(*) A construction and demolition disposal site is only permitted to accept the following types of materials: "...steel, brick, concrete, asphalt roofing materials, pipe, gypsum wallboard, and lumber from the construction or destruction of a structure as part of a construction or demolition project, and including rocks, soils, tree remains, trees and other vegetative matter which normally results from land clearing or land development operations for a construction project. Mixing of construction and demolition debris with other types of solid waste, including material which is not from the actual construction or destruction of a structure, will cause it to be classified as other than construction and demolition debris."
