

Welcome to the

Awards Meeting

September 07, 2023, 10:00 AM EST

You have been joined to the meeting with your **audio muted** by default.

At the designated public comment time we will provide opportunity for you to unmute to speak.

During the meeting, public comments received via e-mail regarding any matter on the agenda for consideration will be read out. Per the Public Notice Agenda posted on JEA.com, public comments by e-mail must be received no later than 9:00 a.m. on the day of the meeting to be read during the public comment portion of the meeting.

Please contact **Aileen Cruz** by telephone at **(904) 776-1911** or by email at **cruza@jea.com** if you experience any technical difficulties during the meeting.

JEA Awards Agenda

September 7, 2023

225 North Pearl St., Jacksonville, FL 32202 - Hydrangea Room 1st Floor

[Teams Meeting Info](#)

Consent Agenda

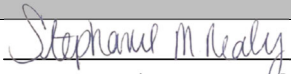

The Chief Procurement Officer offers the following items for the JEA Awards Consent Agenda. Any item may be moved from the Consent Agenda to the Regular Agenda by a committee member asking that the item be considered separately. All items on the Consent agenda have been approved by OGC, Budget and the Business Unit Vice President and Chief. The posting of this agenda serves as an official notice of JEA's intended decision for all recommended actions for **Formal Purchases** as defined by **Section 3-101 of the JEA Procurement Code**. Please refer to JEA's Procurement Code, if you wish to protest any of these items.

Award #	Type of Award	Solicitation # & Short Description/Title	VP	Awardee	Funding Source	Award Amount	Original Award Amount	New Not-to-Exceed	Amendments	Term	JSEB Participation (Y/N) If Y, then list company name(s)
1	Minutes	Minutes from 08/24/2023 Meeting	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
2	Request for Proposal (RFP)	1411282646 - Power Transformer Supply Agreements	Melendez	Prolec - GE Waukesha, Inc. Hitachi Energy USA, Inc.	Capital	\$9,452,929.00 \$9,980,800.00	N/A	N/A	N/A	Seven (7) Years, w/ Two (2) - 1 Yr. Renewals	N
Moved to the regular agenda											
3	Request for Proposal (RFP)	1411316246 - Auto Transformer Supply Agreements	Melendez	PTI Transformer LP Prolec GE Waukesha, Inc.	Capital	\$3,667,500.00 \$0.00	N/A	N/A	N/A	Seven (7) Years, w/ Two (2) - 1 Yr. Renewals	N
<p>Advertised: 06/02/2023 Bid Opening: 08/01/2023 Three (3) Proposals Received For additional information contact: Rodney Lovgren</p> <p>The purpose of the Request for Proposal (the "RFP") is to contract two Auto transformer manufacturers for a forward looking, 7+ year plan to support replacements and expansion projects, with reservations for production slots to ensure supply. The longer term contract is required as substation transformer lead times are 3+ years. JEA evaluated the companies based on price and experience. PTI transformers LP and Prolec GE Waukesha, Inc. were deemed the highest evaluated and lowest priced responsive and responsible proposers.</p> <p>The transformer prices in this bid are trending to follow the Large Specialty Transformer producer price index. This PPI for transformers when this scope of supply was last bid in Oct. 2017 was - 236.7 vs. July 2023 PPI is 429.6 (81% increase), which is reflected in the pricing received. Given the current market conditions is deemed reasonable.</p> <p>Contracts have a price adjustment, which allows price adjustment through manufacturing release, or typically around 6 months prior to shipment. The Prolec GE contract is currently being awarded with a zero dollar value, as the prospective project need date for the transformer where Prolec GE is lower priced forecast in 2032.</p> <p>There are 6 Auto Transformer slots forecast for these contracts. These contracts will be brought back to the awards committee periodically to fund the additional slotted transformer projects in the later years of the contract as budgets and funds allow.</p>											
4	Information for Bid (IFB)	1411304846 - Small Diameter Pipe Replacement Program - Forbes St. Area Packages B and C	Vu	United Brothers Development Corp	Capital	\$4,521,559.60	N/A	\$4,521,559.60	N/A	Project Completion (estimated September 2024)	Legacy Engineering \$8,000.00 DJ Contracting Inc. \$135,000.00 D & J Erosion Control Services \$15,000.00 RZ Service Group LLC \$240,926.00 Total JSEB Value \$398,926.00
<p>Advertised: 07/06/2023 Bid Opening: 08/22/2023 Four (4) Bids Received For additional information contact: David King</p> <p>The Contractor will perform installation of 6,617 linear feet of various size water main: approximately 2,707 LF of 8" water main, 2,847 LF of 6" water main, and 736 LF of 4" water main, and 327 LF of 2" HDPE water main with associated fittings and appurtenances. This will replace an existing water distribution system at the end of its useful life. The distribution system serves 142 residential and commercial parcels within the limits of a City of Jacksonville Ash Site known as the Forest Street Incinerator Site. Ash from refuse incineration was placed in this area prior to the construction of the community.</p>											
5	Emergency	Emergency - Buckman Biosolids - Class B Sludge Cake Hauling	Vu	Synagro South, LLC	Capital	\$752,491.96	N/A	\$752,491.96	N/A	Project Completion (estimated August 2023)	0
<p>Project start: January 2023 For additional information contact: Darriell Brown</p> <p>This emergency purchase was for the hauling and removal of Class B sludge cake to completely remove the stockpile at Buckman Water Reclamation Facility. After the removal of the stockpile, services were needed to continuously haul away the daily biosolids that were produced. Both the stockpile and daily production of biosolids were due to the Biosolids Dryer being out of service and being rebuilt.</p> <p>Synagro was chosen due to their additional hauling capacity compared to the currently contracted vendors, extra locations for disposal of sludge cake, and immediate availability to address the emergency.</p>											

Award #	Type of Award	Solicitation # & Short Description/Title	VP	Awardee	Funding Source	Award Amount	Original Award Amount	New Not-to-Exceed	Amendments	Term	JSEB Participation (Y/N) If Y, then list company name(s)
6	Information for Bid (IFB)	1411319046 - FY24 Water/Wastewater Purchase of Fixed Diesel Pumps for Storm Resiliency	Melendez	Thompson Pump & Mfg., Co. Inc.	Capital	\$980,883.00	N/A	\$980,883.00	N/A	Project Completion (Expected: July 2024)	N/A
	Advertised: 06/22/2023 Opened: 08/08/2023 Two (2) Bids Received For additional information contact: Dan Kruck The scope of work for this contract is the supply of eleven diesel engine driven, self-contained automatic standby pony pump systems authorized by JEA Standards. JEA has three approved vendors for pony pumps, and one vendor informed JEA they would not be participating in this bid prior to the advertisement. The solicitation was advertised for twelve (12) pony pumps, and Thompson Pumps was low bidder for eleven of the required pumps. The other pump will be awarded informally to the other vendor (Xylem).										
7	Request for Proposal (RFP)	1411294846 - Telehandlers and Aerial Platform Solicitation	McElroy	Briggs Equipment Leppo, Inc. Southern States Toyota Lift	FY24 Capital Purchase	\$94,177.96 \$483,210.00 \$85,995.00	NA	\$663,382.96	NA	One-time purchase, Expected delivery 03/31/2024	N
	Advertised: 06/12/2023 Optional Pre-bid: 06/20/2023 Responses Opened 07/25/2023, Four (4) Responses Opened For additional Information Contact: Eddie Bayouth This Request for Proposal (RFP) is for the purchase of four (4) Class 364 Forklift Telehandlers (5500, 7000, 9000, 12000 LB) and one (1) Class 371 51' Aerial Platform for FY24. Two (2) of the Telehandlers and the Aerial Platform are for Electric replacement, one (1) of the remaining Telehandlers is for Water replacement, and the other is for Water Expansion. All five (5) pieces of equipment will arrive in FY24. JEA evaluated the proposals based on pricing (50%), form, fit and functionality to JEA requirements (15%), warranty (5%), safety features (10%), and ease of doing business (10%). The vendor with the highest evaluation for each items was selected. Only two (2) of the telehandlers, the 5500 LBS and the 7000 LBS, have been purchased recently (FY22). The price increases for these two (2) telehandlers were 13.9% and 3.9%, which are lower than the increases we have seen the last two (2) years and deemed reasonable. Based on the price increases Fleet has forecasted for the cost of vehicles, the estimates were higher than the actual costs.										
8	Contract Increase	127-17 Buckman Biosolids Conversion Projects	Melendez	Carollo Engineers, Inc.	Capital	\$4,942,828.06	\$5,679,431.64	\$20,442,279.52	04/21/2020 - (\$333,197.00) 08/24/2020 - \$653,483.00 10/21/2020 - 60,212.00 04/22/2021 - \$7,053,403.28 10/14/2021 - \$209,989.00 04/07/2022 - \$989,893.30 07/12/2022 - \$52,646.00 08/18/2022 - \$46,883.00 03/02/2023 - \$1,086,707.24	Project Completion (Expected: May 2027)	C&ES Consultants Inc. (Inspection, Architectural Services) \$788,760.00 Mittauer & Associates Inc. (Yard Piping) - \$441,200.00 GM Hill Engineering Inc. (Structural Eng) - \$41,000.00
	Last Awarded: 03/02/2023 For additional information contact: Dan Kruck The scope of work for this contract includes additional design and construction inspection of multiple treatment and infrastructure projects at the Buckman WRF. This increase will add funds to the contract for additional engineering and design services underway for the thermal drum drying system, emergency cake loading silo, waste pellet silo, ferric chloride storage system, muriatic acid storage, and yard piping improvements. The increase will also add funds for additional permitting support and additional construction phase services. The biosolids upgrade at Buckman will be completed in 2027 and will then receive and process all biosolids material from other JEA facilities. In the interim, the existing Buckman biosolids facility is being rehabilitated to ensure production can continue until the new facility is completed. This will prevent the need to haul biosolids material which costs about \$2M/month. The interim rehabilitation project is scheduled to be completed in September 2023. The proposal was reviewed by JEA project staff and deemed reasonable when compared to other projects. The hourly rates used to develop the fee are fixed through the completion of the contract. The awardee has confirmed that this will be the last increase needed to complete the design and services during construction for this contract.										
Consent Agenda Action											
Committee Members in Attendance	Names	Ted Phillips, Tony Long , Laura Schepis

1	Request for Proposal (RFP)	1411282646 - Power Transformer Supply Agreements	Melendez	Prolec - GE Waukesha, Inc. Hitachi Energy USA, Inc.	\$9,452,929.00\$9,980,800.00	N/A	N/A	N/A	Seven (7) Years, w/ Two (2) - 1 Yr. Renewals	N	Motion by: <u>Laura Schepis</u> Second by: <u>Tony Long</u> Committee Decision: <u>Approved</u>
Advertised: 06/02/2023 Bid Opening: 08/01/2023 Two (2) Proposals Received For additional information contact: Rodney Lovgren The purpose of this Request for Proposal (the "RFP") is to contract multiple Power Transformer Manufacturers for a forward looking, 7+ year plan to support replacements and expansion projects, with reservations for production slots to ensure supply. JEA evaluated the companies based on price and experience. Prolec GE Waukesha, Inc. and Hitachi Energy USA, Inc. were deemed highest evaluated & the lowest priced responsive and responsible proposers. The transformer prices in this bid are trending to follow the Large Specialty Transformer producer price index. This PPI for transformers when this scope of supply was last bid in Oct. 2017 was - 236.7 vs. July 2023 PPI is 429.6 (81% increase), which is reflected in the pricing received. Given the current market conditions is deemed reasonable. Additionally, lead times range from 27 - 44 months. GE Prolec as the lowest priced provider on the power transformers was able to provide 3 of the 7 Power Transformers required in 2026. JEA elected to award the other 4 transformers to Hitachi Energy, to support project lead times, as their lead time supports the 2026 need. All contracts will have a price adjustment methodology, which allows price adjustment through manufacturing release, or typically around 6 months prior to shipment. There are currently 37 power transformer slots forecast for these contracts, which will be brought back to the awards committee periodically to fund the additional slotted transformer projects in the later years of the contract as budgets allow.

The Chief Procurement Officer offers the following items for the JEA Awards Consent Agenda. Any item may be moved from the Consent Agenda to the Regular Agenda by a committee member asking that the item be considered separately. All items on the Consent agenda have been approved by OGC, Budget and the Business Unit Vice President and Chief. The posting of this agenda serves as an official notice of JEA's intended decision for all recommended actions for Formal Purchases as defined by Section 3-101 of the JEA Procurement Code . Please refer to JEA's Procurement Code, if you wish to protest any of these items.											
Award #	Type of Award	Solicitation # & Short Description/Title	VP	Awardee	Funding Source	Award Amount	Original Award Amount	New Not-to-Exceed	Amendments	Term	JSEB Participation (Y/N) If Y, then list company name(s) (%), \$ - awarded)
1	Minutes	Minutes from 08/17/2023 Meeting	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
2	Contract Increase/Renewal	102-19 Bulk Ferric Chloride Supply	Vu	PVS Technologies, Inc.	O&M	\$797,936.17	\$1,242,460.00	\$3,682,163.18	9/30/2021 - \$983,708.49 3/16/2023 - \$222,616.84 5/4/2023 - \$435,441.68	Three (3) Years w/Two (2) - 1 Yr. Renewals Start: 11/01/2019 End: 10/31/2024 No Renewals Remaining	N/A
Last Awarded 05/04/2023 For Additional Information Contact: Darriel Brown The scope of work for this service for the supply and delivery of Ferric Chloride (FeCl3) and/or Ferric Sulfate (Fe2(SO4)3) which is used for struvite control in our wastewater treatment process. This product is to be delivered in a bulk shipment via tanker to JEA Buckman Residuals Management Facility. The current price of \$2.58 per gallon was accepted for the first renewal term (through 10/31/2023). For this last renewal term (through 10/31/2024), the vendor requested an increase of 10% to \$2.84 per gallon, citing increase in the global and domestic chlorine markets. The following benchmark pricing from other municipalities was compared to ensure competitive pricing for JEA: St. Petersburg, FL - \$2.93/gal Tampa, FL - \$2.88/gal. The Award amount was calculated by using the average spend for the past two years, factoring in the new price, and projecting the amount needed to cover through the end of the renewal term; no increase in usage is anticipated.											
3	Change Order	Piggyback, ServiceNow Licenses, Support, and Analytics for ServiceNow Help Desk Services Ticketing System, Discovery Module, and Strategic Portfolio Management	Datz	Carahsoft Technology Corporation	O&M and Capital	\$184,460.64	\$1,631,005.14	\$1,849,414.50	08/19/2021- \$33,948.72	Five (5) Years w/ no renewals Start Date: 08/30/2019 End Date: 08/29/2024	No
Last Awarded: 08/29/2019 For additional information contact: Nathan Woyak Piggyback of 43230000-NASPO-16-ACS, Carahsoft AR2472 The current JEA Help Desk Service ticketing system using the ServiceNow (SN) Management Suite and Performance Analytics is an Information Technology Infrastructure Library (ITIL)-based IT (SN) Service Management (ITSM) Solution. This system gives JEA a powerful platform for all ITIL processes. Service Desk Manager is used by CIP Compliance, Bulk Power Systems, Project Design, Security Fire & Corporate Records Compliance, Business Analysis, and Technology Services for ticket tracking, reporting, Change Management, CIP Auditing, Availability, Reliability, and monthly SLA management metrics. The ServiceNow (SN) Discovery module has also replaced InformationTechnology/ Asset Management ITAM database. This change order request is for \$184,460.64 in additional funds through the end of the original term on 08/29/2024. JEA has experienced organic growth from JEA growing and requiring more licenses over the previous and final year of the contract which accounts for \$11,316.24 in higher than expected O&M renewal cost. The additional \$173,144.40 is new capital being requested for JEA now expanding the ServiceNow platform to include Strategic Portfolio Management (SPM) module. This includes ITSM Pro (Upgrade from ITSM Standard) & Increase ITSM ITIL User Licenses and Strategic Portfolio Management Professional. The Strategic Project module provides robust project portfolio management capabilities, allowing TS to prioritize, track, and manage JEA projects effectively. It offers features like project prioritization, resource allocation, budgeting, and forecasting, enabling better strategic decision-making. The cost remains under the competitive rates of the NASPO contract.											
4	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A	N/A
DEFERRED											
5	Ratification/Single Source	FY23 Derrick Digger Purchase	McElroy	Global Rental Company, Inc.	Capital	\$467,540.00	NA	\$467,540.00	NA	One-time purchase, Equipment has been delivered.	N
For additional information contact: Eddie Bayouth This Single Source/Ratification is for the purchase of two (2) 47' Derrick Diggers for FY23 JEA's fleet capital requirements for replacement for the Electric department. Global Rental Company, Inc. contacted JEA Fleet with immediate availability of these two (2) trucks based on requests from JEA to explore shortened lead-time aerial equipment. JEA previously moved in the direction of buying 50' derrick diggers to support the business because of heavier materials. However, 50' derrick diggers are custom trucks and currently have a lead time of 67-70 months at the time of order. In April of this year, JEA purchased a similar derrick digger that Fleet had been renting for the past three (3) years. The listed price of the three year old truck was \$180,772.00. The cost of each of these new derrick diggers is \$233,770.00. The difference between the budgeted amount and the actual cost is driven mainly by the fact that these are stock units, regular cab chassis vs extended cab, and the derrick is 47' instead of 50'. These trucks will be upfitted by Altec to meet the JEA specifications. In light of the fact that the vehicles allow JEA to receive assets several model years earlier than alternative custom truck designs, it allows JEA to retire aging assets and rental units instead of incurring unplanned costs. It should be noted JEA will buy custom longer lead-time assets as well, but is able to find a strong mix of stock and custom units that balance business needs in many ways. This is a full ratification as order was placed prior to awards committee approval to guarantee the availability of the trucks for JEA.											

Award #	Type of Award	Solicitation # & Short Description/Title	VP	Awardee	Funding Source	Award Amount	Original Award Amount	New Not-to-Exceed	Amendments	Term	JSEB Participation (Y/N) If Y, then list company name(s) (% , \$ - awarded)
6	Ratification/Piggyback	FY23 Vacuum Truck Purchase	McElroy	Environmental Products Group, Inc.	Capital	\$325,595.55	NA	\$325,595.55	NA	One-time purchase. Equipment has been delivered.	N
	Piggyback Agency: Sourcewell Contract # 101221-VTR 2100C-3 with Vactor Manufacturing Contract Term: Start Date 11/30/2020, Five (5) Years w/ One (1) - 1 Yr. Renewal For additional information contact: Eddie Bayouth This Piggyback/Ratification is for the purchase of a Vactor Impact Vacuum truck for FY23 JEA's fleet capital requirements for replacement for the Water department. In late May of this year, Environmental Products Group, Inc. (EPG) contacted JEA Fleet and informed them of the immediate availability of a stock unit Vactor Impact Vacuum Truck. In order to ensure that JEA could get the vehicle, an order was placed with EPG. JEA Fleet had placed an order for three (3) vacuum truck in February of 2023 with an expected delivery date of March 2024. Because of the immediate availability of this truck, JEA Fleet will be able to bridge the gap and avoid lengthy repairs on the older trucks, eliminating the need to rent a unit until the other three (3) trucks arrive in March of 2024. Since this is a stock unit, it does not have all of the options in the JEA specifications, so the price is lower than price quoted in January. JEA deems the price justifiable since it is comparable with the price paid earlier in the year for the custom units. This is a full ratification and the unit has already been received.										
7	Contract Increase/ Ratification	1410464046 ITN JEA Aerial Duty Vehicle Procurement	McElroy	Altec Industries	Capital	\$7,789,186.31	\$2,854,202.00	\$10,643,388.31	NA	One-time purchase, Expected Delivery 06/30/2029 for Custom Units and 06/30/2024 for Stock Units	N
	Original Award: 02/03/2022 For additional information contact: Eddie Bayouth The majority of the contract increase amount for this award, \$7,670,240.00, consists of the purchase of nineteen (19) custom bucket trucks and derrick diggers, six (6) of which will have an early scheduled delivery. The other thirteen (13) trucks have an average lead time of between 58-70 months. Because of the long lead times, and the many uncertainties associated with such lead times, Altec's pricing is the anticipated cost once they are built. Their current estimated prices for FY28 are currently between 35% and 80% higher than the prices JEA paid for this equipment in FY2021. Based on projected replacements in FY28 - FY29 and in order to secure manufacturing slots to meet Fleet's capital requirements for aerial equipment, orders must be placed now. The Ratification amount of \$1,507,284.00 is for the six (6) 55' bucket trucks already ordered and mentioned above. These trucks were in the custom production queue at Altec's manufacturing facility in the process of becoming material handling trucks when the original customer cancelled the order. Altec notified JEA that the trucks could easily be converted to bucket trucks if JEA elected to purchase them. In order to secure their availability, JEA issued a BPA to Altec in June. The trucks will be available by 06/30/2024, well in advance of the current 58-70 month lead time for custom orders. The second and much smaller portion of the contract increase, \$118,946.31, is for the upfitting of three (3) Altec 47' stock derrick diggers purchased from Global Rental Company, Altec's rental unit division. Two (2) of the trucks were in the ratification above and the third was a rental unit purchased in April of this year. In order to ensure consistency in the upfits to meet JEA's technical specifications and for warranty purposes, JEA has elected to have the outfitting completed by Altec, the equipment manufacturer.										
8	Contract Increase	040-19 Greenland Water Reclamation Facility (WRF) Pipelines: Water, Reclaimed Water and Sanitary Sewer Force Mains	Melendez	Garney Companies, Inc.	Capital	\$932,386.00	\$3,605,160.00	\$61,375,355.46	11/01/2019 - \$45,720.00 03/02/2020 - \$110,579.00 04/22/2020 - \$40,441.00 09/28/2020 - \$112,973.53 11/16/2020 - \$10,500.00 04/08/2021 - \$21,039.60 09/02/2021 - \$476,782.00 12/09/2021 - \$6,156,627.77 02/17/2022 - \$43,376,077.17 11/17/2022 - \$3,635,894.97 02/09/2023 - \$2,851,174.42	Project Completion (Expected: April 2024)	N/A
	Last Awarded: 02/09/2023 For additional information contact: Dan Kruck The scope of work for this contract includes design, pre-construction services and construction of water, reclaimed water and sanitary sewer forcemains. These lines will convey water to and from the new Greenland WRF to the rest of the JEA water and wastewater system. JEA planning identified an urgent need for a booster pump station to redirect flow from the Blacks Ford WRF to the Mandarin WRF until the Greenland WRF is completed. The proposed booster pump station is within this contract project area, and by having this vendor build the station JEA will avoid serious flow issues and construction coordination and delay issues. This increase includes the design of the booster pump station and the development of the guaranteed maximum price (GMP). After a GMP is negotiated and agreed upon, another contract increase will be brought before the Awards Committee. The proposal was compared to recent projects and deemed reasonable.

Certification of Single Source or Emergency Procurement

Please use this form to certify a Single Source or Emergency Procurement complies with the requirements of the JEA Procurement Code. The JEA Procurement Code defines a Single Source and Emergency Procurement as follows:

3-112 Single Source

A Contract may be awarded for Supplies or Services as a Single Source when, pursuant to the Operational Procedures, the Chief Procurement Officer determines that:

- (a) there is only one justifiable source for the required Supplies or Services;
- (b) the Supplies or Services must be a certain type, brand, make or manufacturer due to the criticality of the item or compatibility within a JEA utility system, and such Supplies or Services may not be obtained from multiple sources such as distributors;
- (c) the Services are a follow-up of Services that may only be done efficiently and effectively by the Vendor that rendered the initial Services to JEA, provided the Procurement of the initial Services was competitive;
- (d) at the conclusion of a Pilot Project under Section 3-118 of this Code, the Procurement of Supplies or Services tested during the Pilot Project, provided the Vendor was competitively selected for the Pilot Project.

3-113 Emergency Procurements

In the event of an Emergency, the Chief Procurement Officer may make or authorize an Emergency Procurement, provided that Emergency Procurements shall be made with as much competition as practicable under the circumstances. A written Determination of the basis for the Emergency and for the selection of the particular Vendor shall be included in the Procurement file.

For purposes of this Section 3-113, an "Emergency" means any one of the following:

- (a) a reasonably unforeseen breakdown in machinery;
- (b) an interruption in the delivery of an essential governmental service or the development of a circumstance causing a threatened curtailment, diminution, or termination of an essential service;
- (c) the development of a dangerous condition causing an immediate danger to the public health, safety, or welfare or other substantial loss to JEA;
- (d) an immediate danger of loss of public or private property;
- (e) the opportunity to secure significant financial gain, to avoid delays to any Governmental Entity or avoid significant financial loss through immediate or timely action; or (f) a valid public emergency certified by the Chief Executive Officer.

Please provide the following information:

1. Vendor Name:

2. Description of Services or Supplies provided by Vendor:

Award #5 09/07/2023 Supporting Documentation

3. Certification:

I the undersigned certify that to the best of my knowledge, no JEA employee has, either directly or indirectly, a financial interest in this Single Source Emergency Procurement, and

I the undersigned certify that this procurement meets the requirements of a (choose one of the following):

_____ **Single Source Procurement.** Please state which subsection of Section 3-112 above applies to this Single Source Procurement: _____

OR

_____ **Emergency Procurement** - Please state which subsection of Section 3-113 above applies to this Emergency Procurement: _____

Signature of JEA Business Unit Manager

Date

Name of JEA Business Unit Manager

This certification shall be attached to the Purchase Order when it is routed for approval. A Single Source or Emergency Procurement shall be reported to the JEA Board in accordance with Section 1-110 of the JEA Procurement Code.

JANUARY 19, 2023

Jacksonville Electric Authority
2221 Buckman Street
Jacksonville, FL 32206

Attention: Freddy Gonzalez Vargas, PE, PMP

Re: Biosolids Transportation & Disposal

Dear Mr. Gonzalez,

Synagro South, LLC (Synagro) is pleased to offer the following proposal for the removal, transportation, and disposal of dewatered biosolids cake from the Jacksonville Electric Authority (JEA) Buckman Water Reclamation Facility. Synagro has been in business for over 30 years and is the largest municipal biosolids management company in the country with over 700 municipal customers in 48 states. This includes over 28 contracts in the State of Florida. We provide various residuals management services to water and wastewater treatment plants and have extensive equipment and personnel resources to perform JEA's needs for Biosolids Hauling and Disposal/Beneficial Reuse Services.

Synagro will provide aluminum bodied end dump trailers and tractor with leakproof tarps, capable of hauling 25 tons of dewatered biosolids cake. Synagro will deliver dump trailers to a designated location at the WRF where JEA will load with your loading equipment. Full trailers will be weighed on site at truck scale, then transported to the disposal facility, completely emptied and trailer brought back to the WRF for immediate loading. Synagro anticipates dedicating 5 tractors and 10 trailers in the rotation to JEA for process flow of the biosolids, until the stockpile is completely removed (**approximately 7 days**). Then sufficient trailers will be provided to JEA to continuously haul away the daily biosolids that are produced daily (5-10 trailer loads per day).

Pricing as follows:

Transportation and Disposal of Biosolids for Composting = \$123.17 / Wet Ton

Transportation and Disposal of Biosolids for Landfill = \$168 / Wet Ton

Award #5 09/07/2023 Supporting Documentation

Page 2

This approach is based on our experience from the many other similar projects Synagro has performed for municipalities throughout Florida.

Synagro will utilize the following facilities for FDEP approved disposal:
Compost USA Composting Facilities in Venus, FL and Sumterville, FL and the Republic Landfill in Valdosta, GA

Our proposal is delivered in good faith, and we are prepared to enter into a mutually acceptable agreement. Please note that rates listed in this proposal are good for 30 days from above date and will remain in place for the duration of the project.

We appreciate the opportunity to provide this proposal and look forward to continuing to provide JEA with our services. We believe that our offer provides an unchallenged benefit that will keep the JEA assured of uninterrupted services. We would welcome the opportunity to have the JEA as another valued customer and partner in the State of Florida.

Should you have any questions regarding our proposal, or require any additional information please contact me at 813-495-1060 or cdebrunner@synagro.com.

Sincerely,

Curt DeBrunner

Approving Authority

Jenny G. McCollum,
Chief Purchasing Officer

JEA AND ST. JOHNS RIVER POWER PARK (SJRP)
PURCHASE ORDER TERMS AND CONDITIONS

1. The term .Company. shall mean the legal person, firm, corporation or any other entity, or business relationship with whom JEA has issued a Purchase Order to or has executed a Contract with.
2. Acceptance of this purchase order is limited to the terms on the face hereof and these Purchase Order Terms and Conditions. Additional or modified terms on Company.s form are objected to and rejected and shall be deemed a material alteration hereof.
3. TAX INSTRUCTIONS: Do not include sales and use tax. We remit tax directly to State of Florida. Registration for JEA 85-8012753002C-9; for SJRPP TPP-0142. Certificate of FET exempt # for JEA 59-2983007; for SJRPP 59-2351813.
4. JEA will issue payment to the Company for the amount requested in accordance with the payment terms listed herein following the date the invoice is received by JEA. JEA may reject an improper invoice within 10 calendar days after receipt. JEA will return the invoice to the Company stating the reasons for rejection. Upon receipt of an acceptable revised invoice, JEA will issue payment to the Company for the revised amount within the original payment terms or 10 days, whichever is latest.
5. JEA reserves the right to terminate all or part of this contract for its convenience. In such event, Company shall immediately stop all work and observe any instructions from JEA as to work in process. Company shall be paid an equitable adjustment for work already performed.
6. JEA may also terminate all or part of this contract for cause in the event of a default by Company. In such event, JEA shall not be liable to Company for any amounts, and Company shall be liable for, and shall hold JEA harmless from, any damages occasioned by the Company.s breach or default. If it should be determined that the JEA has improperly terminated this contract for default, such termination shall be deemed to be for JEA.s convenience.
7. Company warrants that all goods or services furnished hereunder shall be merchantable, and free from any defects in workmanship or material. If Company has been informed of the use of the products, Company also warrants that the items furnished hereunder are suited and appropriate for such use. Company shall indemnify and save the JEA harmless from any breach of this warranty, and no limitations on JEA.s remedy in Company.s documents shall operate to reduce this indemnification. Company shall extend all warranties it receives from its vendors to JEA. This warranty is in addition to all warranties contained under the law.
8. Company warrants that the prices quoted hereunder are the lowest prices inclusive of all applicable discounts for these or similar articles sold by the Company to other customers, and in the event of any price reduction between execution of the purchase order and delivery of the goods, JEA shall be entitled to such reduction.
9. JEA may delay delivery or acceptance of goods in the event of any unforeseen event. Company shall hold the goods pending JEA.s direction, and JEA shall be liable only for direct increased costs incurred by the Company by reason of JEA.s instructions.
10. JEA or representatives shall be allowed access to Company.s plants and to plants of Company.s suppliers to expedite production and shipment of goods. Company shall upon timely request furnish schedules and progress reports for JEA.s use in expediting.
11. JEA shall have the right to make changes in this order at any time and Company agrees to accept such changes. In the event such changes result in decreased or additional costs, JEA shall make an equitable adjustment in the purchase price provided any additional costs are itemized for JEA by Company.
12. Company agrees to hold JEA harmless from any patent or similar proceedings which are based on products sold by the Company hereunder. Company shall defend any such suits at its own expense, and JEA shall have the right to have such litigation monitored by its own counsel at the expense of Company.
13. For ten dollars (\$10.00) acknowledged to be included and paid for in the purchase price and other good and valuable considerations, the Company shall hold harmless, defend and indemnify JEA (and if applicable, Florida Power & Light Company (.FPL.), for purchases pertaining to the St. Johns River Power Park facility) against any claim, action, loss, damage, injury, liability, cost and expense of whatsoever kind or nature (including, but not by way of limitation, reasonable attorney.s fees and court costs) arising out of injury (whether mental or corporeal) to persons, including death, or damage to property, arising out of or incidental to the negligence, recklessness or intentional wrongful misconduct of Company and any person or entity used by Company in the performance of this Purchase Order or associated Contract. For purposes of this indemnification, the terms .JEA. and .FPL. shall include their governing boards, officers, employees, agents, successors, and assigns. The indemnification shall survive the term of the Purchase Order or associated Contract, for events that occurred during the term of this agreement. This indemnification shall be separate and apart from, and in addition to, any other indemnification provisions set forth elsewhere in this Purchase Order or associated Contract.
14. In the event that Company.s performance or contemplated performance of services hereunder, by Company.s employees or by persons under contract to Company, is to be done on JEA.s property, Company agrees that all such work shall be done as an independent contractor and that the persons doing such work shall not be considered employees of JEA. Company shall maintain all necessary insurance coverages, including public liability and Worker.s Compensation insurance. Company shall indemnify and save harmless and defend JEA from any and all claims of liabilities arising out of the work covered by this paragraph.
15. Payment for the goods delivered under this order shall not be deemed acceptance of such goods. Goods shall only be deemed accepted when they have actually been counted, inspected and tested by the JEA and found to be in conformance with this order. However, failure to inspect or test by JEA shall not relieve the Company of any responsibilities hereunder.
16. Time is of the essence on this contract. Company shall take all reasonable actions, including but not limited to use of overtime and shipment by expedited means, all at Company.s expense, to meet promised delivery.

Award #5 09/07/2023 Supporting Documentation

JEA

Standard Purchase Order 210777 Rev 1

17. This purchase order shall be governed by the laws of the State of Florida. All goods or services offered by Company pursuant to this contract shall comply with, satisfy and be subjected to all applicable codes, ordinances, rules and regulations of any governmental authority having jurisdiction, including the Florida Public Records law.
18. Material Safety Data Sheets (MSDS) must accompany shipments of any items containing toxic substances listed in Chapter 442, Florida Statutes.
19. This purchase order and any documents referred to on the face hereof and these Purchase Order Terms and Conditions constitute the entire agreement between the parties and can only be modified by change order. No part of this order may be assigned or subcontracted without the prior written approval of JEA. Any monies due JEA from Company can be set off from any monies due Company from JEA whether or not under this contract. JEA's failure to insist on any right shall not operate as a waiver of any other right.

Good Afternoon Pam,
I already talked with James and we have the funds available on Capital Project # 8007131
We are going to limit synagro to 6000 Tons to dispose. They can not exceed that ammount.

Jim,

Outstanding and comprehensive. I concur with your calculations, and thanks for all of your work on this project. We're all hoping it wraps up on schedule, as the hauling costs are definitely spiraling upward...seemingly every day.

Thanks,
Peter J. Blackley

Peter and Freddy,

After reviewing the cake production data with Peter (numerical calculation of the stockpiled cake), conducting a rough volumetric estimate (map measurements based on surface area of stockpiled cake onsite), and evaluating the data Peter forwarded me, I estimate that there is between 4,200 to 6,000 tons of cake on the ground.

The 6,000 tons is estimated assuming cake production is 1400 tons/week. The average of the daily production data for 7 days indicated that 1441 tons/week was being produced (7 dates in January used).

When I looked at the monthly spreadsheets for July through November 2022, there was an average of 1200 tons/week. Some of these months may be low production months though?

The lower end, 4,200 tons stockpiled estimate assumes 1318 tons/week of cake produced.

The Google map measurements of cake area and a 5 foot height of piles that Peter estimated would be about 2,200 tons in one area, then multiplying by two to account for cake in other areas = ~4,400 tons.

Peter – In my opinion we may want to assume at least 5,000 tons of cake stockpiled, and possibly 6,000 tons in order to be conservative. Do you concur with these numbers?

These are the cost numbers for three different scenarios:

Thanks Freddy.

To clarify, we do NOT have available funds for this. Jim is meeting Peter tomorrow to bring consensus to the overall estimate of the solids on site and will evaluate that proposed hauling cost against the funds available in the project. Following that clarification/calculation we will begin the steps to request the emergency PO to Synagro and Hull's.

Good morning Thaliah,

Jim Orr and Mike D are working on the funds. They have the money and they are working on strategies to find more if I need to do a Change order to the emergency.

My eyesight-price conservation tonnage estimate shall be 4875 Tons. To not disrupt any other strategies in funds, I think we need to issue the Emergency PO for the tons of 4875 but, the calculated estimate is 17K tons on the yard. That is an insane number (\$2M in waste haul)

I know that I am the oVeN

but I do **not** agree to issue that amount right now (is \$2M).

Michael

Let go with this route so we can get the material (not to exceed 4875 Tons) out and not mess up your bucket so hard. If we need more money, you can do another trend and tell to the financial team, this task is expensive, and that the true. If I need to go with Jay Stowe to explain the situation I will do.

Best regards

Good afternoon Michael,

I need to run this hauling cake by Emergency because:

- The Bid process will take 2 months and this cannot take any more. (John, Thaliah, Melinda, Joe, and Darrell agree with this situation)
- The drum will be ramping up and "on service" in April (realistic date)
- Look at the pictures below in this email, this is not good.
- The Landfill Operator for our primary outcome (Waste Management) will not want to open other cells and they are considering cutting our sludge (BDS).
- Lots of people want to see the plant (VPs, City Council members, etc. See email from Orrin Young) and this does not look good.
- Summer is around the corner and the smell complaints will start to ramp up in the community.
- If there is bad rain, the material will go to the ponds causing an environmental violation.
- The EPA already do a Wetside inspection and saw the situation. They (EPA) understand the situation but, the red flag is still there and they allow it to pass this incident because the Buckman Team worked together to mitigate the situation.

As you can see, this is a HUGE bad situation for JEA as a whole that we need to address before it gets worst.

To assist you more on the situation, I attached here an Excel file that can help you with your estimates (to compare with James and Peter's data) to have a better number.

In my opinion, the conclusion is Synagro will be cheaper and faster because all will be disposed of in FL and not in Georgia, and is a more environmentally friendly solution. Synagro can take **2,375 Tons** of material (485 more tons than Hulls). If your estimate is close to this number, the PO must be executed based on my excel number but, it is more, please provide your number to Procurement Team to work out the new number of Tonnage so we can issue the PO under The biosolids Capital Project 8007131 or Biosolid Capital.

The Not to exceed will be incorporated on the PO with your or my number of Tonnage after your assessment.

For next time, the plan will be:

1. Never underestimate anything and review the assessment as a whole (COI Landfill operation and disposal sites operation). This is the Biggest lesson learned from this situation (among others).
2. Hire 5 Vendors for this task (I will have 2 new drums but if I have a power or Mechanical outage or a serious flood all will be down and hauling needs to start)
3. and/or Build the Railing station to load up the material on a train (could be used for incoming sludge treatment from others, selling pellets (premium or regular) to others, disposal, RNG carts, etc). This railing option we need to see it because can deal with a situation like a power or Mechanical outage or serious flood. Additionally, this could be a potential way of revenue as well for JEA.

Freddy,

I spoke with Hai the other day about this. The current Trend Request has been approved and is in process, while that is being executed by Capital Budget Planning we will move forward with figuring out how to move forward with accelerating the removal of the solids on site.

Jim is going to be reviewing our current forecast for hauling and determine how much we can budget within the existing funds for the project. There are a few questions that we need to answer prior to moving forward:

1. We need to ensure that there is a 'not to exceed' amount in the contract, we can't award based on a rate (for either hauler).
 - a. Jim will be working with Pete next week to estimate the amount of solids currently on the site. This will vary if/when it rains as hauling is based on weight.
2. We need to verify the delivery points with the Environmental group prior to issuing a contract.
 - a. Following the estimate of loads/solids we can coordinate with Environmental (Ed) on the sites proposed by Synagro and Hull's.
3. Do we have a contract with Synagro or Hull's?
 - a. We'll need to work with Melinda/Thaliah to work on a contract to execute the work with Synagro/Hull's. Ideal would be to avoid an 'emergency' contract, if possible.

Let me know if you have any questions and we'll be working on this through the next few weeks.

Thanks,
Michael T. Dvoroznak, PE

Subject: Buckman Hauling funds

Good afternoon Mike,

I need your help to attend to this matter of hauling under the current Dryer Project 8007131.

Hai ask about what we are doing with it and we (you and me) do the best we can with the current contracts (H&H and BDS) but is not enough to cover this task due:

- The city landfill is complaining about the load that we provide every day because they can not manage it and hold too much from our contractor to meet our needs. This situation is getting worst because they do not want to open another cell due to operational costs to the city. In other words, there is not much help from them either if we pay Waste management, they can not do it by the long period of paperwork and permits needs.
- The other venues like composting and land application are too far from our site and delay the work or are not available so easily to the current vendor (BDS and H&H. Merrill is very compromised on West Palm Beach) to meet our disposal rates.
- Last but not least, in one of the emails attached you can see, the response from WM that fully compromise this situation.
- Lots of people want to see the plant (VPs, City Council members, etc. See email from Orrin Young) and this does not look good. Summer is around the corner and the smell complaints will start to ramp up.

These are the fact of this situation.

We (You and me) will plan for future shutdowns and how we can handle this much better (Railing station disposal, 2000 Ton Load movement, etc) but right now we need to address this situation.

I have here 2 quotes to address this problem (the Only two vendors).

My forecast is 1000 TON on the yard (Peter can provide a better number). If they (Synagro or Hulis Environmental) can move this load (in 7 days), we will meet our demand, and the plant operation will be stable.

Hai knows about these solutions (Because he asks for it) and he asks for your assistance on this matter with the funding. I can run the BID for you if you don't have time or resources with Thaliah and Pam.

Please let us know if you need something else from us but, we can do the rest of the coordination and effort to control that sludge situation, the only help that we need from you is the money [\(\\$\)](#).

Respectfully,

Freddy González Vargas, PE (PR & FL), PMP. [he/him]

Attention: Freddy Gonzalez Vargas, PE, PMP

Re: Biosolids Transportation & Disposal

Dear Mr. Gonzalez,

Synagro South, LLC (Synagro) is pleased to offer the following proposal for the removal, transportation, and disposal of dewatered biosolids cake from the Jacksonville Electric Authority (JEA) Buckman Water Reclamation Facility. Synagro has been in business for over 30 years and is the largest municipal biosolids management company in the country with over 700 municipal customers in 48 states. This includes over 28 contracts in the State of Florida. We provide various residuals management services to water and wastewater treatment plants and have extensive equipment and personnel resources to perform JEA's needs for Biosolids Hauling and Disposal/Beneficial Reuse Services.

Synagro will provide aluminum bodied end dump trailers and tractor with leakproof tarps, capable of hauling 25 tons of dewatered biosolids cake. Synagro will deliver dump trailers to a designated location at the WRF where JEA will load with your loading equipment. Full trailers will be weighed on site at truck scale, then transported to the disposal facility, completely emptied and trailer brought back to the WRF for immediate loading. Synagro anticipates dedicating 5 tractors and 10 trailers in the rotation to JEA for process flow of the biosolids, until the stockpile is completely removed (**approximately 7 days**). Then sufficient trailers will be provided to JEA to continuously haul away the daily biosolids that are produced daily (5-10 trailer loads per day).

Pricing as follows:

Transportation and Disposal of Biosolids for Composting = \$123.17 / Wet Ton

Transportation and Disposal of Biosolids for Landfill = \$168 / Wet Ton

Award #5 09/07/2023 Supporting Documentation

Page 2

This approach is based on our experience from the many other similar projects Synagro has performed for municipalities throughout Florida.

Synagro will utilize the following facilities for FDEP approved disposal:
Compost USA Composting Facilities in Venus, FL and Sumterville, FL and the Republic Landfill in Valdosta, GA

Our proposal is delivered in good faith, and we are prepared to enter into a mutually acceptable agreement. Please note that rates listed in this proposal are good for 30 days from above date and will remain in place for the duration of the project.

We appreciate the opportunity to provide this proposal and look forward to continuing to provide JEA with our services. We believe that our offer provides an unchallenged benefit that will keep the JEA assured of uninterrupted services. We would welcome the opportunity to have the JEA as another valued customer and partner in the State of Florida.

Should you have any questions regarding our proposal, or require any additional information please contact me at 813-495-1060 or cdebrunner@synagro.com.

Sincerely,

Curt DeBrunner

Evaluation Criteria

Form, Fit and Functionality to JEA's Requirements:

Please describe how your proposed solution meets and does not meet the technical specification submitted with this solicitation. Please also provide information regarding your proposed solution's functionality and operational aspects may and can provide value to JEA. Please fill out the below table for each item you are submitting a bid.

Warranty:

Please provide information regarding your proposed solution's warranty and how JEA would be supported for warranty work if your solution was awarded. If in excess of the specification, please provide.

Safety Features:

Please provide information regarding your proposed solution's safety features from basic aspects through unique functionality and the value it can provide to JEA. Please state those features that are outside the specification.

Ease of Doing Business:

Please provide information regarding your post award plan to perform to the agreement from communication plan, ease of communication, ease of delivery, etc. that is included in your proposal.

Proposed Delivery Date:

Please provide your anticipated delivery date along with how this date is created relative to major components and labor. Please also define any contingency plans to mitigate issues along with any obligations you have of JEA to meet your proposed plan.

Formal Bid and Award System

Award #4 March 2, 2023

Type of Award Request: CHANGE ORDER
Requestor Name: Clendening, William M.
Requestor Phone: (904) 665-4723
Project Title: Buckman Biosolids Conversion Projects
Index Number: 711-26
Project Location: JEA
Funds: Capital
Business Unit Estimate: \$1,200,000.00

Scope of Work:

The Buckman Water Reclamation Facility (WRF) treats an average of 30 million gallons per day (MGD) of wastewater and processes waste activated sludge and primary sludge produced from eight (8) other JEA treatment plants. This award will secure professional design and engineering services for multiple projects, including treatment and infrastructure improvements, at Buckman. The goal is to manage all proposed projects under one Consultant to provide clear oversight, better alignment of schedules and shorten project timelines. These capital improvements will result in Buckman having the necessary facilities and processes in place to produce biosolids to be utilized for beneficial purposes for the next 20+ years.

JEA IFB/RFP/State/City/GSA#: 127-17
Purchasing Agent: Kruck, Dan
Is this a Ratification?: NO

Previous Amendment

C&ES Consultants Inc. (Architectural Services) – 5.66%

This Amendment

Meskel & Associates Inc. (Geotechnical) – 1.6%

Background/Recommendations:

Originally approved by Awards Committee on 07/19/2018, in the amount of \$5,679,431.64 to Carollo Engineers Inc. Multiple amendments have been approved and are summarized on the table above. A copy of the previously approved award documents are attached for reference.

The design for the Raw Sludge Holding Tank (RSHT) at the 60% stage was based on reusing the existing RSHT. At the 60% design review meeting JEA decided it was necessary to demolish the existing tank and construct a new RSHT due to the age and condition of the existing RSHT. The new RSHT will be built at a different location at the plant due to potential settlement issues at the current location which cannot be studied until the demolition of the existing RSHT is complete. Relocating the new RSHT will provide Buckman WRF better options for biosolids treatment now and in the future while conserving space required for future facilities. JEA also decided to alter the current flow of sludge from Arlington East and the District II WRFs directly into the new RSHT, which will make the thickening process easier to operate. The thirteen design/re-design items listed below are included in this amendment request to incorporate these updates.

1. New 2.0 MG Raw Sludge Holding Tank (RSHT)
2. Odor control system for the new RSHT
3. Compressed gas mixing system for the new RSHT
4. New raw sludge screening
5. New sludge thickening system feed pumps and piping

Award #8 09/07/2023 Supporting Documentation

6. New electrical building to serve the new RSHT, sludge screening, thickener feed pumps, odor control system and RSHT mixing system
7. New District II Sludge on-site pump station and associated influent and discharge piping
8. Revisions to site/civil/stormwater and yard piping changes associated with the new RSHT
9. Dryer heat recovery system
10. Addition of 125 kW emergency generator for dewatering process
11. Revisions to the polymer system
12. Addition of nitrogen generators for using nitrogen gas for bulk pellet product transport
13. Demolition of the old chlorine building

The fee for this work was based on previously negotiated hourly rates. The scope and fee are attached for reference.

Request approval to award a change order to Carollo Engineers Inc. for additional design/engineering for the Buckman Biosolids Conversion Projects in the amount of \$1,086,707.24, for a new not-to-exceed amount of \$15,499,451.46, subject to the availability of lawfully appropriated funds.

This Contract Amendment

C&ES Consultants Inc (Architectural Services) – 5.66%

Background/Recommendations:

Originally approved by Awards Committee on 07/19/2018 in the amount of \$5,679,431.64 to Carollo Engineers Inc. On 04/21/2020, an administrative decrease was issued to reduce scope and change the contract to a lump sum format. On 08/24/2020, JEA issued an administrative increase for design changes requested by JEA including relocation of the new sludge thickening building and odor control, design of new concrete block building, re-design for compliance with updated resiliency plan, design of barrier concrete wall on south side of plant, and assistance with public outreach. On 10/21/2020, JEA issued an administrative increase to perform inspections of the structural systems of the existing sludge disposal building. On 04/22/2021, the Awards Committee approved a contract increase for a design of a new drum drying process. On 10/14/2021, an administrative increase was approved to study alternatives for struvite control and nitrogen removal. A copy of the previously approved award documents are attached for reference.

The biosolids processing facility is comprised of a large multi-story building constructed back in the early 1970s. The building houses all of the biosolids thickening, dewatering, thermal drying and ancillary support equipment including all electrical gear, instrumentation and controls. The building is composed of structural steel beams and column braced frames.

Due to its age and the corrosive environment, the building is in relatively poor condition. Carollo Engineers Inc. performed a preliminary structural, architectural, and electrical condition assessment of the building and its components. The condition assessment report provided a roadmap of high to low priority of items that will need to be either repaired or replaced to extend the life of the building while providing a safe working environment for the operations staff, support the equipment and related biosolids treatment processes for the next 7 to 10 years.

This contract amendment will provide the necessary design documents and services during construction for the rehabilitation of the biosolids processing facility. The construction portion of the work will be managed by JEA's Construction Manager at Risk (CMAR) Wharton-Smith. The fee for this work was based on previously negotiated hourly rates. The fee table is attached for reference.

*Note: GM Hill is no longer JSEB Certified

Background/Recommendations:

Originally approved by Awards Committee on 07/19/2018 in the amount of \$5,679,431.64 to Carollo Engineers Inc. A copy of the original award is attached as backup. On 04/21/2020, an administrative decrease was issued to reduce scope and change the contract to a lump sum format. On 08/24/2020, JEA issued an administrative increase for design changes requested by JEA including relocation of the new sludge thickening building and odor control, design of new concrete block building, re-design for compliance with updated resiliency plan, design of barrier concrete wall on south side of plant, and assistance with public outreach. On 10/21/2020, JEA issued an administrative increase to perform inspections of the structural systems of the existing sludge disposal building.

This award request is for an increase to the design contract of Carollo Engineers Inc. for the Buckman Biosolids Conversion Projects due to JEA's decision to update design of the future biosolids process at the Buckman WRF, as a result of canceling the Merchant Organics Recycling Facility (MORF) project. The design updates include the design of a new drum drying process for dewatered biosolids and the redesign of the existing thickening and dewatering buildings to house the complete processes under one roof. It should be noted that updating the drum drying process was one of the options in the original solicitation scope of work that the prospective engineering firms were evaluated on in the past performance sections. The fee for this work was based on previously negotiated hourly rates, and is approximately 23.6% lower than estimated. Carollo has gained knowledge of the biosolids process the Buckman WRF over the course of this contract, and is the reason for the fee coming in below estimate. The quote is attached as backup.

Request approval to award a contract amendment to Carollo Engineers Inc. for additional design/engineering for the Buckman Biosolids Conversion Projects in the amount of \$7,053,403.28, for a new not-to-exceed amount of \$13,113,332.92, subject to the availability of lawfully appropriated funds.

Award #10 July 19, 2018

Type of Award Request: PROPOSAL (RFP)
Request #: 3982
Requestor Name: Collier, Bradley W. – Mgr WW Plants & Pump Stations
Requestor Phone: (904) 665-6493
Project Title: Buckman Biosolids Conversion Projects
Project Number: 8004764/8004765/8004766
Project Location: JEA
Funds: Capital
Award Estimate: \$5,869,000.00

Scope of Work:

The Buckman Water Reclamation Facility (WRF) treats an average of 30 million gallons per day (MGD) of wastewater and processes waste activated sludge and primary sludge produced from eight (8) other JEA treatment plants. This award will secure professional design and engineering services for multiple projects, including treatment and infrastructure improvements, at Buckman. The goal is to manage all proposed projects under one Consultant to provide clear oversight, better alignment of schedules and shorten project timelines.

The following is a list of the projects:

1. Addition of a post aerobic digestion process for biosolids
2. Addition of a new biosolids processing facility
3. Addition of generator capacity/gas conditioning facility
4. Demolition of the existing biosolids process building
5. Expansion of the vacuum truck unloading facility
6. New electrical and instrumentation (E&I) building
7. New operations and maintenance (O&M) building
8. New pump maintenance building
9. Addition of raw sludge tank and improvements to existing tank
10. Addition of fiber communication

These capital improvements will result in Buckman having the necessary facilities and processes in place to produce biosolids to be utilized for beneficial purposes for the next 20+ years.

Background/Recommendations:

Advertised on 08/18/2017. Six (6) companies attended the pre-proposal meeting held on 08/24/2017. At Proposal opening on 09/19/2017, JEA received three (3) Proposals. The public evaluation meeting was held on 01/31/2018, and JEA deemed Carollo Engineers, Inc. most qualified to perform the work. A copy of the evaluation matrix and negotiated schedule fees are attached as backup.

Negotiations with Carollo Engineers Inc. were successfully completed. The proposed engineering fee of \$5,679,431.64 is 3.2% lower than estimated and deemed reasonable. Compared to estimated construction costs of \$45,801,868.06, the proposed design fee is 12.4% of construction.

127-17 - Request approval to award a contract to Carollo Engineers, Inc. for design and services during construction of the Buckman Biosolids Conversion project in the amount of \$5,679,431.64, subject to the availability of lawfully appropriated funds.
