

Procurement Code Exemption

Electric System Procurement Directive - Sale of JEA-Owned Transmission and Ancillary Services

Scope of Procurement Exemption: It is JEA's policy to sell transmission and ancillary services, in accordance with JEA's Transmission Tariff and FERC orders, on the JEA Open Access Same-time Information System (OASIS). JEA is an owner of the Florida OASIS with other Florida utilities, which is a system that facilitates the marketing of transmission capacity to eligible transmission customers in a non-discriminative manner.

Tariff

The JEA Board has approved a tariff for the sale of transmission and ancillary services.

Enabling Agreements & Blanket Agreements

Included in the tariff are Enabling Agreements which are negotiated by JEA and includes Blanket Use Agreements which are templates for sales agreement with other utilities. The Enabling Agreements are executed prior to any business conducted on JEA's OASIS. Enabling Agreements set out the framework for how business is conducted including, but not limited to, transmission service studies, facility studies including any facility upgrades, and the payment of transmission and ancillary services.

Transmission and Ancillary Services

In accordance with FERC Orders, JEA will study and post its available transmission capacity on OASIS to facilitate transfers in, out or through the JEA electric system. JEA will sell its available transmission capacity to any transmission customer that has an Enabling Agreement with JEA. Transmission and ancillary services are sold per the tariff, the Enabling Agreement and online negotiations on OASIS. In the cases where there is no available transmission capacity and a request is made on OASIS, JEA will perform studies to determine what facility upgrades would be necessary to satisfy the request to any customer that executes the appropriate Enabling Agreements. Additional agreements may be needed to actually expand the system to satisfy the request.
