

## Management's Discussion and Analysis of Financial Performance for the Quarter Ended March 31, 2015

JEA is a municipal utility operating in Jacksonville, Florida (Duval County), and parts of three adjacent counties. The operation is comprised of three enterprise funds - the Electric Enterprise Fund, the Water and Sewer Enterprise Fund and the District Energy System (DES). The Electric Enterprise Fund is comprised of the JEA Electric System, Bulk Power Supply System (Scherer), and St. Johns River Power Park System (SJRPP). The Electric Enterprise Fund, Water and Sewer Enterprise Fund, and DES are presented on a combined basis in the balance sheets, statements of revenue, expenses and changes in net assets, and statements of cash flows.

#### Financial Highlights

#### **Operating Revenues**

Electric Enterprise Fund operating revenues for the quarter ended March 2015 decreased 3.7 percent over operating revenues for the quarter ended March 2014. The decrease was primarily attributable to decreased megawatt hours sold to Florida Power and Light (FPL) in conjunction with the SJRPP coal generating facility. Megawatt hour sales to FPL decreased 200,324 MWh (39.0) percent when compared to the quarter ending March 2014. However, territorial and other off-system sales for the quarter only decreased slightly when compared to the quarter ending March 2014. Territorial and other off-system sales decreased 15,374 MWh from 2,910,693 MWh to 2,895,319 MWh. Other revenues increased \$0.81 mainly million due to increased pole attachment revenues.

Electric Enterprise Fund operating revenues for the six months ended March 2015 decreased 1.0 percent over operating revenues for the six months ended March 2014. The decrease was due to decreased sales of megawatt hours to FPL. Megawatt hour sales to FPL decreased 92,778 MWh (9.6) percent when compared with the six month period ended March 2014. However, territorial and other MWh sales increased 1.5 percent. Total territorial and other sales for the year increased 82,221 MWh from 5,659,375 MWh to 5,741,596 MWh. Other revenues increased \$1.0 million, primarily due to increased pole attachment revenues.

Total Water and Sewer Enterprise Fund operating revenues increased 3.2 percent for the quarter ended March 2015 compared to the quarter ended March 2014. Water revenues increased 3.9 percent, mainly due to a 6.9 percent increase in consumption and a 2.1 percent increase in customer accounts. Water consumption measured in thousands of gallons (kgals) increased 479.6 kgals from 6,992.4 kgals to 7,472.1 kgals. Sewer revenues increased 2.1 percent primarily related to a 3.9 percent increase in sewer sales volume and a 2.5 percent increase in sewer accounts. Sewer sales increased 214.8 kgals from 5,524.8 kgals to 5,739.7 kgals.

Total Water and Sewer Enterprise Fund operating revenues increased 4.1 percent for the six months ended March 2015 compared to the six months ended March 2014. Water revenues increased 4.4 percent, mainly due to a 6.7 percent increase in consumption and a 2.0 percent increase in customer accounts. Water consumption measured in kgals increased 998.9 kgals from 14,829.2 kgals to 15,828.2 kgals. Sewer revenues increased 3.4 percent primarily related to a 5.0 percent increase in sewer sales volume and a 2.4 percent increase in sewer accounts. Sewer sales increased 569.3 kgals from 11,336.2 kgals to 11,905.5 kgals.

Operating revenues for DES increased 0.8 percent for the quarter ended March 2015 compared to operating revenues for the similar period last year due to increased usage by customers.

Operating revenues for DES decreased 0.3 percent for the six months ended March 2015 compared to operating revenues for the similar period last year primarily due a decrease in usage by customers during the first quarter of the fiscal year.

#### **Operating Expenses**

Total operating expenses for the Electric Enterprise Fund decreased 16.3 percent for the quarter ended March 2015 as compared to the quarter ended March 2014. Fuel and purchased power expense decreased \$28.4 million, as discussed below. Operating and maintenance expenses decreased \$7.3 million (11.1 percent). The major factor driving the decrease in operating and maintenance expenses was decreased maintenance expenses at Plant Scherer. Taxes and franchise fees decreased \$0.3 million (2.1 percent) due to the decrease in revenues. Recognition of deferred costs decreased in the amount of \$9.9 million primarily due to a regulatory assets adjustment resulting from timing differences between principal payments and depreciation expense at SJRPP. Depreciation expense decreased \$1.8 million due to the retirement of assets becoming fully depreciated.

Total fuel and purchased power expense for the quarter ended March 2015 decreased \$28.4 million (19.7 percent) over the similar period in the prior year. Fuel mix, commodity prices and purchased power costs were the drivers for the decreases when compared to the prior quarter. Generation costs decreased 18.0 percent and purchased power costs decreased 30.5 percent. As the prices for gas and solid fuels have fluctuated over these periods, the components of fuel and purchased power have shifted as JEA has taken advantage of the most economical source of power.

Total production of megawatt hours generated and purchased for the quarter ended March 2015 increased 0.4 percent from 2,999,939 MWh to 3,013,211 MWh. Generated megawatt hours increased 6.6 percent and purchased power decreased 8.0 percent. JEA's power supply mix for the current quarter was 44.8 percent coal, 33.4 percent natural gas, 11.9 percent petroleum coke, 9.7 percent other purchases and 0.2 percent oil. JEA's power supply mix for the quarter ended March 2014 was 55.6 percent coal, 23.3 percent natural gas, 16.7 percent petroleum coke, 4.2 percent other purchases and 0.2 percent oil.

Total operating expenses for the Electric Enterprise Fund decreased 9.6 percent for the six months ended March 2015 as compared to the six months ended March 2014. Fuel and purchased power expense decreased \$19.8 million, as discussed below. Operating and maintenance expenses decreased \$0.9 million (0.8 percent). The major factor impacting the decrease in operating and maintenance expenses was reduced expenses at Plant Scherer. The decrease was offset by an increase in maintenance expenses related to a termination payment made for a maintenance contract related to combustine turbine units and increased maintenance expenses at Northside generating station due to planned outages during the first quarter. Taxes and franchise fees remained constant when compared to the prior year. Recognition of deferred costs decreased in the amount of \$29.8 million primarily due to a regulatory assets adjustment resulting from timing differences between principal payments and depreciation expense at SJRPP. Depreciation expense decreased \$4.0 million due to the retirement of assets becoming fully depreciated.

Total fuel and purchased power expense for the six months ended March 2015 decreased \$19.8 million over the similar period in the prior year. The decrease in fuel and purchased power expense was driven by decreased generation costs of 7.1 percent and purchased power costs of 24.1 percent. Total cost per MWh decreased 16.1 percent.

Total production of megawatt hours generated and purchased for the six months ended March 2015 increased 1.7 percent from 5,846,688 MWh to 5,943,269 MWh. Generated megawatt hours increased 8.0 percent and purchased power decreased 5.4 percent. JEA's power supply mix for the current year was 55.1 percent coal, 29.3 percent natural gas, 7.9 percent petroleum coke, 7.6 percent other purchases and 0.1 percent oil. JEA's power supply mix for the six months ended

March 2014 was 56.5 percent coal, 26.0 percent natural gas, 12.9 percent petroleum coke, 4.5 percent other purchases and 0.1 percent oil.

Northside's availability factors for the quarter ended March 2015 were 74.6 percent for Unit 1, 99.6 percent for Unit 2 and 77.5 percent combined. Northside's availability factors for the six months ended March 2015 were 66.9 percent for Unit 1, 79.1 percent for Unit 2 and 73.0 percent combined. Northside's availability factors were affected by planned and unplanned outages.

SJRPP's availability factors for the quarter ended March 2015 were 64.7 percent for Unit 1, 90.4 percent for Unit 2 and 88.4 percent combined. SJRPP's availability factors for the six months ended March 2015 were 81.7 percent for Unit 1, 95.1 percent for Unit 2 and 88.4 percent combined. SJRPP's availability factor for Unit 1 was affected by a planned outage during the second guarter of the fiscal year.

Plant Scherer Unit 4 availability factor for the quarter ended March 2015 was 99.7 percent. Plant Scherer Unit 4 availability factor for the six months ended March 2015 was 97.3 percent.

Water and Sewer System total operating expenses for the quarter ended March 2015 decreased \$1.1 million (1.6 percent) when compared to the prior year. The principal driver of the decrease was the recording of a workers' compensation refund during the current quarter. There was an increase in depreciation expense of \$0.8 million due to assets being placed in service.

Water and Sewer System total operating expenses for the six months ended March 2015 decreased \$1.8 million (1.4 percent) when compared to the prior year. The reason for the decrease was the same as discussed above. There was a decrease in depreciation expense of \$0.2 million due to certain assets becoming fully depreciated primarily in the first quarter.

Total DES operating expenses increased 13.2 percent for the quarter ended March 2015 over the similar period in the prior year mainly due to an increase in maintenance expenses at the plants. Total DES operating expenses increased 6.7 percent for the six months ended March 2015 over the similar period in the prior year.

#### **Nonoperating Revenues (Expenses)**

There was a net decrease of \$2.5 million (5.74 percent) in total nonoperating expenses for the quarter ended March 2015. The primary reason for the change is a decrease in interest expense. Interest expense decreased \$6.9 million primarily due to a lower debt balances as a result of increased debt repayments. Investment income decreased \$2.9 million due to unfavorable fair market value adjustments in investments. Earnings from the Energy Authority (TEA), a municipal power marketing joint venture in which JEA is a member, decreased \$2.0 million due to lower margins on purchases and sales by TEA. Allowance for funds used during construction increased \$0.4 million due to increased capital spending.

There was a net decrease of \$8.1 million (8.7 percent) in total nonoperating expenses for the six months ended March 2015. The primary reason for the change is a decrease in interest expense. Interest expense decreased \$11.8 million primarily due to a lower debt balances as a result of increased debt repayments. Investment income decreased \$2.4 million primarily due to unfavorable fair market value adjustments in investments. Earnings from TEA decreased \$1.9 million due to lower margins on purchases and sales by TEA. Allowance for funds used during construction increase \$0.7 million due to increased capital spending.

#### **Debt Administration**

During the quarter, the ratings for the Electric System, SJRPP System and Bulk Power Supply System bonds remained the same. Fitch, Moody's and Standard & Poor's ratings were AA, Aa2 and AA- for the Electric System senior bonds; AA, Aa3 and A+ for the Electric

System subordinated bonds; AA, Aa2 and AA- for the SJRPP bonds; and AA, Aa2 and AA- for the Bulk Power Supply System bonds.

During the quarter, the ratings for the Water and Sewer System remained the same. The Water and Sewer System senior bond ratings by Fitch, Moody's and Standard & Poor's were AA, Aa2, and AA; and the Water and Sewer System subordinated bond ratings were AA, Aa2 and AA.

During the quarter, the ratings for the District Energy System remained the same. The District Energy System bond ratings by Fitch, Moody's and Standard & Poor's ratings were AA, Aa3 and AA-.

At the end of the quarter, there were no outstanding bank draws under the revolving lines of credit.

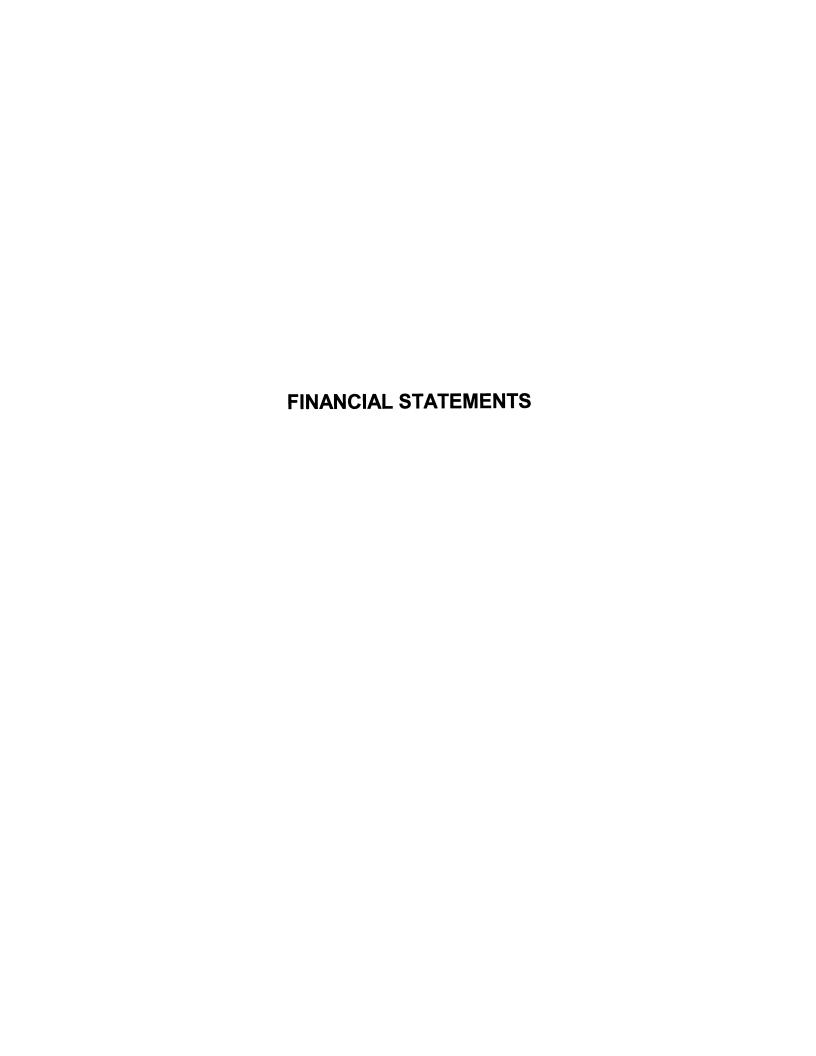

The Electric System senior debt service coverage ratio was 5.74x and 5.65x for the quarters ended March 2015 and March 2014. The debt service coverage ratio for the Electric System's combined senior and subordinated debt was 2.61x and 2.63x for the quarters ended March 2015 and March 2014. The increase in the coverage amounts were due to decreased operating expenses which resulted in increased net revenues. The increase in net revenues was offset in part by increased debt service requirements.

The Water and Sewer System senior debt service coverage ratio was 3.07x and 2.42x for the quarters ended March 2015 and March 2014. The debt service coverage ratio for the Water and Sewer System's combined senior and subordinated debt was 2.70x and 2.20x for the quarters ended March 2015 and March 2014. The increases were due to increased net revenues and decreased debt service requirements.

#### **Capital Assets**

JEA's investment in capital assets at March 2015 was \$6.12 billion (net of accumulated depreciation). This included \$3.40 billion in the Electric Enterprise assets, \$2.68 billion in the Water & Sewer assets and \$37.4 million in DES assets. For the six months ended March 2015, capital expenditures were \$74.52 million consisting of \$42.1 million for the Electric Enterprise Fund and \$32.3 million for the Water & Sewer Fund and \$ 0.12 million for DES. JEA has ongoing capital improvement programs for the Electric Enterprise Fund and the Water and Sewer Fund. The cost of the capital improvement program is planned to be provided from revenues generated from operations and existing fund balances.

Paul McElroy, Managing Director/

Senior and subordinated debt service coverage (5)		2.70 >	(	2.20 >	(	2.82	K	2.30

<sup>(1)</sup> Effective October 1, 2001, the Water and Sewer Bond Resolution was amended to include capacity fees in total revenues. Had such capacity fees not been included in the calculation for the year-to-date periods ending March 2015 and 2014, then the debt service

<sup>(2)</sup> Excludes the Build America Bonds subsidy.

<sup>(3)</sup> Excludes depreciation.

<sup>(4)</sup> Net revenues divided by aggregate debt service. Annual minimum coverage is 1.25x.

<sup>(5)</sup> Net revenues divided by total aggregate debt service and aggregate subordinated debt service. Minimum annual coverage is either 1.00x aggregate debt service and aggregate subordinated debt service (excluding capacity charges) or the sum of 1.00x aggregate debt service and 1.20x aggregate subordinated debt service (including capacity charges). Based on the first requirement, minimum annual coverage is 2.64x and 2.16x. Based on the second requirement, net revenues must exceed 100% of aggregate debt service and 120% of aggregate subordinated debt service, or \$51,922 and \$58,472 for the year-to-date period ending March 2015 and 2014.
