<b>TOTAL</b>										

**NOTE FOR CAPACITY FEES - [www.jea.com/capacityfeecalculator](http://www.jea.com/capacityfeecalculator)**

**1 Capacity fees are calculated based on actual Average Daily Flow (GPD). Fees charged are tariff minimum or calculated value, whichever is greater.**

**2 A Growth Capacity Fee is applicable, if service address does not have an existing potable water/sewer service connected.**

**\*\* Email [SpecialEstimates@jea.com](mailto:SpecialEstimates@jea.com) with Availability # for tap costs. Sewer tap fee is \$20 (inspection fee) if contractor installed a force main connection.**

A \$25.00 Re-Trip fee will be assessed when installation requires more than one visit due to site conditions. The fee will appear on the JEA billing statement.

The City of Jacksonville Building Inspection Division has required the installation of backflow preventers on all commercial fire sprinkler service lines, irrigation lines and potable water lines. Commercial assemblies must be tested every year.

**It is the responsibility of the customer to ensure the consumer side is connected to the meter.**
