solution to improve the exhaust gas flow conditions moving out of the elbow as
 it begins to interact with the silencer leading edge. Turning vanes are a common industry standard for
 improving flow conditions through a turn but would not be adequate in this application with a large, round
 elbow duct.
- The bar silencer design reduces baffle surface mechanical loads corresponding to lower total and dynamic pressure magnitudes. Reduction of oscillating loads lowers the likelihood of cyclical fatigue issues (as seen on the existing equipment) over the service life of the recommended exhaust and silencer design. Additionally, this design is less obstructive to turbine exhaust flow and will reduce exhaust stack noise output to meet JEA's near-field and far-field noise requirements (85 dBA at 3' from equipment, 65 dBA | 75 dBC at 400', 5' above grade). This bar silencer concept is projected to improve C-Weighed overall sound pressure level performance over current system, reducing low-frequency noise emissions from the site.
- The bar silencer is much more efficient aerodynamically and acoustically per foot
 of silencer length compared to parallel baffles. This allows the design to improve
 acoustic and aerodynamic performance while being shorter than the parallel
 baffle silencer. Reduced silencer overall active length means the silencer leading
 edge can be moved higher in the stack while maintaining trailing edge location.

- This additional distance between the elbow exit and the silencer leading edge further allows the gas flow to develop and reduce turbulent side loading on the silencer.
- Option 1 solution re-uses the existing upper stack (49.25') per the solicitation specifications therefore and retains 2x diameter spacing between trailing end of silencer to CEMS ports as well as 0.5x diameter spacing between CEMS ports and stack exit. Stack exit elevation is also unchanged.
 - It is assumed at this time that the upper stack is in OK condition for re-use. Painting this section is not included.
- Option 1 utilizes a solid stack wall liner system throughout, as opposed to competitors which may require the
 use of perforated stack wall liners for additional sound attenuation through the system. A solid liner system
 will be much more durable in the long term compared to perforated surfaces which are inherently less
 thermally effective and more susceptible to degradation and loss of insulation which can cause accelerated
 stack deterioration.
- SVI plans to reuse the existing expansion joint and flow liner at the interface between the turbine outlet and exhaust system inlet. The joint will be inspected to ensure reusability.
- SVI will provide the engineering, materials, and equipment required to properly anchor the new elbow duct and structural members.
- Option 1 includes replacement of the existing acoustical barrier around the stack elbow with a similar barrier,
 as shown in the proposal general arrangement drawings. The existing barrier must be removed in order to
 complete the inlet duct & elbow replacements.
