Self-Certification for an Exempt Potable Water System Submission Receipt

02/07/2019

Dear **Samantha Hanzel**: On, **02/07/2019**, you used the Department's electronic Self-Certification Process to certify compliance with the terms and conditions identified in 62-555.520 F.A.C. which details exemptions from permitting.

Project Description

Your project consists solely of the below listed activities:

- Replacement of any existing water main with a new main at the same location as the existing main, provided the new main will be either the same size as the existing main, no more than two sizes larger than the existing main, or no larger than the minimum size required or recommended in Recommended Standards for Water Works as incorporated into Rule 62-555.330, F.A.C.

Your Self-Certification is based solely on the information you provided under this process, and applies only to the statutes and rules in effect when your certification was completed. The certification is effective only for the specific project proposed, and only if the project is constructed, operated, and maintained in conformance with all the terms, conditions, and limitations stated in the Self-Certification Process. In addition, any substantial modifications in your plans should be submitted to the Department for review, as changes may result in a permit being required.

Completion of the Self-Certification constitutes your authorization for Department personnel to enter the property for purposes of inspecting for compliance.

This Self-Certification Process does not relieve you from the responsibility of obtaining other permits or authorizations from other agencies (federal, state, Water Management District, county, or local) that may be required for the project. Failure to obtain all applicable authorizations prior to construction of the project may result in enforcement.

If you have any questions concerning this process, please contact Northeast District by e-mail at DEP_NED@dep.state.fl.us.

Sincerely,
Florida Department of Environmental Protection
