

Procurement Code Exemption

Byproduct Services - Electric and Water/Wastewater

Scope of Procurement Code Exemption:

JEA produces byproducts through its normal operations. In efforts to support JEA's environmental sustainability initiative, and to obtain the best use of rate payer dollars, JEA may either beneficially reuse or landfill byproducts. This includes the procurement, sale, marketing and management of Byproducts for Electric and Water/Wastewater (materials resulting from the process of generating electricity, producing potable water and treating wastewater including but not limited to, bottom ash, bed ash, fly ash, gypsum, activated carbon, resin, sludge and biosolids residuals). In an effort to beneficially reuse byproducts, JEA may apply for certification from appropriate state agencies in Florida and other States, may certify contractors to handle the byproducts in accordance with the certification received, may sell the byproducts for use within the certifications, and may procure existing landfill space or lands for landfill purposes to best serve JEA. JEA may operate a landfill for byproducts through use of JEA forces, or may contract for services relating to operation of a landfill for byproducts using methods which will produce the best results for JEA, including requiring that contractors operate landfills be certified and experienced in the use of both byproduct materials and landfill operations. This procurement exemption provides JEA staff with the authority to make timely procurement commitments and to effectively participate in opportunities to market, transport, explore innovative technologies, beneficially reuse, install, sanitation and dewatering to mitigate negative environmental impacts and dispose of byproducts. It governs the marketing, transportation (including the lease/purchase of rail assets), exploration of innovative technologies, beneficial reuse, installation, sanitation and dewatering in mitigation of negative environmental impacts and disposal of byproducts.
