DEFINE THE ROOT PROBLEM:
The problem is not being community-owned; The problem is being government with government constraints in a competitive market.

NOT GOVERNMENT

Government Ownership

Conversion of JEA to organization which is owned and run jointly by its customers as members, who share the profits or benefits (Clay Electric Coop)
Conversion of JEA to a corporation and an offering of equity shares to the public in a new stock issuance
Conversion of JEA to a corporation and a placement of equity shares with private sector investors (Pension funds, infrastructure funds, etc.)
Conversion of JEA to a corporation and a tech focused company (Amazon, Google, SoftBank, etc.) purchases controlling interest in JEA
Conversion of JEA to a corporation and a vertically integrated O&G focused company (Royal Dutch Shell, etc.) purchases controlling interest in JEA
Conversion of JEA to a corporation and a utility company (NextEra, Emera, Duke, etc.) purchases controlling interest in JEA

SPECIFICS OF OUTCOME WILL BE DETERMINED BY CHOSEN SCENARIO

Remaining JEA of past with limited opportunities to create value and implement constrained traditional response

SCENARIO 2
