- Valley Proteins - (863) 425-6706
- Workman's Kwik Fix Plumbing - (904) 594-5349

Within JEA's service territory, food service establishments (FSE) are required to have their larger greased separation devices (>50 gallon) cleaned by a certified hauler listed above. These haulers are trained and vetted by JEA to ensure their cleaning practices adequately protect the JEA collection system from FOGS. Small inside grease traps (<50 gallons) may be cleaned by hand, however it will be the FSE's responsibility to submit pump-out reports to JEA each time the trap is cleaned. For more information regarding self-cleaning and submitting pump-out reports, please download the following PDF documents at jea.com:

Self-Cleaning Instructions –
