

Management's Discussion and Analysis of Financial Performance for the Quarter Ended December 31 2010

JEA is a municipal utility operating in Jacksonville, Florida (Duval County), and parts of three adjacent counties. The operation is comprised of three enterprise funds - the Electric Enterprise Fund, the Water and Sewer Enterprise Fund and the District Energy System (DES). The Electric Enterprise Fund is comprised of the JEA Electric System, Bulk Power Supply System (Scherer), and St. Johns River Power Park System (SJRPP). The Electric Enterprise Fund, Water and Sewer Fund, and DES are presented on a combined basis in the balance sheets, statements of revenue, expenses and changes in net assets, and statements of cash flows.

Financial Highlights

Operating Revenues

Electric Enterprise Fund total operating revenues (operating revenues) for the quarter ended December 2010 increased 10.4 percent over operating revenues for the quarter period ended December 2009. The main drivers for the increase in operating revenues were a rate increase which went into effect on October 1, 2010 and an increase in kWh sales due to an increase in heating degree days. The fuel rate increased \$6.48 to \$50.64 per 1000kWh, which represents a 14.7 percent increase over the previous fuel charge. The base rate increase is the final year of a four year increase. Territorial sales increased 13.3 percent; however total sales increased 2.1 percent when off-system sales are included. Total sales for the quarter increased from 3,734.2 MWh to 3,812.5 MWh.

Water and Sewer Enterprise Fund total operating revenues increased 20.1 percent for the quarter ended December 2010 compared to the quarter ended December 2009. The increase in operating revenues was due primarily to an increase in water and sewer rates of approximately 9.0 percent; the addition of an environmental charge for water, sewer and non bulk reclaimed volume; and an increase in consumption as a result of a significant decrease in rainfall. There was a 10.0 percent increase in consumption related to water services. Consumption, measured in thousands of gallons (kgals), increased 860,373 kgals from 8,583,932 kgals to 9,444,305 kgals. There was a 7.2 percent increase related to sewer services. Sewer sales volume increased 428,850 kgals from 5,934,214 kgals to 6,363,064 kgals.

Revenues for DES decreased 3.5 percent for the quarter ended December 2010 over operating revenues for the similar period last year. The decrease was due to less usage as a result of fewer cooling degree days.

Operating Expenses

Total operating expenses for the Electric Enterprise Fund decreased 2.0 percent for the quarter ended December 2010 as compared to the quarter ended December 2009. Factors contributing to the decrease were a decrease in fuel and purchased power expense, as discussed below, a decrease in other operating and maintenance expense due mainly to decreased outage expenses related to the Northside Generating Station and decreased recognition of deferred costs. The decrease was offset by increases in taxes and depreciation expense.

Total fuel and purchased power for the quarter ended December 2010 decreased 2.1 percent over the similar period in the prior year. The decrease in fuel and purchased power expense was primarily driven by the product mix and decreased commodity costs, notably natural gas. The decrease was partially offset by the increase in energy produced and purchased. As the price for gas and solid fuels have fluctuated over these periods, the components of fuel and purchased power have shifted as JEA has taken advantage of the most economical source of power.

Total production of megawatts generated and purchased for the quarter ended December 2010 increased, 2.5 percent from 3,081.1 to 3,159.0 MWh. Generated megawatts increased 56.2 percent and purchased power decreased 16.7 percent. JEA's power supply mix for the current quarter was 48.0 percent coal, 26.6 percent natural gas,12.2 percent petroleum coke, 12.9 percent other purchases, and 0.3 percent oil. JEA's power supply mix for the prior quarter ended December 2009 was 62.6 percent coal, 17.9 percent natural gas, 3.1 percent petroleum coke, 10.5 percent coal-fired purchases, 5.8 percent other purchases and 0.1 percent oil.

Northside's capacity factors for Units 1 and 2 for the quarter ended December 2010 were 27.3 percent and 37.6 percent and 32.1 percent combined. Northside's capacity factors for the quarter were affected by management's decision to change the generating fleet and to rely more on natural gas generation. For the quarter ended December 2009, Northside's Units 1 and 2 were in extended outages for most of the quarter resulting in the units not being available which significantly impacted the capacity of the units.

SJRPP's capacity factors for Units 1 and 2 for the quarter ended December 2010 were 77.6 percent and 75.8 percent, and 76.7 percent combined. SJRPP's capacity factors for Units 1 and 2 for the quarter ended December 2009 were 91.5 percent and 90.5 percent, and 85.1 percent combined. SJRPP's capacity factors for the quarter ended December 2010 were affected by management's decision to change the generating fleet and to rely more on natural gas generation.

Plant Scherer Unit 4 capacity factors for the quarter ended December 2010 was 90.3 percent. Plant Scherer Unit 4 capacity factors for the quarter ended December 2009 was 80.2 percent. The capacity factor for the quarter ended December 2009 was impacted by unplanned outages for the quarter ended December 2009.

Water and Sewer System total operating expenses for the quarter ended December 2010 decreased 1.6 percent when compared to the prior year. The decrease was primarily due to decreased depreciation expense which was offset by an increase in other operating expenses due to an increase in intercompany charges.

DES operating expenses for the quarter ended December 2010 decreased 2.9 percent over the similar period in the prior year. The decrease was primarily caused by decreased utility charges.

Non-operating Revenues (Expenses)

There was a net increase of \$3.1 million in total non-operating expenses for the quarter ended December 2010. The major factors contributing to the change were negative non-cash fair market value adjustment related to investments of \$3.9 million; an increase interest expense of \$2.3 million due to additional borrowings; offset by an increase in earnings from The Energy Authority (TEA), a municipal power marketing joint venture in which JEA is a member, resulting from increased purchases by JEA of \$3.1 million.

Debt Administration

During the quarter, the ratings for the Electric System, SJRPP System and Bulk Power Supply System (BPS) bonds remained the same. Fitch, Moody's and Standard & Poor's ratings for the Electric System senior bonds were AA-, Aa2 and AA-; for the Electric System subordinated bonds, AA-, Aa3 and A+; for the SJRPP bonds, AA-, Aa2 and AA-; and for the BPS bonds, AA-, Aa2 and AA-, respectively. On October 21, 2010, \$200.3 million of Electric System refunding bonds were issued and \$93.6 million of new money bonds for Electric System capital expenditures were issued.

During the quarter, the ratings for the Water and Sewer System senior and subordinated bond ratings remained the same. The senior bond ratings by Fitch, Moody's and Standard & Poor's were AA, Aa2, and AA- and the subordinated bond ratings were AA, Aa2 and AA-, respectively.

On November 10, 2010, \$49.0 million of new money bonds for Water and Sewer capital expenditures were issued and \$73.7 million of senior lien and subordinated lien refunding bonds were issued.

At the end of the quarter, the Electric System had \$34.2 million, the BPS had \$9.0 million, and the District Energy System had \$3.8 million in outstanding bank draws under the revolving line of credit.

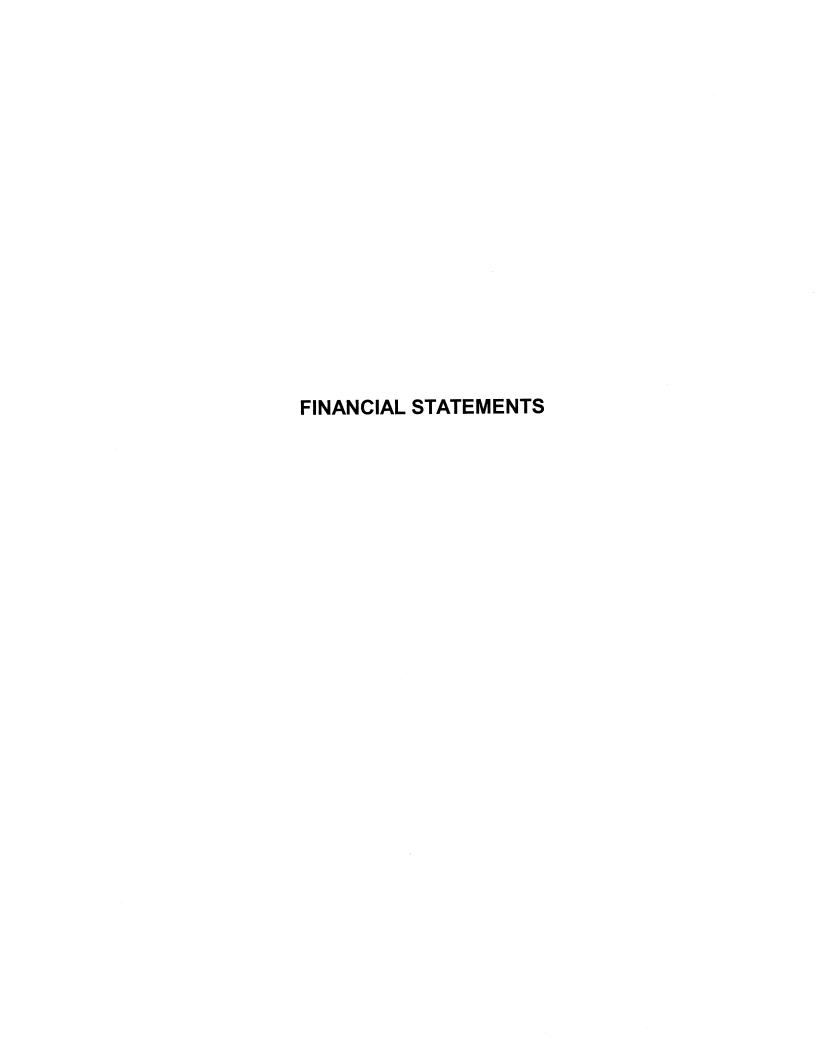

The debt service coverage ratio for the Electric System's senior debt was 6.66x and 4.97x for the quarters ended December 2010 and December 2009. The debt service coverage ratio for the Electric System's combined senior and subordinated debt was 3.10x and 2.66x for the quarters ended December 2010 and December 2009. The increase in debt service coverage ratios for the quarter was due to increased net revenues primarily related to the rate increases discussed above, as well as continued low short-term interest rates.

The Water and Sewer senior debt service coverage ratio was 2.37x and 2.10x for the quarters ended December 2010 and 2009. The Water and Sewer combined senior and subordinated debt service coverage ratio was 2.11x and 1.84x for the quarters ended December 2010 and 2009. The increase in debt service coverage ratios for the quarter was due to increased net revenues from the rate increase discussed above.

Capital Assets

JEA's investment in capital assets at December 2010 was \$6.7 billion (net of accumulated depreciation). For the quarter period ended December 2010, capital expenditures were \$187.2 million consisting of \$140.9 million for the Electric Enterprise System and \$46.3 million for the Water & Sewer System. The major capital items of the Electric Enterprise fund include the Greenland Energy Center and gas transmission, which will consist of two dual-fired gas/diesel combustion turbines ("CT") and is planned to achieve commercial operation by summer 2011. For the quarter period ended December 2010, the major capital items of the Water and Sewer include capacity upgrades and transmission improvements.

Jim Dickenson, Chief Executive Officer

- (1) Excludes investment income on sinking funds.
- (2) Excludes depreciation.
- (3) In accordance with the requirements of the Electric System Resolution, all the Contract Debt payments from the Electric System to the SJRPP and Bulk Power Supply System with respect to the use by the Electric System of the capacity and output of the SJRPP and Bulk Power Supply System are reflected as a purchased power expense on these schedules. These schedules do not include revenues of the SJRPP and Bulk Power Supply System, except that the purchased power expense is net of interest income on funds maintained under the SJRPP and Bulk Power Supply System Resolutions.
- (4) Net revenues divided by debt service requirement. Annual minimum coverage is 1.20x.
- (5) Net revenues divided by adjusted debt service requirement. Annual minimum coverage is 1.15x.

Debt service requirement (from above)		26,775		22,898
Plus: aggregate subordinated debt service on				
outstanding subordinated debt		3,276		3,185
Adjusted debt service requirement		30,051		26,083
Senior and subordinated debt service coverage (4)		2.11x		1.84x

⁽¹⁾ Effective October 01, 2001, the Water and Sewer Bond Resolution was amended to include capacity fees in total revenues. Had such capacity fees not been included in the calculation for the three month period ending December 2010 and 2009, then the debt service coverage would have been 2.02x and 1.74x.

⁽²⁾ Excludes depreciation.

⁽³⁾ Net revenues divided by aggregate debt service. Annual minimum coverage is 1.25X

⁽⁴⁾ Net revenues must be greater than or equal to the sum of 100% of the senior debt service and 120% of the subordinated debt service. The sum of such debt service amounts for the three month period ending December 2010 is \$30,706 and \$26,720 for the three month period ending December 2009.
