

Welcome to the JEA Awards Meeting

You have been joined to the meeting with your **audio muted** by default.

We will unmute your lines during the public comment time and provide opportunity for you to speak.

During the meeting, interested persons can also email **Lynn Rix** at **rixlw@jea.com** to submit public comments to be read during the meeting regarding any matter on the agenda for consideration. Public comments by e-mail must be received no later than 9:00 a.m. to be read during the public comment portion of the meeting.

Please contact **Lynn Rix** by telephone at **(904) 665-8621** or by email at **rixlw@jea.com** if you experience any technical difficulties during the meeting.

Below is a summary of the meeting controls you will see at the bottom of your screen.

AWARDS COMMITTEE AGENDA

DATE: Thursday, November 19, 2020

TIME: 10:00 A.M.

PLACE: JEA, Customer Center, Bid Office, 1st Floor, 21 West Church Street, Jacksonville, FL 32202
OR
WebEx/Teleconference
WebEx Meeting Number (access code): 160 199 4252
WebEx Password: pxP6CqUSt63

Public Comments:

Awards:

1. Approval of the minutes from the last meeting (11/05/2020).
2. Request approval for a change order for Network Protectors for JEA Inventory Stock in the amount of \$481,033.00 for a new not-to-exceed total of \$1,602,418.00, subject to the availability of lawfully appropriated funds.
3. Request approval to award a contract amendment increase to Gate Fleet Services for Fuel Supply, Fuel Cards, & Related Services in the amount of \$2,246,568.11, for a new total not-to-exceed amount of \$6,756,541.22, subject to the availability of lawfully appropriated funds.
4. Request approval to award a three and a half (3.5) month contract renewal to CLEAResult Consulting, LLC for Solar Battery Customer Rebate Program in the amount of \$330,101.40, for a not-to-exceed amount of \$1,210,101.40, subject to the availability of lawfully appropriated funds.
5. Request approval to award a sole source award to CBRE, Inc. for Owner's Representative Services for the proposed JEA Hardened Facility for a not-to-exceed amount of \$303,978.00, subject to the availability of lawfully appropriated funds. The duration of the assignment should be through project completion.
6. 080-20 – Request approval to award a contract to Kudzue 3 Trucking, Inc. for Southside Service Center (SSSC) Asphalt Paving Improvements in the amount of \$447,583.62, subject to the availability of lawfully appropriated funds.
7. Request approval to award a contract amendment to Garney Companies, Inc. for CMAR Services for the Bartram/US 1 and Cecil Field Water Main projects in the amount of \$3,967,259.00 for a new not-to-exceed amount of \$13,524,620.73, subject to the availability of lawfully appropriated funds.
8. Request approval for payment to Nassau County for the William Burgess Water Main Extension project engineering services in the amount of \$133,345.00, subject to the execution of the MOU and the availability of lawfully appropriated funds.

9. 093-20 - Request approval to award a contract to Henkels & McCoy Inc for construction services for circuit 915 in the amount of \$1,540,457.58, subject to the availability of lawfully appropriated funds.
10. Request approval to award a contract to Solid State Controls LLC, DBA Ametek Solidstate Controls for the supply of four UPS systems for BBGS in the amount of \$313,252.00, subject to the availability of lawfully appropriated funds.
11. Request approval to award a change order to Oracle, Inc. for Oracle CAMS Unifier project related staffing changes, additional interfaces, and Oracle managed services in the amount of \$189,510.00, for a new not-to-exceed amount of \$1,354,713.00, subject to the availability of lawfully appropriated funds.
12. Request approval to award a one (1) year proprietary award to Oracle America Inc. for maintenance and support services for Oracle E-Business Suite (EBS), Oracle Databases and Middleware in the amount of \$2,895,506.84, subject to the availability of lawfully appropriated funds.
13. **DEFERRED** - 084-20– Request approval to award a contract to Insituform Technologies, LLC for construction services for Cured-In-Place Pipe (CIPP) Unit Price Construction projects in the amount of \$1,500,000.00, subject to the availability of lawfully appropriated funds..
14. Request approval for an emergency change order to the Mayo Clinic Florida for COVID-19 Return to Work Testing in the amount of \$86,464.00, subject to the availability of lawfully appropriated funds.
15. Request approval for a sole source award to Beaches Energy Services in the amount of \$235,000.00, Clay Electric Cooperative Inc. in the amount of \$16,000.00, Florida Power & Light Co. in the amount of \$672,546.00 and St. Johns County Utility Department in the amount of \$355,000.00 for electric utility services, for a not-to-exceed total of \$1,278,546.00, subject to the availability of lawfully appropriated funds.

Informational Items: N/A

Open Discussion: N/A

Public Notice: N/A

General Business: N/A

SPECIAL NOTES: Copies of the above items are available in JEA Procurement, if needed for review. If a person decides to appeal any decision made by the Awards Committee, with respect to any matter considered at this meeting, that person will need a record of the proceedings, and, for such purpose, needs to ensure that a verbatim record of the proceedings is made, which record includes the evidence and testimony upon which the appeal is to be based. If you have a disability that requires reasonable accommodations to participate in the above meeting, please call 665-8625 by 8:30 a.m. the day before the meeting and we will provide reasonable assistance for you.

JEA AWARDS COMMITTEE

NOVEMBER 5, 2020 MEETING MINUTES

The JEA procurement Awards Committee met on November 5, 2020, in person with a WebEx option

WebEx Meeting Number (access code): 160 199 4252

WebEx Password: pxP6CqUSt63

Members in attendance were Jenny McCollum as Chairperson, Laure Whitmer as Budget Representative, Lawsikia Hodges as Office of General Counsel Representative; with Steve Tuten, Joe Orfano, Stephen Datz, Wayne Young, and Alan McElroy as voting Committee Members.

Chair McCollum called the meeting to order at 10:01 a.m., introduced the Awards Committee Members, and confirmed that there was a quorum of the Committee membership present.

Public Comments:

Chair McCollum recognized the public comment speaking period and opened the meeting floor to public comments. No public comments were provided by email, phone or videoconference.

Awards:

Chair McCollum verbally presented the Committee Members the proposed October 29, 2020 minutes contained in the board packet.

MOTION: Alan McElroy made a motion to approve the October 29, 2020 minutes (Award Item 1). The motion was seconded by Wayne Young and approved unanimously by the Awards Committee (5-0).

The Committee Members reviewed and discussed the following Awards Items 3-8:

2. **DEFERRED** - Request approval to award a three and a half (3.5) month contract renewal to CLEAResult Consulting, LLC. for Solar Batter Customer Rebate Program in the amount of \$330,101.40, for a not-to-exceed amount of \$1,210,101.40, subject to the availability of lawfully appropriated funds.

3. Request approval to award a change order and one (1) year renewal to AT&T for Telephony, Network, Internet & Telecommunications Services in the amount of \$986,209.63, for a new not-to-exceed amount of \$4,867,826.92 subject to the availability of lawfully appropriated funds.

MOTION: Alan McElroy made a motion to approve Award Item 3 as presented in the board packet. The motion was seconded by Stephen Datz and approved unanimously by the Awards Committee (5-0).

4. Request approval of purchase from Jacksonville University in the amount of \$95,000.00 and OLT II, Inc. in the amount of \$150,000.00 for a not-to-exceed amount of \$245,000.00 for the subject property - Real Estate Purchase, subject to the availability of lawfully appropriated funds.

MOTION: Stephen Datz made a motion to approve Award Item 4 as presented in the board packet. The motion was seconded by Steve Tuten and approved unanimously by the Awards Committee (5-0).

5. Request approval to award a Contract Increase to The Davey Tree Expert, for construction services for Time and Material vegetation management in the amount of \$1,600,000.00 for a new not-to-exceed amount of \$2,892,782.55, subject to the availability of lawfully appropriated funds.

MOTION: Alan McElroy made a motion to approve Award Item 5 as presented in the board packet. The motion was seconded by Wayne Young and approved unanimously by the Awards Committee (5-0).

6. Request approval to award Petticoat-Schmitt Civil Contractors, Inc. a contract for construction services for the Pages Dairy Rd. - Felmor Rd. to Chester Ave. – Transmission Water Main project in the amount of \$2,421,911.00, subject to the availability of lawfully appropriated funds.

MOTION: Joe Orfano made a motion to approve Award Item 6 as presented in the board packet. The motion was seconded by Steve Tuten and approved unanimously by the Awards Committee (5-0).

7. Request approval to award England-Thims & Miller Inc a contract for construction engineering and inspection services for the Pages Dairy Rd. - Felmor Rd. to Chester Ave. – Transmission Water Main project in the amount of \$507,050.28, subject to the availability of lawfully appropriated funds.

MOTION: Wayne Young made a motion to approve Award Item 7 as presented in the board packet. The motion was seconded by Alan McElroy and approved unanimously by the Awards Committee (5-0).

8. Request approval to award a contract to the developer, E-Town Development, Inc., in the amount of \$1,681,203.00 for construction by John Woody, Inc., of the Apex Trail Extension utilities project subject to the availability of lawfully appropriated funds.

MOTION: Stephen Datz made a motion to approve Award Item 8 as presented in the board packet. The motion was seconded by Steve Tuten and approved unanimously by the Awards Committee (5-0).

9. **DEFERRED** - Request approval to award a contract amendment to Garney Companies, Inc. for CMAR Services for the Bartram/US 1 and Cecil Field Water Main projects in the amount of \$3,967,259.00 for a new not-to-exceed amount of \$13,524,620.73, subject to the availability of lawfully appropriated funds.

Informational Item:

No informational items were presented to the Awards Committee.

Ratifications:

No ratifications were presented to the Awards Committee for consideration.

Public Comments:

No additional public comment speaking period was taken.

Adjournment:

Chair McCollum adjourned the meeting at 10:36 a.m.

NOTE: These minutes provide a brief summary only of the Awards Committee meeting. For additional detail regarding the content of these minutes or discussions during the meeting, please review the meeting recording. The recording of this meeting as well as other relevant documents can be found at the link below: https://www.jea.com/About/Procurement/Awards_Meeting_Agendas_and_Minutes/

Formal Bid and Award System

Award #2 November 19, 2020

Type of Award Request: CHANGE ORDER
Request #: 29
Requestor Name: Keeler, Jessica
Requestor Phone: (904) 665-6403
Project Title: Network Protectors for JEA Inventory Stock
Project Number: Multiple
Project Location: JEA
Funds: Inventory Blanket
Award Estimate: \$481,033.00

Scope of Work:

The purpose of this Agreement is to provide Network Protectors for JEA Inventory stock, which are special self-contained air breaker or switching units that have a full complement of current, potential and control transformers, as well as relay functionality. The primary purpose of the Network Protectors is to enable the paralleling of two or more primary feeders on the same low voltage bus.

JEA IFB/RFP/State/City/GSA#: 98454
Purchasing Agent: Roddy, Colin Patrick
Is this a Ratification?: No

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
COOPER POWER SYSTEMS, LLC	Richard Delizza	richarddd@electricsalesinc.com	1319 Lincoln Ave, Waukesha, WI 53186	954-279-2015	\$481,033.00

Amount of Original Award: \$1,121,385.00
Date of Original Award: 02/06/2020
Change Order Amount: \$481,033.00
New Not-To-Exceed-Amount: \$1,602,418.00
Length of Contract/PO Term: Five (5) Years
Begin Date (mm/dd/yyyy): 02/06/2020
End Date (mm/dd/yyyy): 02/05/2025
Renewal Options: No Renewals
JSEB Requirement: N/A – No JSEB Available

Background/Recommendations:

Originally bid and approved by the Awards Committee on 02/06/2020 to Eaton Corporation in the amount of \$1,121,385.00 as a Standards purchase. The original award item is attached for reference. A contract assignment was processed on 07/30/20 from Eaton Corporation to Cooper Power Systems, LLC, which is a wholly owned subsidiary of Eaton. The contract assignment is also attached for reference.

This request is to add two (2) additional network protectors to the contract agreement, which will be used in tandem with submersible network transformers. The differences between the new submersible network protectors and the previous “dust proof” network protectors are primarily driven by their application. In areas prone to flooding, a submersible protector must be built such that it remains operational even if the vault fills with water. To accomplish this, Cooper Power Systems utilizes more robust materials and sealing mechanisms as described below.

- The thickness of the steel doubles
- The seals on the case are machined, so they will accept higher pressures
- Utilizes round gaskets in place of a standard flat gasket
- The entire protector is assembled and subjected to a pressure decay test to insure high performance

Based on these factors, this request is for a change order to add the additional items to the contract and additional funding in the amount of \$481,033.00, to cover the min/max inventory requirements for the remaining term of the contract.

Request approval for a change order for Network Protectors for JEA Inventory Stock in the amount of \$481,033.00, for a new not-to-exceed total of \$1,602,418.00, subject to the availability of lawfully appropriated funds.

Manager: Pearson, Kenny – Procurement Category Manager

Director: McCollum, Jenny – Director, Procurement Services

VP: McElroy, Alan – Interim Chief Supply Chain Officer

Award #3 February 6, 2020

Type of Award Request: STANDARD
Request #: 6763
Requestor Name: Keeler, Jessica
Requestor Phone: (904) 665-6403
Project Title: Network Protectors for JEA Inventory Stock
Project Number: Various
Project Location: JEA
Funds: Inventory Blanket Agreement
Budget Estimate: N/A

Scope of Work:

Eaton was standardized through the underground standard committee in order to provide Network Protectors for JEA Inventory stock. The Invitation to Negotiate (ITN) that was released in order to solicit pricing for four (4) of these Network Protectors which are special self-contained air breaker or switching units that have a full complement of current, potential and control transformers, as well as relay functionality. The primary purpose of these items is to enable the paralleling of two or more primary feeders on the same low voltage bus.

Since 2016, JEA has only spent \$334K for three out of the four respective item ID's included in this change out program. One item ID has not been purchased to date. We currently have 4 total units in stock with an Inventory value of \$171K.

- Customer Value – Ensures JEA can continue to efficiently and effectively operate the energy network grid.
- Community Impact Value – Minimize network outages particularly through natural disasters.

JEA IFB/RFP/State/City/GSA#: 98454
Purchasing Agent: Roddy, Colin
Is this a ratification?: NO

If yes, explain:

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
EATON CORPORATION	Alec Weiss	alecxweiss@eaton.com	1520 Emerald Road, Greenwood, SC 29646	864-941-3161	\$1,121,385.00

Amount for entire term of Contract/PO: \$1,121,385.00
Award Amount for remainder of this FY: \$1,121,385.00
Length of Contract/PO Term: Five (5) Years
Begin Date (mm/dd/yyyy): 02/06/2020
End Date (mm/dd/yyyy): 02/05/2025
JSEB Requirement: N/A - Standard

Background/Recommendations:

JEA is procuring Network Protectors for inventory in an effort to improve network reliability. Network Protectors are special self-contained air breaker or switching units with the primary purpose to enable the paralleling of two or more primary feeders on the same low voltage bus. Currently there are only two (2) network protector manufacturers available, Richards (1960's design) and Eaton (2000's design).

Westinghouse and GE no longer manufacture network protectors and there are no Cooper's currently on the system.

The network protectors at JEA are old/outdated and requires substantial maintenance. In fact, some of the protectors on the system were installed back in the 1960's. Meetings were held with both Eaton (Feb 20, 2019) and Richards (April 11, 2019) in order to review changes/improvements to each network protector over the years. The Richards is based on very old technology, while the Eaton has some new features, specifically regarding safety/arc flash mitigation. JEA installed one of the first CM52's manufactured in 2000 as part of a pilot project. This network protector has operated flawlessly for the past 19 years with no issues. Eaton has made numerous enhancements/improvements since and provide the additional following benefits which were the main contributing factors of standardizing on the Eaton CM52 product for network protector applications:

- Indicating Diagnostic Module – Provides NWP health via SCADA. It helps support maintenance and catch issues before they become bigger issues.
- Eaton Magnum power circuit breaker – provides a close and latch rating, highest ratings in the industry, same breaker for 216V or 480V, total clear with ARMS <2cycles. Compact design, weighs only 175 lbs. for a 3pole unit. Can be stocked and used for change outs vs changing out entire units like older models.
- ARMS – this is a true proven life-saving feature. Uses an energy harvesting analog trip circuit, no micro-processing time, activates in sub cycle time and clears <2cycles. Cannot be used with other models, due to speed and ARMS is activated through the IDM module.
- Remote Racking – a true visible break is provided, the breaker can be racked out via a remote operation (SCADA, RAD, Pendant) with the door CLOSED. It is a four position breaker (racked-in, racked-out and test, racked-out and disconnected, racked-out on rails).
- Modularity – simple design, fuse section, breaker section, and relay cabinet section. Relay drawers and breakers can be stocked.

The only approved JEA project requirements were for FY20 projects which represented 27 units. The Underground group has identified a number of network submersible protectors that need to be replaced throughout our system over the coming years. There are 107 units identified to be potentially replaced over the next 3 – 5 years and an additional 137 units in the 5-7 year range, depending on funding that will be determined at a later date.

It should be noted, the pricing is much higher with an average cost increase of 68.84%. However JEA has not made any purchases in over a year and were not of the Eaton brand, which as described above is a far superior product.

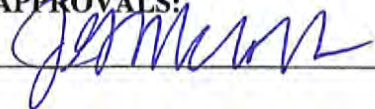

Realizing this type of item was being standardized, there was a need to leverage product demand for the upcoming FY's. In order to do this, JEA and Eaton have agreed to the below cumulative order discount model where there will be a sliding scale in JEA's favor if we order more network protectors as we are predicted to do so.

Years 2021- 2025	
Cumulative Ordered	Additional Percentage Discount
1-30	0.00%
31-40	2.00%
41-50	2.00%
50+	4.00%

Request approval to award a contract to Eaton Corporation for the supply of Network Protectors for JEA Inventory Stock in the amount of \$1,121,385.00, subject to the availability of lawfully appropriated funds.

The purpose of this Agreement is to provide Network Protectors for JEA Inventory stock, which are special self-contained air breaker or switching units that have a full complement of current, potential and control transformers, as well as relay functionality. The primary purpose of these items is to enable the paralleling of two or more primary feeders on the same low voltage bus. Our current inventory balance for the items included in this agreement is \$246,665.77, with current lead-time of over fourteen weeks depending upon the item.

COOPER POWER SYSTEMS, LLC	Richard Delizza	richarddd@electricsalesinc.com	1319 Lincoln Ave, Waukesha, WI 53186	954-279-2015	\$0.00

Amount of Original Award: \$1,121,385.00
Date of Original Award: 02/06/2020
Assignment Adjustment Amount: \$0.00
New Not-To-Exceed Amount: \$1,121,385.00
Length of Contract/PO Term: Five (5) Years
Begin Date (mm/dd/yyyy): 02/06/2020
End Date (mm/dd/yyyy): 02/05/2025
Renewal Options: No Renewals
JSEB Requirement: N/A - Standard

Background/Recommendation:

Originally bid and approved by the Awards Committee on 02/06/2020 to Eaton Corporation in the amount of \$1,121,385.00. The original award item is attached for reference.

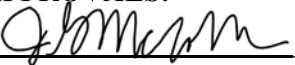

While JEA was in the process of obtaining the authorized Eaton Corporation representative to sign the contract agreement, Eaton Corporation requested that the contract should have been awarded to Cooper Power Systems,

LLC rather than Eaton Corporation. Cooper Power Systems, LLC is a wholly owned subsidiary of Eaton and is who the contract should be executed with.

Request approval to reassign the previously awarded Eaton Corporation JEA Network Protectors for JEA Inventory Stock Award to Cooper Power Systems, LLC, subject to the availability of lawfully appropriated funds.

Manager: Pearson, Kenny – Procurement Category Manager

End Date (mm/dd/yyyy): 07/31/2022
Renewal Options: Yes – One (1) – 1 Yr. Renewal
JSEB Requirement: N/A – No JSEBs available

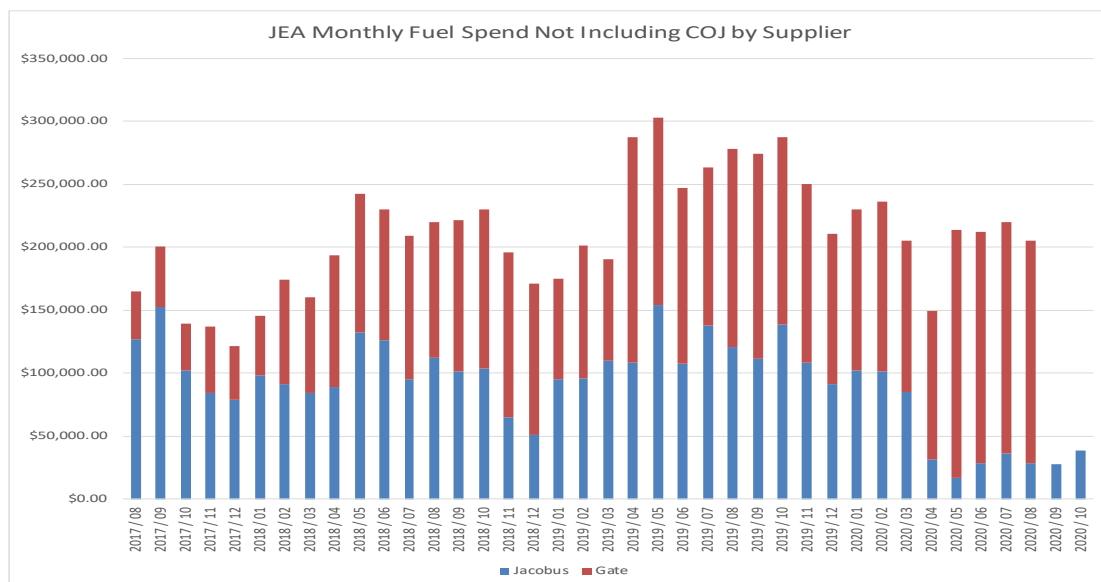

Background/Recommendations:

Originally bid and approved by the Awards Committee on 07/20/2017 to Gate Fleet Services, in the amount of \$1,440,801.63 as a result of a collaborative Joint Agency bid process for Fuel Supply, Fuel Cards, & Related Services. The agencies that participated in this joint effort were JEA, City of Jacksonville (COJ), and the Duval County Public School System. A contract increase was processed on 03/07/2019 in the amount of \$3,069,171.48. The original award and contract increase are attached as reference.

This request is to add additional funding in the amount of \$2,246,568.11 to cover the forecasted requirements for the rest of the contract term, which runs until 07/31/2022. This amount was calculated using fuel demand estimates from the Fleet Operations Group and was derived from actual realized spend under the current contract. To date, the average realized spend per day under the agreement is \$3,718.51 dollars.

The need for this second contract increase primarily has been driven by the recent market changes relating to COVID the effect is has on JEA's operations. After COVID began to impact JEA, the JEA field employee base began dispatching from other locations other than the service centers of past practice. This means that many of the crews who previously were fueled by the overnight wet fueling supplier, Jacobus, are now instead fueling themselves at the Gate stations. Jacobus is unable to fit safely into the substations for fueling, and consequently unable to fuel trucks overnight. Since May of this year, the monthly contract spend for Gate is up 59.50% compared to the average. On the other hand, Jacobus's monthly contract spend is down 61.85% from its normal average.

The chart below provides the combined monthly fuel spend for both Gate and Jacobus as reference. The data excludes fuel procured from the City of Jacksonville (COJ). It should be noted that JEA continues a slow transition away from the COJ fuel pumps and towards Gate, so this also contributes to a rise each year to the Gate agreement. There are few invoices that are awaiting to be processed for Gate pending this contract increase, which is not factored into the numbers below, but are in line with the percentage increases realized recently.

Request approval to award a contract amendment to increase the Gate Fleet Services for Fuel Supply, Fuel Cards, & Related Services contract in the amount of \$2,246,568.11, for a new total not-to-exceed amount of \$6,756,541.22, subject to the availability of lawfully appropriated funds.

Formal Bid and Award System

Award #8

July 20, 2017

Type of Award Request: INVITATION TO NEGOTIATE (ITN)
Request #: 1877
Requestor Name: Brunell, Baley L. - Contract Specialist
Requestor Phone: (904) 665-6992
Project Title: Joint Agency Fuel Supply Products, Fuel Cards, and Related Services
Project Location: JEA
Funds: O&M
Award Estimate: \$1,924,000.00
Scope of Work:

The purpose of this Invitation to negotiate (the "ITN") is to evaluate and select a vendor that can provide fuel supply products, fuel cards, and related services at the best value to the participating agencies (the "Work" or "Services"). The participating agencies to this ITN are JEA, City of Jacksonville (COJ), Duval County Public School System (DCPS) (the "Participating Agencies"); JEA shall serve as the lead agency for this Procurement. Once a Company is chosen for the Services, each agency will establish a requirements Contract with rack plus pricing on applicable fuels.

Once a Contract is established by each agency, the Company must communicate directly with the individual agency concerning the placement of orders, issuance of purchase orders, contractual disputes, invoicing, and payment, credit applications, or lease documents. A Participating Agency shall not be held liable for any costs, damages, expenses, fees, liabilities, etc. incurred by another participating agency's Contract with the Company.

Fuel consumption, is an estimated yearly forecast for all three (3) participating agencies combined, which is compiled based on historical data. Each Participating Agency reserves the right to change (increase and decrease) the number of gallons and types of fueling throughout the Contract Term. The Contract Term will be up to five (5) years, with an optional one (1) year renewal.

JEA IFB/RFP/State/City/GSA#: 088-17
Purchasing Agent: Woyak, Nathan
Is this a ratification?: NO

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
GATE FLEET SERVICES	Emilie Fletcher	efletcher@gatefleet.com	PO BOX 40505, Jacksonville FL 32203-0505	(904) 732-2336	\$1,440,801.63

Amount for entire term of Contract/PO: \$1,440,801.63
Award Amount for remainder of this FY: \$83,008.55
Length of Contract/PO Term: Five (5) years with w/One (1) – 1 Yr. Renewal

Begin Date (mm/dd/yyyy): 08/01/2017
End Date (mm/dd/yyyy): 07/31/2022
Renewal Options: YES - One (1) – 1 Yr. Renewal
JSEB Requirement: N/A- No JSEB available

BIDDERS:

Name	Amount	Rank
GATE FLEET SERVICES	\$61,978,024.50	1
FUELMAN	\$63,598,725.00	2
MANSFIELD OIL COMPANY	\$63,861,675.00	3

Background/Recommendations:

Advertised 04/25/2017. The first pre-response meeting was held on 5/1/2017 and included four (4) companies. A second pre-response meeting was held on 5/11/2017 after discovering several companies had not received the original solicitation communication. As a result, two (2) additional companies attended. At Response opening on 5/20/2017, JEA received three (3) Responses. The Participating Agencies agreed to move forward with submitted pricing and not request Best and Final Offers (BAFOs) because of immediate savings realized across the board. Gate was determined to be the lowest responsible bidder at a total of \$61,978,024.50 for five (5) years for all three agencies (JEA, COJ, DCPS). The Participating Agencies will award separate contracts based off of the particular agency usage. The Gate Bid Form is attached as back-up. Note, the forms were adjusted to remove tax that was included when doing the bid pricing analysis.

JEA consumes approximately two (2) million gallons of diesel and unleaded fuel annually. The combined fueling requirements of the three (3) agencies is approximately seven (7) million gallons of fuel per year. Currently, JEA receives fuel from three (3) separate sources:

- City of Jacksonville (COJ) fueling stations (bulk fuel)
- Gate Fleet Services Card program
- Afterhours wet hose fueling (QuickFuel contract)

The total award amount of \$1,440,801.63 is for JEA Gate retail card fuel consumption spend only over the five (5) year term. The current JEA markup for both gasoline and diesel using Gate fleet cards is \$0.0100 per gallon over OPIS compared to the new rate of \$0.00583 per gallon over OPIS, or a \$0.0417 lower markup. JEA estimates using Gate fleet cards for 201,720 gallons of gasoline and 375,825 gallons of diesel over the next five (5) years. The total gallons of 577,545 with a \$0.0417 lower markup equates to an estimated savings of \$24,083.50 over the term of the contract. Backup documentation is attached.

Bulk fuel and afterhours fueling is not included in this award total. The bulk fuel is purchased through COJ fueling stations and will be handled through a different agreement. The afterhours fueling is currently being performed by QuickFuel and may be added as a change order upon expiration of the current contract in November 2018. The current JEA markup for afterhours fueling is \$0.55 per gallon over OPIS compared to the new rate of \$0.49100 per gallon below OPIS, or a \$0.05900 lower markup.

088-17 - Request approval to award a contract to Gate Fleet Services for fuel card services in the amount of \$1,440,801.63, subject to lawfully appropriate funds.

Formal Bid and Award System

Award #5 March 7, 2019

Type of Award Request: CONTRACT INCREASE
Request #: 6537
Requestor Name: Brunell, Baley – Manager Fleet Services & Business Operations
Requestor Phone: (904) 665-6992
Project Title: Joint Agency Fuel Supply, Fuel Cards, & Related Services
Project Number: A0800
Project Location: JEA
Funds: O&M
Budget Estimate: See Attached

Scope of Work:

This agreement provides fuel supply products, fuel cards, and related services to JEA, City of Jacksonville (COJ), and the Davul County Public School System (the "Participating Agencies").

This contract increase impacts the following two (2) JEA Measures of Value:

- Customer Value – This renewal ensures JEA can continue to efficiently and effectively operate the electric network grid
- Community Impact Value – This renewal will minimize network outages by ensuring a consistent flow of materials from strategic supply chain partners

JEA IFB/RFP/State/City/GSA#: 088-17
Purchasing Agent: Roddy, Colin P.

Is this a ratification?: YES – To incorporate existing Standard PO's into the contract value for tracking purposes which were previously not linked to the CPA in Oracle

RECOMMENDED AWARDEE(S):

Name	Vendor Contact	Email	Address	Phone	Amount
GATE FLEET SERVICES	Emilie Fletcher	efletcher@gatefleet.com	PO Box 40505, Jacksonville, FL 32203	904-732-2336	\$3,069,171.48

Amount of Original Award: \$1,440,801.63
Date of Original Award: 07/20/2017
Contract Increase Amount: \$3,069,171.48
New Not-To-Exceed Amount: \$4,509,973.11
Length of Contract/PO Term: Five (5) Years w/One (1) - 1 Yr. Renewal
Begin Date (mm/dd/yyyy): 08/01/2017
End Date (mm/dd/yyyy): 07/31/2022
Renewal Options: Yes – One (1) – 1 Yr. Renewal

JSEB Requirement:

N/A – No JSEBs available

Background/Recommendations:

Originally bid and approved by the Awards Committee on 07/20/2017 to Gate Fleet Services in the amount of \$1,440,801.63 as a result of a collaborative Joint Agency bid process for Fuel Supply, Fuel Cards, & Related Services featuring JEA, City of Jacksonville (COJ), and the Duval County Public School System (the "Participating Agencies"). The original award item is attached for reference.

This request is to add funding in the amount of \$3,069,171.48 to cover the forecasted requirements for the rest of the contract term, which runs until 07/31/2022. This amount was calculated using demand estimates from the Fleet Operations Group and incorporating variable pricing based on eia.gov fuel pricing forecasts. The need for this contract increase are:

- JEA has transitioned most fueling efforts away from the COJ pumps to the Gate fuel cards as the total cost is less and the logistics and reliability of Gate is exponentially better. JEA employees now have the convenience of utilizing Gate's extensive network of fuel centers located across the JEA network instead of the few COJ locations.
- JEA's internal fuel truck drivers once fueled their tankers up at the COJ pump. This practice has been discontinued as the practice was taking in excess of one hour longer than filling at the alternative Gate location allowing for a more efficient use of time, while still utilizing the contracted rate for bulk fuel.
- An increase in the fleet size of 140 units (10%) means more vehicles utilizing this service than when the Gate contract was originally awarded.

Because of these reasons, JEA has moved some fuel purchasing away from COJ to Gate and continues to only see a slight increase in commodity spend despite the increase in fuel consumption as shown below. The breakout for the rest of the contract term by FY is attached as backup.

Request approval to award a contract increase to Gate Fleet Services for Fuel Supply, Fuel Cards, & Related Services in the amount of \$3,069,171.48, for a new total not-to-exceed amount of \$4,509,973.11, subject to the availability of lawfully appropriated funds.

Formal Bid and Award System

Award #4 November 19, 2020

Type of Award Request: RENEWAL
Request #: 6915
Requestor Name: Gutierrez, Edgar A. – Manager Customer Solutions
Requestor Phone: (904) 665-5668
Project Title: Solar Battery Customer Rebates
Project Number: Cost Center 10001, 8002503
Project Location: JEA
Funds: O&M
Budget Estimate: \$500,000.00 (Lines BL03 and BL08)

Scope of Work:

On October of 2017, JEA approved an incentive to support customers who install their own solar energy generation system. The program with CLEAResult took effect on April 1, 2018. Customers who purchase a battery that is charged by their own renewable energy generation system will receive a \$4,000 rebate from JEA. By storing energy during daylight, and using that energy when the solar system is not generating, the customer can avoid buying energy from JEA and lower its electric bill. Eventually JEA expects to receive up to 250 rebate requests per year. JEA reserves the option to implement other potential utility rebate programs under this contract in the future.

JEA IFB/RFP/State/City/GSA#: RFP 93158
Purchasing Agent: Dambrose, Nickolas C.
Is this a Ratification?: NO

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Amount
CLEAResult CONSULTING, LLC	Zachery Elbert	Zachary.elbert@clearresult.com	4301 Westbank Dr Bldg A Suite 250, Austin TX 78746	\$330,101.40

Amount of Original Award: \$300,000.00
Date of Original Award: 01/24/2018
Change Order Amount: \$330,101.40

List of Previous Change Orders / Amendments:

171780	\$80,000.00	08/17/2020

Length of Contract / PO Term: One (1) Year w/Three (3) One (1) Year Renewals
New Not-To-Exceed Amount: \$1,210,101.40
Begin Date (mm/dd/yyyy): 01/24/2018
End Date (mm/dd/yyyy): 05/12/2021

Renewal Options:
JSEB Requirement:

None remaining
JSEBs were reviewed and no opportunities available.

Background/Recommendations:

Advertised on 12/2017. This contract was competitively bid informally under Request for Proposal (RFP) 93158. The first one (1) year renewal was completed from 01/24/2019 to 01/23/2020 with no additional funds added. The second one (1) year renewal was completed from 01/24/2020 to 01/23/2021 and \$500,000.00 in additional funds added which exceeded the formal procurement and was approved by Awards Committee on 11/21/2019 for additional customer rebate funding. An administrative increase of \$80,000.00 was completed on 08/17/2020 to further increase rebate funding. A copy of the previous award is attached a backup.

This request is for additional funding of \$330,190.00 for a three and a half (3.5) month contract renewal only from 01/24/2021 to 05/12/2021 to maintain the existing scope of the Solar Battery Customer Rebate Program, and to co-terminate with the separate energy efficiency contract on 05/12/2021 which is also currently managed by CLEAResult. JEA is currently exploring strategic options for the future of this program including but not limited to combining this scope with JEA's energy efficiency products contract for the purpose of a new competitive bid. This program may also be combined with JEA's off-road electrification program for the purpose of a new competitive bid. This renewal enables JEA to explore these strategic options while maintaining the current program.

Since the JEA's Solar Battery Incentive Program took effect on April 1, 2018, there have been a total of 134 customers that have participated in the incentive program. Adoption of the program continues to grow with an increase in battery vendors from two (2) in FY18 to twelve (12) in FY19 to nineteen (19) in current FY20. Battery brands have also grown. If the growth trend is maintained, JEA anticipates over 115 additional solar battery applications through 05/12/2021. The table below shows the results over the previous years with an estimate for upcoming participation.

Fiscal Year	2018	2019	2020	Oct-May 2021 (Estimated)
Number of Solar Battery Projects/Customers Participating	18	37	79	115
Number of Solar Battery Vendors Participating	2	12	19	22
Solar Capacity (MW)	0.13	0.34	0.75	1.05
Battery Capacity (MWh)	0.17	0.51	1.34	2.05

Pricing rates for this renewal shall not change from the prior agreement. This contract contains funding for program fees, administrative fees, and customer rebates and is detailed in the table below:

Battery Incentive Program Costs	Avg. Cost Per Unit	Number of Units	Total Cost
Battery Customer Incentive Rebates	\$4,000.00	78	\$312,000.00
Monthly CLEAResult Programming Fee	\$3,000.00	5	\$15,000.00
Processing CLEAResult Administrative Cost	\$24.30	78	\$1,895.40
Reserve for Misc. Costs			\$1,206.00
Total			\$330,101.40

Request approval to award a three and a half (3.5) month contract renewal to CLEAResult Consulting, LLC for Solar Battery Customer Rebate Program in the amount of \$330,101.40, for a not-to-exceed amount of \$1,210,101.40, subject to the availability of lawfully appropriated funds.

Formal Bid and Award System

Award #2 November 21, 2019

Type of Award Request: RENEWAL

Request #: 6712

Requestor Name: Gutierrez, Edgar A. - Manager Customer Solutions

Requestor Phone: (904) 665-5668

Project Title: CLEAResult Solar Battery Customer Rebates

Project Number: Cost Center 10001, 8002503

Project Location: JEA

Funds: O&M

Budget Estimate: 500,000.00 (lines 617 and 645)

Scope of Work:

On October of 2017, JEA approved an incentive to support customers who install their own solar energy generation system. The program with CLEAResult took effect on April 1, 2018. Customers who purchase a battery that is charged by their own renewable energy generation system will receive a \$4,000 rebate from JEA. By storing energy during daylight, and using that energy when the solar system is not generating, the customer can avoid buying energy from JEA and lower its electric bill. JEA expects slow initial adoption with few applications for the battery rebate and then increase participation as battery prices drop. Eventually, JEA expects to receive up to 250 rebate requests per year. JEA reserves the option to implement other potential utility rebate programs under this contract in the future.

This project will positively affect the following JEA Measures of Value:

- **Customer Value:** Battery/solar customers get a lower cost for their solar/battery system, and benefit from recurring electric bill reduction, backup electricity, and personal gratification for contributing to the environment. Nonparticipant customers receive satisfaction that JEA is supporting solar energy initiatives.
- **Community Value:** This program moves energy storage to the mainstream, lowers the overall cost of battery technology for everyone, supports the local solar/battery industry, and increases community support for renewable generation.
- **Environmental Value:** Encourage development of sustainable energy projects, reduce fossil fuel generation, and create a cleaner environment.
- **Financial Value:** The rebate program allows JEA to reduce the overall cost to the community by giving customers the opportunity to offset their own consumption with a battery as opposed to using the grid to store excess production, allocating JEA incentives where they are of the greatest benefit to the system.

JEA IFB/RFP/State/City/GSA#: RFP 93158

Purchasing Agent: Woyak, Nathan J.

Is this a Ratification?: NO

RECOMMENDED AWARD(S):

Name	Contact Name	Email	Address	Phone	Budget Amount
CLEAResult CONSULTING, INC.	Zachery Elbert	zachery.elbert@clearresult.com	4301 Westbank Dr Bldg A Suite 250, Austin TX 78746	(866) 847- 8237	\$500,000.00

Amount of Original Award: \$300,000.00

Date of Original Award:	01/24/2018
Change Order Amount:	\$500,000.00
New Not-To-Exceed Amount:	\$800,000.00
Length of Contract/PO Term:	One (1) Year w/ Three (3) One (1) Year Renewals
Begin Date (mm/dd/yyyy):	01/24/2018
End Date (mm/dd/yyyy):	01/23/2021
Renewal Options:	One (1) Year Renewal remaining
JSEB Requirement:	N/A

Background/Recommendations:

Advertised on 12/2017. This contract was competitively bid informally under Request for Proposal (RFP) 93158. At Response opening, 01/04/2018, JEA received two (2) Responses from CLEARResult and Nexant. CLEARResult was selected as the lowest responsive and responsible bidder. A copy of the Response Form is attached. This second, one (1) year renewal, now exceeds the formal procurement threshold of \$300,000.00 and requires Awards Committee approval. Note, CLEARResult is also JEA's implementation contractor since 2008 for other current JEA programs for Energy Efficient Products and JEA Electric Vehicles program separately contracted.

This request is for a second, one (1) year renewal, from 01/24/2020 to 01/23/2021 for the JEA Battery Incentive Program contract with CLEARResult. The existing contract has enough to cover program and administrative fees through the existing 01/24/20 expiration date, however, all of the funds for customer rebate incentives have now been used.

On October 2017, the JEA Board of Directors approved the JEA Battery Incentive Program that will provide up to \$1,000,000.00 worth of rebates per year on the purchase of battery storage systems. This program offers JEA customers an incentive to utilize solar technology to charge a household battery system. In January 2018, JEA selected CLEARResult to deliver the JEA Battery Incentive Program. The initial battery incentive program provided a one-time, thirty percent (30%) rebate on the purchase and installation cost of a household battery system, up to \$2,000.00 per household, with a program maximum of \$1,000,000.00 per year. Market research and response from local solar vendors revealed that the cost for a battery system was much higher than JEA initially estimated. As result, JEA's Senior Leadership gave their approval before program launch to increase the incentive amount to a \$4,000.00 flat rebate per battery system. Customer Solutions & Market Development (CSMD) will continue to perform annual market research, monitor battery storage adoptions and reanalyze the best rebate amount for promoting battery storage adoptions. As battery storage is a new technology, there are very limited forecast models for battery storage adoption nationally. In addition, the JEA Battery Incentive Program has been around for only 19 months, there is insufficient historical data to develop a sound forecast for adoption.

The JEA Battery Incentive Program took effect on April 1, 2018. Since then, and until the end of FY19, there have been a total of 55 customers that have participated in the incentive program. Adoption of the program is growing with an increase in battery vendors from two (2) in FY18 to twelve (12) currently. There has also been an increase in battery brands from one (1) in FY18, to six (6) currently. The previous two months (September and October 2019), 3 out of 10 solar applications included a battery. If the recent trend holds true, with an estimated 300 solar projects per year, JEA may see over one hundred (100) applications with a battery in FY20. The table below shows the results over the previous two (2) years FY18 and FY19 and a high end estimate for FY20:

Fiscal Year	FY18	FY19	FY20 Estimate
Number of Battery Projects/Customers Participating	18	37	115
Number of Battery Vendor Participating	2	12	16
Solar Capacity (MW)	0.13	0.34	0.98
Battery Capacity (MWh)	0.17	0.51	1.42

The cost of the program is increasing year over year due to usage, however the rates shown below have not changed:

Battery Incentive Program Costs		Avg. Cost per unit	No. of units	Total Cost
Battery Customer Incentive Rebate		\$4,000.00	115	\$460,000.00
Monthly CLEAResult Programming Fees		\$3,000.00	12	\$36,000.00
Processing CLEAResult Administrative Costs		\$24.30	115	\$2,794.50
Reserve for Misc. Costs		-	-	\$1,205.50
Total Award Cost:				\$500,000.00

Request approval for a one (1) year renewal to award CLEAResult Consulting, Inc. for JEA's Battery Incentive Program in the amount of \$500,000.00, for a new, not-to-exceed amount of \$800,000.00, subject to the availability of lawfully appropriated funds.

APPENDIX B - PROPOSAL FORM RFP 93158 BATTERY REBATE PROGRAM

PROPOSER INFORMATION:

COMPANY NAME: CLEARresult Consulting Inc.
BUSINESS ADDRESS: 4301 Westbank Drive, Building A, Suite 300
CITY, STATE, ZIP CODE: Austin, TX 78746
TELEPHONE: 512.327.9200
FAX: _____
NAME & EMAIL OF CONTACT: Jennifer Clarke, Director, CLEARresult BD@clearresult.com
WEBSITE: www.clearresult.com

PROPOSER MUST COMPLETE THE FOLLOWING INFORMATION AND RETURN THIS FORM VIA EMAIL TO ELAINE SELDERS AT SELDEL@JEA.COM.

QUOTATION OF RATES (60 Points)

Proposer shall complete this Form, and provide its rates to perform the Work for the first year of the Contract. The rates provided shall include all profit, taxes, benefits, travel, shipping and all other overhead items. Please note, the rate quoted by Proposer shall be firm prices, not estimates.

Please itemize costs by the following categories:

- One-time charge for the setup of the process.
\$ 8,500.00 _____
- Monthly management fee, if not included in setup charge.
\$ 3,000.00 _____
X 12 months = \$ 36,000.00 _____
- Processing fee per customer rebate paid and IRS 1099 form delivered.
\$ 24.30 _____
X 250 = \$ 6,075.00 _____
- Fee per customer service / satisfaction survey completed.
\$ 53.00 _____
X 120 = \$ 6,360.00 _____

Total Annual Bid Price (Sum of all four (4) item costs listed above) \$ 56,935.00 _____

ABILITY TO DESIGN AN APPROACH AND WORK PLAN TO MEET THE PROJECT REQUIREMENTS (40 Points)

Describe in your own format the Company's or team's approach to provide the services described in the Scope of Work. The description shall provide a comprehensive **battery rebate program** design approach and proposed work plan, and explain how the Company intends to manage the engagement.

The following shall be included in the proposal.

Describe your proposed approach for:

- Developing and implementing the JEA Battery Rebate payment process
- Customer Service / Satisfaction Survey
- QA / QC check and balances

Provide the total number of FTE's that will work on the program during implementation (post-development and initial delivery).

Please use your own format for this section.

X I have read and understood the Sunshine Law/Public Records clauses contained within this solicitation. I understand that in the absence of a redacted copy my proposal will be disclosed to the public "as-is".

Proposer's Certification

By submitting this Proposal, the Proposer certifies (1) that it has read and reviewed all of the documents pertaining to this RFP and agrees to abide by the terms and conditions set forth therein, (2) that the person signing below is an authorized representative of the Proposer, and (3) that the Proposer is legally authorized to do business and maintains an active status in the State of Florida. The Proposer certifies that its recent, current, and projected workload will not interfere with the Proposer's ability to work in a professional, diligent and timely manner.

The Proposer certifies, under penalty of perjury, that it holds all licenses, permits, certifications, insurances, bonds, and other credentials required by law, contract or practice to perform the Work. The Proposer also certifies that, upon the prospect of any change in the status of applicable licenses, permits, certifications, insurances, bonds or other credentials, the Proposer shall immediately notify JEA of status change.

Budget Estimate: N/A

Scope of Work:

This sole source request is for Owner's Representative Services for JEA Hardened Facility (HQ2) to Complement New JEA Headquarters (HQ).

JEA IFB/RFP/State/City/GSA#: N/A
Purchasing Agent: Selders, Elaine
Is this a ratification?: NO
If yes, explain: N/A

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
CBRE, INC.	Stewart Green	stewart.green@cbre.com	225 Water Street, Suite 110 Jacksonville FL 32202	(904) 634- 1200	\$303,978.00

Amount for entire term of Contract/PO: \$303,978.00
Award Amount for remainder of this FY: \$156,078.00
Length of Contract/PO Term: Project Completion
Begin Date (mm/dd/yyyy): 11/13/2020
End Date (mm/dd/yyyy): Project Completion
JSEB Requirement: N/A – Sole Source

Background/Recommendations:

JEA requires Owner's Representative Services for the planned JEA Hardened Facility (HQ2) to complement the new JEA headquarters (HQ). JEA engaged CBRE through a competitive solicitation in October 2017 to assist with project management of a new JEA headquarters. The process for the corporate headquarters was modified by JEA from the original approach in mid-2018 to include a competitive solicitation for building solutions. CBRE assisted JEA throughout the solicitation process and project planning continued under a modified approach including a build to suit lease solution for the HQ. Project planning and changes continued to May 2020 when the project scope was reduced and the JEA Board

approved the final scope and limits in June 2020. The final scope included separating out the Emergency Operations Center (EOC) and related support functions including personnel into a second hardened facility project, given the working name HQ2.

Much of the EOC and related scopes had been contemplated for the original HQ project. Given CBRE's continued involvement and working knowledge of the now split projects scopes, it is recommended to continue services with CBRE as Owner's Representative for the complementary HQ 2 project portion. The two projects and data related to scoping of each will provide for continuity and flow between the two projects. The requested service is an appropriate Sole Source Award because it is a follow up of services which may only be done efficiently and effectively by CBRE, who rendered the initial services to JEA by virtue of a contract which was competitively procured. The Scope of Work, Schedule of Fees and Sole Source Form are attached as Backup.

Supporting documentation includes a detailed scoping list of services and estimated hours and hourly rate from CBRE. CBRE has indicated that the hourly rate for this work be \$174 per hour. The rate represents an increase over the current rate for the HQ project of approximately 2.5% per year. CBRE's initial HQ contract was structured without an escalation clause and, as described, that work has extended beyond the original estimated completion of May 2020. CBRE also agreed to hold the original rate of \$162 per hour during a recent extension of the HQ contract through June of 2022. This request similarly does not anticipate an escalation clause for the work through project completion of HQ2.

Request approval to award a sole source award to CBRE, Inc. for Owner's Representative Services for the proposed JEA Hardened Facility for a not-to-exceed amount of \$303,978.00, subject to the availability of lawfully appropriated funds. The duration of the assignment should be through project completion.

Director: Kilgo, Nancy A. – Dir Government Affairs
Chief: McElroy, Alan D. – Interim Chief Supply Chain Officer

OWNER'S REPRESENTATIVE

HARDENED FACILITY, HQ2 - JACKSONVILLE, FL

For the Purpose of this scope, and pursuant to the original ITN, the project is defined as:

- a) JEA has a current need for over 200 employees in a hardened facility, with close proximity to HQ1 located in the CBD of Jacksonville, FL.
- b) Location is subject to JEA site selection option.
- c) These people will be relocated directly (no swing space) to the new facility.
- d) Project duration is 22 months.

Specific Duties. In providing the Services, CBRE shall have the following duties with respect to the Project in addition to those duties set forth in the Agreement:

1. Baseline Services (Occurring during all subsequent phases) Pre-Planning Stage

- a) Manage Budget, Document Cost and Forecast Indicated Outcome from Initial Pre-Planning Program budget to project completion.
- b) Manage Schedule, track current progress, new impacts and completions from Initial Pre-Planning Program schedule to project completion.
- c) Field, Manage and/or respond to client, consultant or other project influencer from and through emails, texts, phone calls and tracked deliverables, daily, for the project duration.
- d) Provide project guidance to client, in all aspects and phases, for project specific tasks.
- e) Track invoices, cost and financial impacts to property in monthly reporting.
- f) Evaluate project risk and risk register reporting on project progress in monthly reporting.
- g) Provide general standard reporting and presentation of project progress.

2. Pre-Planning Stage

- a) Begin - Provide Monthly Status Report to evaluate Budget, Schedule, Scope and Risk.
- b) Site Tour (New Site and Existing Site*) to provide feedback on potential project impacts.

* Existing Site not included in original response. Significant evaluation and investigative analysis of real estate, facilities or other existing considerations not included.

- c) Identify intended delivery systems. Likely Progressive Design Build.
- d) Review and advise on Purchase/Sale terms.
- e) Review existing Due Diligence Reports, Environmental, Utility Components, Entitlements and COJ Requirements. Organize an exhibit within consultant RFP's to define conditions of development.
- f) Assist Client in the development of clear Project goals for time, cost and scope of the achievement of the Project. In conjunction with Client, develop realistic milestones and a budget for total Project costs including construction, equipment, furniture and design fees.
- g) Facilitate JEA field walks of workspaces to focus on workplace options.
- h) Work with JEA to define Project Charter, Success Metrics and Project Implementation Plan.
- i) Assist JEA in determining proper reporting protocol, to include Digital "Dashboard" and Community exposure intent.
- j) Work with JEA to identify funding amounts, contingencies and intended budget delineation.
- k) Assist client in RFP documentation, qualify the professional firms, and conduct interviews, evaluations and recommendations for selection of Design-Build Team. A selection matrix summarizing the proposals will be assembled to identify qualifications, alternatives, and other criteria for selecting the successful bidder through a CCNA type delivery model including negotiating towards rates. Provide recommendations to award a bid submitted to Client for approval, which recommendation will be based upon pricing, experience on similar projects, personnel assigned to the Project, level of trust, and overall ability to perform the Project and any other criteria defined by JEA. Negotiate agreement(s) with Design Team entities within predefined parameters.

3. Planning, Approvals & Procurement Stage

- a) Onboard Design. Identify Civil, Architectural, Structural & MEP leads and insure tracking with DB Project Manager and general design milestones.
- b) Review terms with JEA counsel as required to finalize Design contract(s).
- c) Coordinate program and approval protocols with Design-Build. (JEA, COJ, DDRB fully and SJRWM only as defined further herein).
- d) Direct and coordinate applicable Design-Build Team, authorities, and service organizations related to the Project.

- e) Direct and coordinate the Design-Build Team throughout the Project in the preparation of the Project program and the design from schematic through working drawing stages. Review the design periodically and give direction as required to coordinate and achieve the Project goals.
- f) Develop Project time schedules for the design stage and coordinate the activities of the Architect and Client business unit representative, project manager and design team.
- g) Assist Design-Build Team in identifying long lead items and recommend the purchase and procurement of long lead time items to arrange for delivery of strategic materials in conformance with the Project schedule.
- h) Review Design deliverables for adherence to industry expectations in completeness at various design milestones (Concept, Schematics, Design Development, CD's).
- i) Coordinate Real Estate notices and approvals ONLY as they relate to design and construction (specific impacts to be provided by JEA).
- j) Continue validation of scope, budget and schedule.
- k) Obtain client approvals on changes to Project parameters.
- l) Confirm capital appropriation.
- m) Provide oversight of Approval processes with City of Jacksonville and DDRB. Only as they relate to the design and construction of the New Facility.
- n) Provide oversight for IT, AV, Security and Controls scopes (Low Voltage). Implement initial coordination meetings and deliverables for these scopes to hit major milestones and budget expectations. (Depending on JEA's ability to design towards more current deliveries AND their ability to manage their internal Low Voltage programs, additional hours may be required. CBRE will provide baseline guidance, schedule management, budget identification and initial direction in 2-3 meetings with combined Low Voltage Groups.)
- o) Provide early visibility on F, F & E packages and oversight on broad solution opportunities. (Design Team to perform F, F & E package RFP, performance specifications and review for program compliance).
- p) Allow team to take advantage of CBRE's strategic partners (Fusion) and determine ability to contribute in Program.
- q) Obtain JEA's current best practices and minimum specifications on facilities. Review and coordinate with Design Team and CMAR any opportunities to confirm, improve or modify such and engage solutions as directed by JEA.
- r) Aid JEA in identifying Business Transitions (Change Management) services and fold these consultants and/or strategy into the Project Implementation Plan.

4. Construction Procurement Stage

- a) Coordinate "front end" documents including General and Special Conditions, contract formats, outline specifications and special contractor supplements through Design-Build Team governance.
- b) Provide a construction time schedule for inclusion in the bid documents and develop for Client a budget for major activities, based upon the schedule, for use in preparing a forecast.

- c) Review terms with JEA counsel as required to finalize "Build" (from Design-Build) contract.
- d) Upon receipt of Client's approval, award such work.
- e) Coordinate with JEA initial, procurement and final contract terms for engaging under a Design-Build relationship.

5. General Management and Coordination

- a) Insure Design-Build Team and consultants coordinate from initial program, design development, and through working documents, as made possible by their onboarding, to design towards a predefined budget and schedule. Activity shall include review of long lead procurement, project logistics, constructability, alternative approaches, alternative providers, and all such scopes as required to accurately land on budget at each phase of the design and approval processes.
- b) Review the work performed by the Build Team, in conjunction with the Design Team, through to completion and confirm Design-Build Team review so that the materials furnished and the work performed are in accordance with the drawings, specifications and contract documents.
- c) Coordinate with the Build Team the implementation of construction information systems, Project time control schedules and resources analysis as they relate to materials, manpower and costs.
- d) Assist Design-Builder in monthly reporting requirements, revisions and recommendations.
- e) Provide construction review status updates and other reports for each Project on a monthly basis.
- f) As directed by JEA protocols track insurance coverages of various vendors as required.
- g) Management of a formal Real Estate analysis of sites, their marketability and future impact to operations is NOT included.

6. Management of Active Construction

- a) Establish with the Design-Build Team on-site organization and lines of authority in order to carry out Client's overall plans in all phases of the Project on a coordinated and efficient basis.
- b) As applicable, require Build Team to maintain an on-site record-keeping system which will be sufficient in detail to satisfy an audit by Client. Such records shall include, but shall not necessarily be limited to, daily logs, progress schedules, manpower breakdowns (daily by trade), financial reports, quantities, material list, shop drawings, and the like.
- c) Coordinate the obtaining of all legally required permits, licenses, and certificates (COJ & DDRB). Coordinate through the applicable Build Team aspects of the work with local municipal authorities, governmental agencies, and utility companies who may be involved in the Project (as defined earlier herein).
- d) Coordinate through the Build Team the work of all subcontractors until final completion and acceptance of the Project by Client. In the event that the interpretation of the

meaning and intent of the contract documents becomes necessary during construction, ascertain the architect's and Client's interpretation, make recommendations as appropriate, and transmit such information on Build Team.

- e) Attend job meetings when necessary, attended by the full Design-Build Team and Client's representative to discuss procedures, progress, issues, scheduling and open items.
- f) Coordinate through the Design-Build Team testing provided by others as required by the technical sections of the specifications, and as required by the building code.
- g) Coordinate the review with the Design Team, for compliance with the contract documents, of shop drawings, materials and other items submitted by the Build Team.
- h) Review and recommend approval, in accordance with Client's procedures, all applications for payments submitted through vendor(s) in accordance with established procedures.
- i) Receive and review change order requests from Design-Build Team or from Client. Review unit prices, time and material charges and similar items. Monitor and advise upon request for changes required by field conditions and progress of the work, and obtain approval from Client and the architect.
- j) Review Build Team scheduling system to expedite materials and equipment deliveries through the course of construction.
- k) Establish early Risk Register and provide for the monthly forecasting of cost and schedule as impacted by potential risks or client directives.

7. Close-Out and Move Coordination

- a) Coordinate through End-Run schedule.
- b) Review Client's established move criteria.
- c) Cause client to provide inventories and recommend and coordinate intended reuse, salvage and recycling of existing client F, F & E.
- d) Based upon the Client's move criteria, recommend professional Move Management consulting firms and coordinate engagement process.
- e) Conduct Move Vendor RFP and negotiate contract.
- f) Coordinate physical move vendor and furniture/equipment installation activities with the Construction Team, for installation and building access.
- g) Assist Client in conducting a thorough damage assessment review with Move Vendors, fixturing supplier and the Construction Team.
- h) Close-out Move Vendor and Furniture / Equipment Installation Contracts.
- i) Establish, through Design-Build Team, a rolling completion list to define ongoing items within the construction from first phases of construction through final completion.
- j) Establish appropriate, industry standard and client defined close-out protocol and coordinate with Design-Build team and other consultants and providers finalization of the same.
- k) Provide final Cost Reports.

8. Post Construction

- a) At the appropriate time, coordinate the preparation of punch lists indicating the items of work remaining to be accomplished, and require that these items are completed in an expeditious manner.
- b) Assemble all guarantees, warranties, etc., as required by the contract documents and forward them to Client.
- c) Receive from the Design-Build Team, check and forward to Client all releases of claims required prior to issuance of final certificate of completion and final payment to the Construction Team.
- d) Expedite Build Team preparation of “as-built” drawings of the entire Project in accordance with the terms of the specifications.
- e) After completion of Project, CBRE’s project manager will monitor, through Design Team, the expeditious follow-up and correction of all punch list items.

Additional Services. In conjunction with the Services, CBRE shall provide such other services as are reasonably requested by Client, subject to the Parties’ mutual agreement as to the scope of, and pricing for, such other services.

See attached SOV.

SOV Notes:

- a. Move consider direct move from existing to new. No swing space or other phased move processes figured herein.
- b. AHJ’s should be predictable approvals for the site chosen, however, we have not included an elongated permitting process or specific management of specific conditions not typically encountered with the CBD.
- c. NO FDEP or remediation management included herein.
- d. The work is for 22 months
- e. This will be a Design Build solution on HQ2
- f. We have not included the TI portion of the HQ2 contract
 - a. Much of this will happen organically in the program development phase of Shell/Core
 - b. We are prepared to help in that effort but a full TI scope is not discernable at this time
- g. JEA will onboard a Low Voltage consultant concurrently with the Design Builder
- h. Finally as with our original contract, CBRE’s effort is defined by my client’s requirements as much as it is standard scope activities. So, this can grow or shrink based on JEA’s requests and decisions. This value is still an hourly rate, NTE.

Certification of Sole Source

3-111 Sole Source Procurements

- (1) *Conditions for Use.* A Contract may be awarded for Supplies or Services as a Sole Source when, pursuant to the Operational Procedures, the Chief Procurement Officer or Designee determines that:
- (a) there is only one justifiable source for the required Supplies or Services; or
 - (b) a service is a follow-up of Services that may only be done efficiently and effectively by the Company that rendered the initial Services to JEA, provided the initial procurement was competitive.

COMMENTARY:

This method of procurement involves no competition and should be utilized only when justified and necessary to serve JEA needs. This Code contemplates that the chief purchasing officer promulgate operational procedures that establish standards applicable to procurement needs that may warrant award on a sole source basis.

Name of Contractor or Supplier

CBRE, INC.

Description of Services or Supplies

Owner's Representative Services for JEA Hardened Facility to Complement New JEA Headquarters (HQ). JEA engaged CBRE through a competitive solicitation in October 2017 to assist with project management of a new JEA headquarters. The process for the corporate headquarters was modified by JEA from the original approach in mid-2018 to include a competitive solicitation for building solutions. CBRE assisted JEA throughout the solicitation process and project planning continued under a modified approach including a build to suit lease solution for the HQ. Project planning and changes continued to May 2020 when the project scope was reduced and the JEA Board approved the final scope and limits in June 2020. The final scope included separating out the Emergency Operations Center (EOC) and related support functions including personnel into a second hardened facility project, given the working name HQ2.

Certification

I the undersigned certify that:

☐ there is only one justifiable source for the required supplies, services, construction or real estate; or
☒ this is a professional service which is a follow-up of services that may only be done efficiently and effectively by the firm that previously rendered the initial services to JEA

(Fill in with explanation)

Much of the EOC and related scopes had been contemplated for the original HQ project. Given CBRE's continual involvement and working knowledge of the now split projects scopes, it is recommended to continue services with CBRE as Owner's Representative for the complementary HQ 2 project portion. The two

projects and data related to scoping of each will provide for continuity and flow between the two projects.

Award #6 November 19, 2020

Type of Award Request: INVITATION TO BID (IFB)
Request #: 6866
Requestor Name: Breadon, William A. - Project Administrator Construction
Requestor Phone: (904) 665-4285
Project Title: Southside Service Center (SSSC) Asphalt Paving Improvements
Project Number: 8006795/207-38E
Project Location: JEA
Funds: Capital
Budget Estimate: \$780,000.00

Scope of Work:

The scope of work for this project includes removal and installation of asphalt pavement in phases two (2) and three (3) parking areas specified in Appendix C for Southside Service Center (SSSC) located at 2325 Emerson St, Jacksonville, Florida. The Bidder shall provide a Bid amount for phases two (2) and three (3) and an alternate Bid amount for Phase (1). JEA will have the option to award just phases two (2) and three (3) or to award all three (3) phases if it is deemed to be in JEA's best interest. The award will be made on the lowest bid provided for phases two (2) and three (3). Asphalt parking areas are to be striped to match existing pavement, applying temporary striping after paving and again applying final striping after thirty (30) days. Each phase needs to be done two (2) weeks apart to allow curing time due to limited parking.

CAP CONTRACTING	\$450,000.00	\$98,000.00	\$548,000.00

Background/Recommendations:

Advertised on 09/28/2020. Five (5) prime contractors attended the optional site visit meeting. At Bid opening on 10/27/2020, JEA received four (4) Bids. Kudzue 3 Trucking, Inc. is the lowest responsible Bidder. A copy of the Bid Form is attached as backup.

The base Bid amount of \$337,537.61 is approximately fifty-seven percent (57 %) lower than the budget estimate. The decision was made to include the alternate phase 1 bid amount in the amount of \$69,356.59 due to the base Bid coming under budget for a new total of \$406,894.20. This solicitation contained the option to add a ten percent (10%) Supplemental Work Allowance (SWA) in the amount of \$40,689.42 to be used if needed for scope changes for a not to exceed amount of \$447,583.62.

This paving project was split into five (5) phases. Upon award, we intend to complete phases 1, 2 and 3 under this contract. The additional phases 4 and 5 will be completed after building renovations are completed at Southside Service Center (SSSC) and will be bid out separately.

080-20 – Request approval to award a contract to Kudzue 3 Trucking, Inc. for Southside Service Center (SSSC) Asphalt Paving Improvements project in the amount of \$447,583.62, subject to the availability of lawfully appropriated funds.

Award #7 November 19, 2020

Type of Award Request: CONTRACT AMENDMENT

Requestor Name: Bides, Arthur R.

Requestor Phone: (904) 665-8515

Project Title: Construction Management-at-Risk (CMAR) Services for the Bartram/US 1 and Cecil Field Water Main Projects

Project Number: 8004924

Project Location: JEA

Funds: Capital

Budget Estimate: \$4,926,642.00 (Cecil Field GMP Estimate)

Scope of Work:

JEA requests Proposals from interested and qualified Proposers to provide CMAR services during design and construction of the Bartram/US1 and Cecil Field Water Main projects. The work includes installation of water main in two different service areas within JEA.

The initial contract scope of work will consist of pre-construction phase services including design and constructability reviews, construction phase sequencing, coordination, maintenance of traffic, and maintenance of utility operations pre-planning, alternatives evaluations, cost estimating and cost control (value engineering) services, project schedule development, and preparation and submission of an open-book Guaranteed Maximum Price (GMP) proposal for construction phase services.

The contract shall be amended to include construction phase services following negotiation of a mutually acceptable GMP. The contract may be amended to include construction phase services in multiple phases. During the construction phase, the CMAR shall serve as the single point of responsibility for construction of the work in strict accordance with the contract documents.

This Contract Amendment

Garmon Trucking (Trucking) - \$21,203.65
CSI Geo (Testing) - \$16,782.00
Total: \$37,985.65 (0.79% of GMP)

Background/Recommendations:

Originally approved by Awards Committee on 07/25/2019 in the amount of \$133,252.50 to Garney Companies, Inc., and increased by the Awards Committee on 02/20/2020 for the GMP for the Bartram/US1 portion of the work. A copy of the previous awards are attached as backup. An administrative increase was approved on 09/03/2020 to purchase the ductile iron pipe for the Cecil Field portion of the work to avoid price increases.

This award request is for a contract increase to the CMAR contract of Garney Companies, Inc. for the Bartram/US 1 and Cecil Field Water Main Projects. The design of the Cecil Field Water Main is underway and is at the 90% stage. JEA requested a GMP for the construction work for the Cecil Field Water Main project based on the 90% design documents.

Negotiations were successfully completed for the GMP. The negotiated price of \$3,967,259.00 is approximately 19.5% below JEA's estimate. JEA's estimate included the price of the required ductile iron pipe that was previously authorized via an administrative increase for \$836,450.88. Pricing for the ductile iron pipe would have increased by \$135,113.52 if JEA waited to include it in the final GMP. When accounting for the ductile iron pipe, the total construction price is 2.5% below the JEA estimate and deemed reasonable. A copy of the GMP quote is attached for reference.

Request approval to award a contract amendment to Garney Companies, Inc. for CMAR Services for the Bartram/US 1 and Cecil Field Water Main projects in the amount of \$3,967,259.00 for a new not-to-exceed amount of \$13,524,620.73, subject to the availability of lawfully appropriated funds.

**Formal Bid and Award System**

Award #4 July 25, 2019

Type of Award Request: PROPOSAL (RFP)
Request #: 6485
Requestor Name: Bides, Arthur R.
Requestor Phone: (904) 665-8515
Project Title: Construction Management at Risk (CMAR) Services for the Bartram/US1 and Cecil Field Water Main Project
Project Number: 8004912, 8004924
Project Location: JEA
Funds: Capital
Budget Estimate: \$158,457.00 (Phase 1 Estimate for Bartram/US1)

Scope of Work:

JEA requests Proposals from interested and qualified Proposers to provide CMAR services during design and construction of the Bartram/US1 and Cecil Field Water Main projects. The work includes installation of water main in two different service areas within JEA.

The initial contract scope of work will consist of pre-construction phase services including design and constructability reviews, construction phase sequencing, coordination, maintenance of traffic, and maintenance of utility operations pre-planning, alternatives evaluations, cost estimating and cost control (value engineering) services, project schedule development, and preparation and submission of an open-book Guaranteed Maximum Price (GMP) proposal for construction phase services.

The contract shall be amended to include construction phase services following negotiation of a mutually acceptable GMP. The contract may be amended to include construction phase services in multiple phases. During the construction phase, the CMAR shall serve as the single point of responsibility for construction of the work in strict accordance with the contract documents.

This award positively impacts the following JEA Measures of Value:

- Customer Value – Ensures a reliable supply line of potable water

JEA IFB/RFP/State/City/GSA#: 053-19

Purchasing Agent: Kruck, Daniel R.

Is this a Ratification?: NO

RECOMMENDED AWARDEE(S):

End Date (mm/dd/yyyy): Project Completion (Expected: May 2023)

JSEB Requirement:

Ten Percent (10%) Goal

Comments on JSEB Requirements:

No JSEB participation in Phase 1. Contractor will meet JSEB goal during Phase 2.

PROPOSERS:

Name	Amount	Rank
GARNEY COMPANIES INC.	\$133,252.00	1
REYNOLDS CONSTRUCTION, LLC	N/A	2
JB COXWELL CONTRACTING INC.	N/A	3
KIEWIT INFRASTRUCTURE SOUTH CO.	N/A	4

Background/Recommendations:

Advertised on 03/08/2019. Eight (8) prime companies attended the mandatory pre-proposal meeting held on 03/14/2019. At proposal opening on 04/09/2019, JEA received four (4) Proposals. The public evaluation meeting was held on 05/01/2019 and JEA deemed Garney Companies Inc. most qualified to perform the work. A copy of the evaluation matrix and negotiated fees are attached as backup.

Negotiations with Garney Companies Inc. were successfully completed for Phase 1 of this project. Phase 1 consists of developing the project schedule, design and constructability reviews, developing work packages, value engineering and developing the GMP for the Bartram/US1 portion of the work. These preconstruction costs are 1.7% of the estimated total construction costs and deemed reasonable (typically 1% - 3% of total construction costs). If negotiations for Phase 2 (GMP) are not successful, JEA reserves the right to not proceed with Phase 2 with this contractor. Due to capital budget restraints the Cecil Field water main portion of the work will be negotiated and completed after the Bartram/US1 work is completed. The contractor provided an initial budget estimate of the Bartram/US1 portion of the work, and it was within acceptable range for the project.

The project details are below:

- Planning Project Budget: \$14,276,828.00
 - Engineering Budget: \$1,561,428.00
 - Cecil Field: \$558,923.00
 - Bartram/US1: \$1,002,505.00
 - Construction Budget: \$11,947,012.00
 - Cecil Field: \$4,657,692.00
 - Bartram/US1: \$7,289,320.00
 - Internal JEA Costs: \$768,388.00
 - Cecil Field: \$395,904.00
 - Bartram/US1: \$372,484.00
- Revised Project Budget: \$14,474,250.00
 - Engineering Budget (Mott MacDonald): \$1,099,312.00
 - Cecil Field: \$379,300.00
 - Bartram/US1: \$720,012.00
 - Construction Budget: \$12,580,584.00
 - Cecil Field: \$4,657,691.00
 - Bartram/US1: \$7,922,892.00
 - Internal JEA Costs: \$754,354.00
 - Cecil Field: 395,904.00

- Bartram/US1: 398,450.00
- Original Project Schedule:
 - Engineering Cecil Field Completion: June 2019
 - Engineering Bartram/US1: March 2019
 - Construction Cecil Field Completion: February 2021
 - Construction Bartram/US1: September 2021
- Revised Schedule:
 - Engineering Cecil Field Completion: September 2020
 - Engineering Bartram/US1: January 2020
 - Construction Cecil Field Completion: May 2023
 - Construction Bartram/US1: April 2022

Major Changes/Issues

Engineering costs decrease by bundling these two projects together. Project schedule has changed to meet capital budget scheduled spend requirements. Construction cost estimate for Bartram/US1 have been updated to include additional jack & bores required by FDOT and increased material costs.

053-19 – Request approval to award a contract to Garney Companies Inc., for Phase 1 of Construction Management at Risk (CMAR) Services for the Bartram/US1 and Cecil Field Water Main project in the amount of \$133,252.00, subject to the availability of lawfully appropriated funds.

Total: \$223,942.94 (2.6% of GMP)

Note: JEA's JSEB Manager discussed with Garney various scopes of work as potential areas to allocate for JSEB participation.

Background/Recommendations:

Originally approved by Awards Committee on 07/25/2019 in the amount of \$133,252.50 to Garney Companies Inc. A copy of the original award is attached as backup.

This award request is for a contract increase to the CMAR contract of Garney Companies Inc. for the Bartram/US 1 and Cecil Field Water Main Projects. The original award was only for pre-construction services for the Bartram/US 1 portion of the work. JEA delayed the start of engineering for the Cecil Field Water Main project for budgetary reasons.

The design for the Cecil Field Water Main is underway, and preconstruction services are needed at this time. Negotiations were successfully completed for the preconstruction services with Garney Companies Inc. The fees for this portion of the work are \$122,932.00 and include value engineering, project scheduling, estimating and Guaranteed Maximum Price (GMP) development, which is 12% below the estimate for this work and deemed reasonable.

The GMP for the Bartram/US 1 portion of the work has been successfully negotiated. The GMP for the construction phase of the work is \$8,464,726.85, which is 16.1% over JEA's original total construction planning budget. During the design, 2,000 feet of pipe was changed from open cut to horizontal directional drill (HDD), a jack and bore was added and an increased number of fittings were added to the Work accounting for the increase in price. The agreed upon GMP is 1.4% below JEA's estimate that is based on the current design documents. After review of the GMP line items with JEA W/WW estimating, the GMP is deemed reasonable. GMP negotiations of rates and contingencies resulted in a cost savings of \$816,208.93 from the originally submitted GMP. If the actual construction costs are less than the agreed upon GMP, JEA will share the savings with Garney Companies in a 75% (JEA) / 25% (Garney) split.

The project details are below:

- Bartram/US1 Planning Project Budget: \$8,687,729.00
 - Engineering Budget: \$1,002,505.00
 - Construction Budget: \$7,289,320.00
 - Internal JEA Costs: \$395,904.00

Formal Bid and Award System

Award #8 November 19, 2020

Type of Award Request: JOINT PROJECT

Requestor Name: Williams, Michael S.

Requestor Phone: (904) 665-7454

Project Title: Nassau County MOU - Engineering Services for William Burgess Blvd. 16" Water Main Extension

Project Number: 8006360

Project Location: JEA

Funds: Capital

Budget Estimate: \$135,000.00

Scope of Work:

This is a request to enter into a Memorandum of Understanding (MOU) with Nassau County to authorize a contract with GAI Consultants, Inc. (GAI) in accordance with the attached proposal and supporting documents for engineering, survey, permitting and subsurface utility engineering costs associated with the design of a new 16-inch water main along the William Burgess Blvd. Extension. Per JEA's Procurement Code, all engineering awards exceeding \$35,000.00 are considered Formal Purchases, requiring Awards Committee approval.

JEA IFB/RFP/State/City/GSA#: N/A

Purchasing Agent: Kruck, Daniel R.

Is this a ratification? NO

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
NASSAU COUNTY	Robert Companion	rcompanion@nassaucountyfl.com	96161 Nassau Pl, Yulee, FL 32097	(904) 530-6225	\$133,345.00

Amount for entire term of Contract/PO: \$133,345.00

Award Amount for remainder of this FY: \$133,345.00

Length of Contract/PO Term: Project Completion

Begin Date (mm/dd/yyyy): 11/30/2020

End Date (mm/dd/yyyy): Project Completion (Estimated: March 2021)

JSEB Requirement: N/A – Nassau County Joint Project

Background/Recommendations:

Nassau County is extending William Burgess Blvd. from US 17 to Miner Road. This will be a multi-lane urban roadway section with curb and gutter and sidewalk along one side. As part of a Joint Project with Nassau County, it is proposed to design a total of 10,400 feet of 16-inch water main along this new roadway (9,100 feet along William Burgess and 1,300 feet along Miner Road). Currently, a single water

main connection exists between the West Nassau Water Treatment Plant (WTP) and the Nassau service area east of US 17.

Upon completion, this main will provide redundancy to the Nassau Water Grid. The water grid in Nassau County is largely comprised of single feed connections between the West Nassau, Lofton Oaks and Nassau Regional water treatment plants along SR 200. This configuration is caused by the significant wetland systems north and south of SR 200. While single feeds are able to meet current demands, no system redundancy is available to accommodate normal operation and maintenance activities or emergency repairs. To combat these conditions, additional water mains have been added where possible. The new 16 inch water main will serve as an additional connection to the rest of the Nassau Water Grid from the West Nassau WTP.

Nassau County followed the Consultants Competitive Negotiation Act (CCNA) in selecting the engineering consultant for this project (GAI, Inc.) for the design of the new roadway. Nassau County will have two (2) separate solicitations - one for Construction Engineering Inspection (CEI) services and one for construction of the project. Per the terms of the MOU, JEA's scope will be included in those solicitations. JEA will enter into contract with each successful bidder in accordance with the MOU. A copy of the MOU is attached for reference. For this award, JEA must pay Nassau County for the design work performed by GAI, Inc. for the JEA portion of the work. A copy of the GAI, Inc. fee proposal is attached for reference. JEA reviewed the proposal and the pricing is consistent with past projects and deemed reasonable.

By entering into this MOU with Nassau County, JEA expects to save engineering fees since Nassau County has already completed most survey requirements, subsurface investigations, wetland delineations and mitigation. JEA will also save costs during the construction phase by not having to pay for road restoration efforts and additional mobilization fees by the contractor.

Request approval for payment to Nassau County for the William Burgess Water Main Extension project engineering services in the amount of \$133,345.00, subject to the execution of the MOU and the availability of lawfully appropriated funds.

Manager: Sulayman, Mickhael – Mgr W/WW Project Management

Director: Conner, Sean M. – Dir W/WW Project Engineering & Construction

GM: Vu, Hai X. – Interim GM Water Wastewater Systems

APPROVALS:

Chairman, Awards Committee

Date

MEMORANDUM OF UNDERSTANDING

This Memorandum of Understanding (“MOU”) is entered into this ____ day of _____, 2020 (the “Effective Date”), by and between JEA, a body politic and corporate in the City of Jacksonville (“JEA”) and Nassau County, Florida (“Nassau County”).

Recitals

WHEREAS, JEA and Nassau County (collectively, the “Agencies” or, individually, an “Agency”), desire to jointly solicit bids for the design, construction and construction inspection and engineering services for the William Burgess Boulevard Extension Project, US 17 to Miner Road Water Main (the “Joint Project”); and

WHEREAS, JEA is authorized to enter into this MOU pursuant to Section 21.04(bb) of the Ordinance Code of the City of Jacksonville, and Section 3-116 of the JEA Procurement Code;

NOW, THEREFORE, in consideration of the mutual promises contained herein, each of the Agencies agrees as follows:

Agreement

1. Design Services. Following execution of this MOU, Nassau County will amend its design contract with GAI, Inc. to include JEA’s specifications for its portion of the Joint Project (the “Design Contract”). JEA will be responsible for all design costs associated with the incorporation of the water main design.
2. Construction Services. Upon completion of the design services, Nassau County will issue a Solicitation for construction services for the Joint Project in the form of a draft Solicitation circulated to, and approved by, JEA, prior to its issuance by Nassau County (the “Construction Solicitation”).
3. Construction Engineering Inspection (CEI) Services. Upon completion of the design services, Nassau County will issue a Solicitation for Construction Engineering Inspection (CEI) services for the Joint Project in the form of a draft Solicitation circulated to, and approved by JEA, prior to its issuance by Nassau County (the “CEI Solicitation”).
4. Bidding. Services procured under this MOU shall be procured in accordance with all applicable laws, including, but not limited to, the provisions of Sections 287.055, 255.0525

and 255.20 of Florida Statutes. Nassau County will allow JEA to review the responses to the Construction Solicitation prior to award. Nassau County shall award a contract under the Construction Solicitation based on price to the lowest qualified and responsible bidder, determining lowest price on the basis of lowest price for Nassau County's and JEA's portions of the Joint Project combined as a single project. For the CEI Solicitation, qualifications shall be evaluated on the basis of Nassau County's and JEA's portions of the Joint Project combined as a single project. Nassau County shall competitively negotiate a contract with the most qualified firm responding to the CEI Solicitation in accordance with Section 287.055, Florida Statutes.

5. Award Recommendation. Nassau County, on behalf of the Agencies, will manage the Construction Solicitation and CEI Solicitation (the "Solicitations") and make all administrative determinations concerning minimum qualifications, timeliness, responsiveness and all other aspects of administration of the Solicitations up to and including evaluation of bids and proposals as provided in paragraph 4. Nassau County shall consult frequently with JEA, and keep JEA fully informed, with respect to all aspects of such administration that may affect JEA's portion of the Joint Project in any manner.
6. Contract. Each Agency will enter into separate final contracts for its portion of the Joint Project as described in the Construction Solicitation and CEI Solicitation (collectively, the "Contracts" or, separately, a "Contract"). Nassau County shall include in the Construction Solicitation and CEI Solicitation standard contract terms and conditions on behalf of both Agencies, and all provisions requested by JEA to be applicable to its portion of the Joint Project.
7. Term. This MOU shall be effective on the Effective Date and shall continue until completion and acceptance of all services to be provided to the Agencies under this MOU in connection with the Joint Project, and resolution of any and all disputes in connection therewith.
8. Fee Payment. The costs of the Solicitations will be borne by Nassau County and JEA proportionately based upon the good faith estimate of the cost of the services procured on behalf of each Agency in advance of the issuance of the Solicitation. Each Agency shall be responsible for the payment of all costs and expenses for services and equipment provided to the Agency for its portion of the Joint Project and nothing in this MOU or in

the Solicitations shall be construed to create an obligation of one Agency to cover any costs or expenses or create any liability of one Agency for the other Agency's portion of the Joint Project.

9. Contract Management: Each Agency will be responsible for administration of its own Contracts, including, but not limited to, all purchase orders, invoices, payments, contract management, amendments and renewals. However, each Agency shall continue to collaborate with the other Agency by providing notice to the other Agency as soon as reasonably possible after an Agency discovers any problems or issues with the services provided in connection with the Joint Project.
10. Joint Marketing. Each Agency will use commercially reasonable efforts to solicit interest in the Solicitations.
11. Publicity. All press releases issued by an Agency with respect to this MOU, the Solicitations or the Contracts shall be presented to the other Agency reasonably in advance of issuance and shall be subject to the other Agency's prior approval, which shall not be unreasonably withheld or delayed.
12. Procurement Management. Each Agency shall appoint a single individual (a "Procurement Manager") to be primarily responsible for: (1) arranging all meetings, visits and consultations between the Agencies relating to the Solicitations; (2) receiving all notices under this MOU and the resulting Solicitations; and (3) coordinating all administrative matters relating to the Solicitations. The Procurement Managers shall also be responsible for coordinating the resolution of any issues and disputes between the parties arising under this MOU. From time to time during the terms of this MOU, each Agency may replace its Procurement Manager with another person having equivalent authority by providing written notice to the other Agency.
13. General: This MOU may be amended only by a written instrument executed by both Agencies. This MOU and all transactions contemplated herein shall be governed by, construed in accordance with, and enforced under the laws of the State of Florida. Any litigation involving this MOU shall take place in the state or federal courts located exclusively in Nassau County, Florida.

[SIGNATURE PAGE FOLLOWS]

IN WITNESS WHEREOF, the parties have caused this MOU to be executed and delivered by their duly authorized officers, as of the Effective Date.

Subject: JEA Water Main Services for William Burgess Blvd. Extension

Dear Mr. Williams,

GAI Consultants, Inc. (GAI) respectfully submits the following Scope of Services and Fee Proposal for subject contract for a lump sum fee of **\$133,345**.

The scope of work was is to design a 16" WM w completed survey to date.

The assignment entails added services not included under the roadway William Burgess Blvd. Extension (WBE) project by Nassau County (Bid No. NC19-016). The JEA plans and specifications will be let for construction simultaneously as part of the same construction contract.

Scope of Services for the new water main design are as follows:

- Approximately 9200 LF of new 16" water main will be installed along the new WBE right of way.
- Approximately 1300 LF of new 16" water main will be installed from WBE north to Bear Lane along Miner Rd.
- This new water line will connect to the existing JEA 16" water mains at the intersections of WBE and US 17 to the west and Miner Rd. and Bear Lane to the east.
- GAI to coordinate new roadway and water main alignment with future JEA planned reclaimed booster and master pump stations along the central portion of the project.
- GAI to coordinate new roadway and water main alignment with existing JEA reclaimed water spray fields and piping to remain in the central portion of the project, which discharge and drain to the north.
- The new 16" water main will be installed on the north side of the new William Burgess Blvd Extension and along the west side of Miner Rd. from WBE to Bear Lane.
- FDOT Utility Permit will be required for work in the US 17 right of way. GAI will prepare and submit the application package for the FDOT permit.
- JEA Water Main Permit review and DEP permit submittal will be required.
- SUE services are expected at the west and east ends of the project and along Miner Rd.
- The portion of new water main located along Miner Rd. from William Burgess Blvd. to Bear Lane is outside of the scope of the roadway survey being completed by GAI for Nassau County and will be required to complete the new water main design.
- The new water main is proposed to be installed by open cut installation and sidewalk and roadway repairs will be included in the plans.
- Added MOT and water main service connection detailing to address side street closures on the west and east ends of the project limits.
- JEA is to provide as-built plans and GIS information to GAI for US 17 and Miner Street for connection to existing water supply as needed.
- All work within the FDOT right-of-way will be designed to FDOT Standards and Specifications.
- GAI will provide a line and grade schematic of the water main for JEA to review. The alignment and route agreed upon will then progress into designs stage for 90% submittal. The submittal will be in

Michael Williams, PE
William Burgess Fee Proposal
11/5/20

tandem with roadway set as this 90% once approved will move forward to a 100% plan set for final review and bidding. The full size 24"x36" paper copy will be submitted to the JEA for permit review and DEP permit approval for subsequent approval and release of bid documents for construction.

Fee Proposal:

These services can be completed for a fee as follows:

GAI Engineering /Design/ Expenses Lump Sum Fee:	\$130,345.00
SUE Services (LS for 6 locates):	\$ 3,000.00

Revised Fee=\$133,345

Exclusions:

- Force Main or Reclaim Water Design
- Geotechnical Investigations. Geotechnical data extracted from the roadway design will be utilized.
- Post Design Services.
- Directional boring.

Design Schedule:

A design schedule will be provided within 10 days of Notice to Proceed (NTP).

Thank you for the opportunity to submit this proposal. We trust that this proposal will meet your expectations. Please if you have any questions feel free to call me at 904-237-2466.

Sincerely,

Ronald Hoogland, P.E.
Director of Engineering

Formal Bid and Award System

Award #9

November 19, 2020

Type of Award Request: INVITATION FOR BID (IFB)

Requestor Name: Sebastian Chmist

Requestor Phone: (904) 665-7016

Project Title: Circuit 915 Partial Rebuild

Project Number: 8004735

Project Location: JEA

Funds: CAPITAL

Budget Estimate: \$1,330,785.00

Scope of Work:

JEA is soliciting Bids from contractors (hereinafter referred to as "Company") for construction services for Circuit 915 structures #44B through #51 rebuild.

The Work will include, but is not limited to Transmission construction which will include the setting of three (3) new spun concrete transmission poles, five (5) new steel transmission poles, and five (5) new vibratory steel caisson foundations. Work will also include the re-framing of one (1) existing spun concrete transmission pole and one (1) existing wooden H-frame transmission structure. Transmission Conductor installation will include sagging / tensioning of new 1590 ACSR "Falcon" conductor and 3#6 AW shield wires. Distribution construction will include setting six (6) new static cast distribution poles. Distribution Conductor installation will include sagging / tensioning of new 556.5 ACSR "Parakeet" conductor, 636 AAC "Orchid" conductor, and 4/0 AAAC "Alliance" neutral wire. Demolition work will include the removal of six (6) existing wooden H-frame transmission structures, one (1) spun concrete transmission pole, and one (1) static cast concrete distribution pole. All guy wires, anchors, wires, conductors, and hardware shall be removed and disposed of as indicated per these construction drawings and specifications.

Construction is scheduled to start on 02/01/2021. Work is to be substantially completed by 03/12/2021.

JEA IFB/RFP/State/City/GSA#: 093-20

Purchasing Agent: Lovgren, Rodney

Is this a Ratification?: NO

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
HENKELS & MCCOY INC.	Robert Andrews	randrews@henkels.com	6110 Bonny Oaks Drive, Chattanooga, TN 37416	904-449-3045	\$1,540,457.58

Amount for entire term of Contract/PO: \$1,540,457.58

Award Amount for remainder of this FY: \$1,540,457.58

Length of Contract/PO Term: Project Completion

Begin Date (mm/dd/yyyy): 12/01/2020

End Date (mm/dd/yyyy): Project Completion - Estimated Completion 03/12/2021

JSEB Requirement: N/A - Optional

BIDDERS:

Name	Bid Amount
HENKELS & MCCOY, INC.	\$1,540,457.58
C AND C POWER LINE, INC.	\$1,600,999.40
MICHELS POWER, A DIVISION OF MICHELS	\$2,382,921.83
VOLT POWER LLC	\$2,308,608.63

Background/Recommendations:

Advertised on 10/07/2020. Seven (7) prime companies attended the optional prebid meeting. Seven (7) prime companies completed the mandatory site visit. At Bid opening on 11/03/2020, JEA received four (4) Bids. JEA determined Henkels & McCoy Inc. to be the lowest priced Responsive and Responsible Bidder. A copy of the Bid Form is attached as backup.

The 100% design estimate for contractor cost was \$1,330,785.00. The lowest bid for contractor costs came in at \$1,540,457.58, an increase of \$209,672.58. The 100% design estimate included 5% SWA and up to \$302,000.00 in estimated matting costs. During the procurement process, SWA was increased to 10%. In addition, there was an addendum that changed matting to an allowance in the amount of \$500,000.00. The changes were made to account for the risk of the outage on circuit 915 being cancelled during construction. In order to perform the work safely, a four (4) week continuous outage on circuit 915 is required. Since a continuous four (4) week outage has risk, a plan was developed during which the circuit could be returned into service at different points throughout construction in case of a system emergency. To support this the SWA was increased to account for possible JEA system emergencies. The matting allowance was increased to account for unknowns in the duration of construction should an emergency occur.

As a result of the matting allowance and SWA increase, the impact to the bid is a \$277,920.80 increase. If there are not any system emergencies, the expected cost will be \$1,262,536.78. The actual cost will depend on the length of time the matting is used and if the circuit needs to be re-energized during construction due to a system emergency. Based on these factors, the price is deemed to be reasonable. Budget funds have been trended to support the increased cost estimate. Remaining budget will be returned upon project completion.

093-20 – Request approval to award a contract to Henkels & McCoy Inc for construction services for Circuit 915 in the amount of \$1,540,457.58, subject to the availability of lawfully appropriated funds.

Award #10 11/19/2020

Type of Award Request: STANDARD
Request #: N/A
Requestor Name: Bobitt, Blakney D.
Requestor Phone: 904-502-1149
Project Title: Brandy Branch Battery UPS Replacement B50, B51, B52 & B53
Project Number: 8006806
Project Location: JEA
Funds: Capital
Budget Estimate: \$313,252.00

Scope of Work:

The Brandy Branch Generating Station maintains Uninterruptable Power Supply (UPS) systems for each of the combustion turbines and control room. Each UPS system consists of battery banks, inverters, chargers bypass switches and transformers. JEA engineering has reviewed multiple product lines from companies over the years, Ametek has won competitive bids in the past to supply UPS systems. This request to approve purchasing replacement equipment for BBGS units 50 (control room balance of plant equipment), 51 (CT1), 52 (CT2) and 53 (CT3).

Award Amount for remainder of this FY: \$313,252.00
Length of Contract/PO Term: Project Completion
Begin Date (mm/dd/yyyy): 11/15/2020
End Date (mm/dd/yyyy): Project Completion - Estimated by 09/30/2021
JSEB Requirement: N/A – Standard

Background/Recommendations:

The power generation Standards Committee took action on September 2, 2020 to approve Ametek Inverters and Chargers as standards for CT controls. Ametek UPS systems are installed at Northside Generating Station and at Brandy Branch Generating Station for the Steam Turbine (Unit 54). Replacing the obsolete and outdated UPS systems for units 50, 51, 52 and 53 which are at end of life (20 years of service) with Ametek equipment as the Standard will provide the following benefits:

- Consistency in equipment platforms for training operators
- A single source for spare parts and replacement equipment

JEA completed a competitive bid in 2011 for SJRPP and Ametek was selected as the lowest Bidder. JEA has researched other equipment product offering and while similar in price, these other products have locked advanced controls systems which require subscription type support to access functions and do not have the extensive operational history of Ametek. JEA has standardized on Ametek equipment for UPS systems (see attached documentation as backup).

Request approval to award a contract to Solid State Controls LLC, DBA Ametek Solidstate Controls for the supply of four UPS systems for BBGS in the amount of \$313,252.00, subject to the availability of lawfully appropriated funds.

Manager: Akrayi, Jamila R. - Mgr Project Management
Director: Limbaugh, Margaret Z. - Dir Energy Project Management
Sr. Director: Acs, Gabor - Sr Dir Engineering & Projects
VP: Erixton, Ricky D. - Interim General Manager Electric Systems

			Quote Total:	\$313,252.00

Note: UPS Specification – 1.1.1 – Installation is by others.

***We believe using the “CIP, destination” INCOTERMS2010 delivery term, in lieu of “FOB, destination,” is advantageous to both parties and allows us to provide our products at the most economical price.**

CIP stands for “Carriage and Insurance Paid (to).” We arrange for the freight carrier, pay the freight, and insure the equipment against your risk of loss in the unlikely event the equipment is damaged in-transit.

In short, we perform all the outbound traffic management functions for you, as well as handle any claims issues, again in the unlikely event of damage in-transit. We believe that “CIP, destination” offers you the equivalent services and flexibility of “FOB, destination” delivery terms at no greater risk to the success of the project.

Item Qty

7.5 kVA SINGLE PHASE PWM INVERTER

- 1 4 Industrial On-Line UPS that provides continuous power for critical AC loads. Designed specifically for process control, the DPI utilizes state of the art PWM technology and digital control for enhanced communications, monitoring, control. The DPI Inverter includes:

- One (1) 1-phase IGBT Transistor PWM Inverter
- One (1) 1-PHASE Output Isolation Transformer, copper wound
- One (1) Zero-Break, 1-pole Static Switch

INVERTER MODEL: DPI-007-12-12-60-K
Output Capacity: 7.5kVA / 6kW @ 0.80 p.f.
DC Voltage Range: 125 VDC (105-140VDC)
AC Output Voltage: 120 VAC 1-PH, 2-Wire
Output Frequency: 60 Hertz, $\pm 0.1\%$

INVERTER CIRCUIT BREAKERS:

Battery Input Breaker (10 kAIC, 2-pole) Bypass Source Input Breaker (14 kAIC, 2-pole)

INVERTER METERING (DISPLAYED ON MIMIC SCREEN):

DC Input Voltage Inverter Input Current
AC Output Voltage AC Output Amperes
AC Output Frequency

INVERTER MEASUREMENTS (DISPLAYED ON MIMIC SCREEN):

Time on Battery
Total Operation Time on Inverter
Total Operation Time on Bypass
Total Operation Time on Inverter

INVERTER ALARMS (DISPLAYED ON LCD ALARM PANEL):

Fan Failure
Low DC Voltage ST/SW Retransfer Blocked
Battery Discharging Inverter Bridge Over Temperature
IGBT De-saturation Overload Shutdown
Bypass Supplying Load (w/Relay) ST/SW Bridge Over Temperature
ST/SW SCR Failure Bypass Failure
UPS Communication Failure (w/Relay) Inverter Failure
Power Supply Failures UPS Trouble – Summary (w/Relay)

FEATURES ADDED TO MEET YOUR SPECIFICATIONS:

OPT # ALARM DESCRIPTIONS
010 R Over Temperature with Relay
043 R Out of Sync with Relay

OPT # ALARM DESCRIPTIONS
120 R Fan Failure with Relay

OPT # BREAKER DESCRIPTIONS
018 AC Output Circuit Breaker

OPT # ACCESSORIES DESCRIPTIONS
093 Padlockable Breakers

PHYSICAL / ENVIRONMENTAL CHARACTERISTICS:

Ambient Temperature: 40°Celsius continuous, without derating
Max Relative Humidity: 95% non-condensing
Audible Noise: <67 dB(A) at 1 meter
Floor Mtg. Cabinet: NEMA-1, IP-20
Dimensions (inches): 79H x 32W x 36D
Weight (lbs): 750

November 9, 2020

Item Qty 125 VDC, 125 AMP DCR BATTERY CHARGER

2 6

- Twelve Pulse, Phase Controlled SCR Technology
- Digital control
- User definable control and alarm set-points
- DC Voltage and DC current readings via digital LCD display
- AC Input Circuit Breaker (10kAIC)

MODEL:

Output Capacity:	DCR-120-0125-480-3-60-12-100-B
Output Voltage:	125 amperes, continuous
Output Current Limit:	125 VDC
Output Regulation:	100% of rating, (adjustable from 50% to 102%)
Ripple:	+/-1%
AC Input Voltage:	100mV w/battery
AC Input Range:	480 VAC
AC Input Config:	+10%, -10%
AC Input Frequency:	3-phase
	60 Hertz +/-5%

STANDARD FEATURES: All Alarms, Metering and Status are available via the Keypad and LCD Display

SYSTEM STATUS LED'S

AC Input Available LED (Green)
Audible Common alarm LED
DC high voltage alarm LED (Red)
DC Low voltage alarm LED (Red)
Charge Fail alarm LED (Red)
Float LED (Green)
Equalize LED (Amber)

METERING Displayed on LCD Display

DC Output Voltage
DC Charger Current

DIAGNOSTICS

Event Counter retains up to 64,000 events
Detailed Data Logging for the last 500Events

CIRCUIT BREAKER

AC Input Circuit Breaker (65kAIC)
DC Output Circuit Breaker (10kAIC)

OTHER FEATURES

Lamp Test Pushbutton
Alarm Silence Pushbutton
Charger bridge overtemp alarm
Cabinet overtemp alarm
Cabinet humidity alarm

COMMUNICATIONS

Internal USB connection (on board)

FEATURES ADDED TO MEET YOUR SPECIFICATIONS:

OPT # ALARM DESCRIPTIONS

069 R Charger Failure with Relay

OPT # BREAKER DESCRIPTIONS

182 DC Output Breaker
082 65kAIC AC Input Breaker

OPT # ACCESSORIES DESCRIPTIONS

029 Blocking Diode with 100mV Ripple Filter

PHYSICAL / ENVIRONMENTAL CHARACTERISTICS:

Ambient Temperature:	0 - 40° Celsius without derating
Relative Humidity:	0 - 95% non-condensing
Audible Noise:	< 60 dB(A) @ 1 meter
Cabinet:	NEMA-1 (IP-20)
Mounting:	Floor
Dimensions (inches):	53H x 24W x 24D
Weight (lbs):	700

Item Qty **125 VDC, 160 AMP DCR BATTERY CHARGER**

- 3 4
- Twelve Pulse, Phase Controlled SCR Technology
 - Digital control
 - User definable control and alarm set-points
 - DC Voltage and DC current readings via digital LCD display

Weight (lbs):	760

November 9, 2020

Item Qty 10 kVA, 1-PHASE REMOTE MANUAL BYPASS SWITCH (RMBS)

4 4 **RMBS MODEL:** RS100MB- 12
Cam Switch current ratings: 95 amperes continuous
Input/Output Voltage: XXX VAC 1-phase, 2-wire
Switching Type: Make-before-break, closed transition
Poles: One
Switch Positions: Three (Normal, Test & Bypass)

RMBS ACCESSORIES:

S800 P – Padlockable Switch
S800 L – Out of Sync Solenoid lockout

INDICATORS AND ALARMS:

090 Alarm/Light Package includes:
Out of Sync Light
MBS Position Indication:
Switch in normal position
Switch in bypass (test) position
Switch in isolation position

PHYSICAL / ENVIRONMENTAL CHARACTERISTICS:

Ambient Temperature: 0 - 40°C
Relative Humidity: 0 -95% Non-condensing
Cabinet: NEMA-1 (IP-20)
Mounting: Wall
Dimensions (Inches): 24H x 24W x 10D
Weight (Lbs): 100

Item Qty 1-PHASE TRANSFORMER – NON-REGULATING

5 4 Dry-Type, Isolation Transformer supplied with an inter-winding electrostatic shield and an ANSI-61 gray painted steel enclosure. The transformer provides galvanic isolation as well as voltage level transformation. The transformer does not provide voltage regulation.

Transformer Specifications:

Output Capacity: 10 kVA
Primary Input Voltage: 208 VAC 1-Phase, 2-wire
Secondary Output Voltage: 120 VAC 1-Phase, 2-wire
Frequency: 60 Hertz
Windings: Copper
Temperature Rise: 150 Celsius
Insulation Rating: 220 Celsius (Class H)
Insulation Type: Vacuum Impregnated Polyester resin
K-Factor: 1.00
Efficiency at full load: 95%

PHYSICAL / ENVIRONMENTAL CHARACTERISTICS:

Ambient Temperature: 0 - 50°Celsius
Relative Humidity: 0 - 95% non-condensing
Cabinet: NEMA-1 (IP-20)
Mounting: Wall
Dimensions (Inches): 19H x 13W x 10D
Weight (Lbs): 165

DCR CHARGER START UP SPARE PARTS KIT

Qty	Description
1	Diode
1 Each	SCR Pack
2 Each	Fuse

DPI INVERTER START UP SPARE PARTS KIT

Qty	Description
1 Each	SCR Pack
1 Each	IGBT
2 Each	Fuse

Item Qty START-UP (COMMISSIONING) SERVICES

- 9 4 Includes one (1) 8-hour day of on-site Start-Up and Commissioning Services conducted during normal working hours (Mon-Fri, 0800-1700, Non-Holiday) by a Factory Certified Field Service Engineer; inclusive of labor, travel and living expenses. Should Start-Up extend beyond a normal 8-hour day; additional service will be billed in accordance with published Field Service rate schedule; with additional travel and living expenses billed at cost. Start-Up service includes installation inspection; placing the system in service; operational instruction for plant personnel in the safe startup and shutdown of equipment; and recommended routine periodic maintenance.

GENERAL COMMENTS

All systems offered are proposed as manufacturer standard, in terms of specifications and construction details. General details are as follows:

Cabinet Construction –

Cabinets shall be manufacturer standard. Enclosures shall be NEMA-1 (IP-20), free-standing, with a minimum 12GA framework. Door panels shall be a minimum of 14GA steel. Side panels shall be a minimum of 18GA.

One or more hinged doors shall be provided in the front of each unit. Hinged panels 36" and larger shall be provided with a 2-point latching system for holding the panels securely. Hinge finish shall be manufacturer standard. Removable panels shall be attached with machine screws.

All external painted surfaces shall be ANSI 61 gray enamel; and shall be smooth with no runs, sags, or graininess. All internal mounting plates shall be galvanized.

The system offered is manufactured using good US industrial practices; is designed along UL guidelines, and uses UL listed components.

Wiring – SCI-standard wiring, terminal block colors, insulation, and wire marking is proposed. All point-to-point wires shall be marked with a permanent marking system on both ends of each wire. The standard marking system provides for wires, which are heat stamped for identification purposes.

Marking – All tagging shall be manufacturer standard, which is Black lettering on a White background. (Gravoply material.)

A nameplate shall be located on the front inside display door, and the following minimum information shall be provided on the nameplate:

AMETEK Solidstate Controls,	Model Number	Serial Number
AC Input Voltage, Phase and Frequency		
Rated AC Input Current		
Bypass AC Input Voltage, Phase, and Frequency		
DC Input Voltage and Current		
Rated Output Voltage, Amps, Frequency, Power Factor, KVA and KW		

Tests – All tests would normally be performed at unity power factor (1.0), as the units are connected to a resistive load bank. Variation of load power factor testing is not available. Batteries are not available in Columbus, OH for interconnection with the unit.

Manual/Documentation – Our standard manual with job specific drawings, Bill of Materials, and Test Data are included. Any custom documentation requested will be at an additional charge.

COMMERCIAL TERMS

A. PRICES

1. Prices are firm in U.S. Dollars.
2. The validity of the Quote is 60 days.
3. Orders that are delayed (at request of the Client) 6 months or more beyond the initial agreed upon delivery date may be subject to price increases.
4. Terms are as per the attached AMETEK Conditions of Sale.
Payment in US dollars as outlined below will be required:

a) All orders ≤ \$100,000.00:
(Net 30 days)

b) All orders > \$ 100,000.00; ≤ \$300,000.00: Progress payments as follows will be required:

Percentage Due Of Purchase Price

30% (payable upon receipt)

70% (net 30 days)

Milestone

Upon Submission of Approval Drawings

At Time of Shipment

c) All orders > \$300,000.00: Progress payments as follows will be required:

Percentage Due Of Purchase Price

15% (payable upon receipt)

35% (payable upon receipt)

50% (net 30 days)

Milestone

Upon Submission of Approval Drawings

Upon Release to Manufacturing

At Time of Shipment

Note: AMETEK does not accept cash retention.

B. DELIVERY

1. Drawings will be provided for Approval/Reference 4 to 6 Weeks after Receipt of Order.
2. The equipment will be ready for shipment 6 to 8 weeks after your Approval and release to start manufacturing.
3. Design Changes after initial drawing approval and release to manufacture will result in additional charges and extended lead time.

C. Freight Terms

The SCI equipment is quoted as CIP Destination.

D. WARRANTY

*The Extended warranty is 30 months after delivery or 24 months of operation whichever comes first. All major magnetics such as transformer, choke, reactor or transformer that was an integral part of a charger, rectifier, or inverter originally installed at the factory will have a 60 month limited warranty.

DPI/3DPI

DIGITAL PROCESS POWER

Industrial Pulse Width Modulated Inverter

DPI SINGLE PHASE 5-100 kVA

3DPI THREE PHASE 10-125 kVA

The Digital ProcessPower Inverter (DPI) from AMETEK Solidstate Controls is a true on-line inverter system that provides continuous, clean, regulated power for critical AC loads. Designed specifically for process control and industrial applications, the DPI systems utilize state of the art Pulse Width Modulation (PWM) technology, incorporating high power IGBT semiconductors, and digital control for enhanced communications, monitoring, control and diagnostics capabilities.

Also essential to the DPI design is the use of fiber optic cables for control and communications; allowing for better isolation and faster, more accurate signals between processors. The DPI designs also include an LCD panel and user-friendly touch screen display for the ultimate in user control.

- True on-line inverter system
- Designed specifically for process control and harsh industrial applications
- High power IGBT semiconductors and digital control
- Fiber optic cables used for control and communications
- LCD panel and user-friendly touch screen display
- Offers a better transient response to step-load changes
- Digital ProcessPower has lower audible noise

GTD1X	79 x 32 x 36	2,007 x 813 x 914
GTD2X	79 x 54 x 36	2,007 x 1,372 x 914
GTD3X	79 x 86 x 36	2,007 x 2,184 x 914
GTD4X	79 x 108 x 36	2,007 x 2,743 x 914

¹ Circuit Breakers are sized at a minimum of 125% of rated current.

² Unit weights correspond to a 60 Hz unit. Contact factory for 50 Hz unit weight.

³ A complete model number includes the DC bus (link) voltage, AC output voltage, system frequency, output power factor, and UPS configuration. To "build" a model number, use the "code" in the matrix shown above, following the example format: DPI010-EE-FF-GG-H-J; where EE=DC bus voltage; FF=AC Output Voltage; GG=System Frequency; H=Power Factor; J=Inverter configuration ('F' for Float, 'P' for Parallel Redundant). For Example: A 30 kVA inverter with a 240 VDC bus voltage; 120 output voltage; 60 Hz would have the following model number: DPI030-24-12-60-K-C

For custom systems and for units which do not have a configurable model number, insert a 'C' in the model number as follows: DPI020C

Sizes are subject to change. Top mounted cooling fans require 0.5 in (13 mm) additional height. Certain optional features and/or combinations may require larger cabinets

GTD4X	79 x 108 x 36	2,007 x 2,743 x 914

¹Circuit Breakers are sized at a minimum of 125% of rated current.

² Unit weights correspond to a 60 Hz unit. Contact factory for 50 Hz unit weight.

³ A complete model number includes the DC bus (link) voltage, AC output voltage, system frequency, output power factor, and UPS configuration. To "build" a model number, use the "code" in the matrix shown above, following the example format: 3DPI010-EE-FF-GG-H-J; where EE=DC bus voltage, FF=AC Output Voltage, GG=System Frequency,H=Power Factor, J=Inverter configuration (F for Float, C for Cascaded Redundant, P for Parallel Redundant). For Example: A 30 kVA inverter with a 240 VDC bus voltage, 208 output voltage, 60 Hz would have the following model number: 3DPI030-24-20-60-K-C

For custom systems and for units which do not have a configurable model number, insert a "C" in the model number as follows: 3DPP020C

Sizes are subject to change. Top mounted cooling fans require 0.5 in (13 mm) additional height. Certain optional features and/or combinations may require larger cabinets - consult us

SERVICE OPTIONS

AMETEK Solidstate Controls' products are known for their high quality. To keep them running smoothly, do not trust the maintenance of them to just anyone. No one will have the in-depth knowledge and familiarity as we do. We care about our products and we provide superior service agreements that ensure your critical power equipment continuously functions as designed.

We offer three levels of multi-year service agreements, designed to support our preventative maintenance schedules.

AMETEK
SOLIDSTATE CONTROLS

REV 01/2019

THE PURPOSE OF OUR BUSINESS IS TO PROVIDE CONTINUITY OF ELECTRICAL POWER TO KEEP BUSINESSES IN BUSINESS.

WE DO THIS BY HELPING CLIENTS SOLVE THEIR POWER PROBLEMS AND BY CREATING THE MOST ECONOMICAL LONG-TERM RESULTS.

DCR

Digital Battery Charger

32 - 630 AMP

AMETEK[®]
SOLIDSTATE CONTROLS
PROVIDING CONTINUITY OF ELECTRICAL POWER

DCR

Digital Battery Charger Systems

THREE PHASE INPUT VOLTAGE:
208, 380, 480, 600 VAC

AMPERAGE:
32 - 630 A¹

OUTPUT VOLTAGE:
110, 120, 220, 240 VDC

The DCR from AMETEK Solidstate Controls is a microprocessor-controlled, thyristor-based system designed for high-efficiency conversion of incoming commercial AC power to clean DC power. It is used for charging batteries while supplying power to continuous DC loads such as inverters.

The rugged solid-state design utilizes SCR phase control to provide regulated, current-limited DC power. The DCR can operate with or without batteries and is intended for use in UPS systems. The DCR can also be used as a stand-alone device for battery-charging-only applications.

- Latest digital and power electronics technology
- Reliable industrial design; MTBF >205,000 hours
- User definable control and alarm set-points
- Simultaneous voltage and current readings
- CE safety and EMC standards compliant
- UL1012 (UL, cUL) Approved
- Vacuum impregnated magnetics, 200°C
- Efficiency up to 95%

Control Display

With the DCR's Digital Display, you have all the vital system information right at your fingertips. The user-friendly display menu provides the link between operator, all monitoring controls and alarms. Set points for control and alarm parameters are customer configurable.

The Display Features:

- Adjustable Backlit Status Display
- Charger Condition LEDs
 - AC On
 - Fault
 - High DC Voltage
 - Low DC Voltage
 - Charger Fail (Loss of AC Input)
- Soft-touch Menu Scrolling Keypad
- Float and Manual Equalize Controls with LEDs
- Lamp Test and Alarm Silence Control

AMETEK[®]
SOLIDSTATE CONTROLS
PROVIDING CONTINUITY OF ELECTRICAL POWER

RMBS/RMBS-T

Remote Manual Bypass Switch with isolation transformer option

SINGLE PHASE 3 - 100 kVA

THREE PHASE 10 - 100 kVA

Solidstate Controls RMBS Series, Remote Manual Bypass Switch (RMBS) is a 3-position switch that allows for complete isolation of a UPS or inverter in order to perform routine or emergency maintenance on the equipment.

The RMBS-T unit includes an isolation transformer that isolates the bypass supply. Depending on your equipment line up and space constraints, you may consider combining your transformer and RMBS to create an all-in-one, consolidated unit.

The load is temporarily transferred from the inverter (UPS) onto the bypass (alternate) AC power source. This make-before-break switch is designed to transfer between two in-sync sources to enable a zero-break transfer in both directions, so there is no disruption of power to the connected load(s).

- 3-Position: Offers Complete Isolation
- Make-Before-Break
- Industrial Grade
- NEMA-1 (IP-20) Wall Mounted Enclosure for the RMBS unit or a cabinet for the RMBS-T unit
- Long Life LED Indicators
- Wide Variety of Current and Voltage Ratings Available
- Isolation transformer option available

Note: Cover photo is RMBS-T, inside photo is RMBS

REV 12/2018

THE PURPOSE OF OUR BUSINESS IS TO PROVIDE CONTINUITY OF ELECTRICAL POWER TO KEEP BUSINESSES IN BUSINESS.

**WE DO THIS BY HELPING CLIENTS SOLVE THEIR POWER PROBLEMS
AND BY CREATING THE MOST ECONOMICAL LONG-TERM RESULTS.**

TERMS AND CONDITIONS OF SALE

THE FOLLOWING TERMS AND CONDITIONS, TOGETHER WITH ANY OTHER TERMS AND CONDITIONS SPECIFICALLY AGREED TO IN WRITING BY SELLER, SHALL APPLY TO ALL ORDERS (“Order(s)”) FROM, AND SALES OF PRODUCTS (“Products”) OR SERVICES (“Services”) TO BUYER. ANY ACCEPTANCE OF ANY ORDER OF BUYER IS CONDITIONED UPON THESE TERMS AND CONDITIONS. ANY ADDITIONAL OR DIFFERENT TERMS AND CONDITIONS PROPOSED BY BUYER IN ANY DOCUMENT ARE OBJECTED TO AND SHALL NOT BE BINDING UPON SELLER. THE PROVISIONS OF THESE TERMS AND CONDITIONS MAY ONLY BE ALTERED BY A PERSON AUTHORIZED BY SELLER TO BIND SELLER TO ANY PROMISE OR UNDERSTANDING NOT EXPRESSED HEREIN.

Entire Agreement, Acceptance

All quotations, proposals and similar communications from Seller shall be considered an invitation to contract; all orders shall be considered offers, and Seller's order acknowledgments shall be considered acceptances which, shall result in a binding sales agreement containing these terms and conditions. This sales agreement is limited to the provisions contained or expressly incorporated herein and supersedes all previous communications. Any additional or different terms contained in Buyer's forms are hereby rejected. Buyer's receipt of any portion of the Goods shall constitute Buyer's assent to all terms and conditions contained herein.

Quotations and Delivery

Unless otherwise stated herein, Seller's quotation for equipment/service is effective for sixty (60) days from its date. Battery pricing (if applicable) is valid for 30 days from its date. Quoted lead times for engineering and equipment delivery are estimates. Shipping dates will be established at the time Buyer's order is accepted, consistent with Seller's then current shipping commitments. Shipping dates do not include turnaround time for Buyer's review and approval of drawings. Seller reserves the right to select the means of transportation and routing, but other details of shipment must be pursuant to Buyer's instructions. If this purchase order specifies witnessed Factory Acceptance Testing, then such testing will be on a non-interference basis. The Buyer's failure to inspect the goods on the day(s) specified by Seller will constitute a waiver of Buyer's rights for witnessing the in-factory testing of the equipment prior to shipment and may result in a witness testing cancellation charge. Seller will endeavor to provide tentative witnessed inspection dates to the Buyer no later than ten calendar days prior to the test date(s).

Seller does not have facilities for storage of the goods. Should Buyer not be able to accept physical delivery of the goods, Seller shall provide suitable local storage at a warehouse facility near its factory for the goods on a temporary basis. Buyer will be required to accept title to the goods upon Seller placing the goods into storage.

Prices/Taxes

Unless otherwise stipulated in the proposal, all prices are firm for sixty (60) days from the date of the quote. Battery pricing (if applicable) is valid for thirty (30) days from the date of the quote. Further, prices payable by the Buyer shall be subject to immediate increase, should the Seller as a result of governmental action or regulation including, without limitation, those contemplated by an investigation under Section 232 of the Trade Expansion Act of 1962 (19 U.S.C. §1862), incur additional duties, tariffs or restrictions on products sold hereunder, or on the raw materials that are used in making such products. In no event shall prices include any amounts imposed on the Buyer in connection with Buyer's purchases from Seller, such as taxes, including but not limited to Value Added Tax (VAT) or excise taxes, duties, tariffs, or any other costs assessed against the Buyer by a governmental authority. Buyer agrees to pay or to reimburse Seller for any such taxes.

Purchase Orders

All purchase orders should be addressed to:

Solidstate Controls, LLC
dba/ AMETEK Solidstate Controls
875 Dearborn Drive
Columbus, OH 43085 U.S.A.

Payment

Payment in US dollars as outlined will be required:

- a. All orders ≤ \$100,000.00: (Net 30 days)
- b. All orders > \$ 100,000.00; ≤ \$300,000.00: Payment Terms as follows will be required:

Percentage Due of Purchase Price

30% Progress Payment (payable upon receipt)
70% Final Payment (net 30-days)

Milestone

Upon Submission of Approval Drawings
At Time of Shipment

- c. All orders > \$ 300,000 Payment Terms as follows will be required:

Percentage Due of Purchase Price

15% Progress Payment (payable upon receipt)
35% Progress Payment (payable upon receipt)
50% Final Payment (net 30-days)

Milestone

Upon Submission of Approval Drawings
Upon Release to Manufacturing
At Time of Shipment

- d. AMETEK does not accept cash retention. A standby Letter of Credit may be provided by the PNC Bank NA in lieu of cash retention.
- e. If the financial condition of Buyer is unsatisfactory to Seller, Seller may require full or partial payment in advance, or satisfactory security, in the form of a letter of credit or otherwise. In the event of bankruptcy or insolvency of Buyer, Seller may immediately cancel any Order then outstanding and recover its appropriate termination charges from Buyer.
- f. AMETEK does not accept "Pay When Paid" payment terms. Any Purchase Order or Contract resulting from this proposal is a legally binding contract between AMETEK and the Buyer. Payments due from Buyer are not contingent upon Buyer's receipt of payment from any entities or affiliates.
- g. There are no pre-conditions for the down payment or for any progress payment other than the milestones noted above. If the release to manufacturing occurs more than one-hundred and twenty (120) days after the award of the purchase order (either due to an extended delivery date or caused by delays which are no fault of the Seller) the 25% payment for release to manufacturing will be due at the 120-day point. Progress payment milestones will be self-certified by the Seller on the invoice.

Remit to Address

Wire transfers are payable to: **Solidstate Controls, LLC**
dba/AMETEK Solidstate Controls

Wire transfers shall be sent to:

*JP Morgan Chase Bank NA
1 Chase Manhattan Plaza
New York, NY 10081*

*Account #: 0304906603
ABA #: 021000021
Swift ID: Chas US 33*

International Orders require an irrevocable Letter of Credit (in U.S. dollars) advised through the Huntington National Bank in Columbus, OH 43260.

Telex #: 245-475

S.W.I.F.T. #: # HUNTUS 33

Payment shall be made upon presentation of the agreed upon documents to the advising bank by AMETEK Solidstate Controls.

INVOICE FRAUD PREVENTION

Given the increased risk of invoice fraud, Buyer should treat any notification to change details of Seller's bank account with suspicion. Seller will not inform or instruct Buyer to make remittance or money transfers to any other beneficiary, address or bank account via email. Always verify a request to update records or change bank account information BEFORE implementing a change or completing the payment. Verify any requested changes by speaking to a known Seller representative.

Title and Risk of Loss

Unless otherwise provided for in our proposal and pricing, delivery (INCO) terms are CIP Destination Title to, and risk of loss for, the goods shall transfer to the Buyer at the CIP Destination Point.

Warranties and Limitations on Warranties

Seller expressly warrants that the Goods manufactured by Seller, when delivered will (i) conform to the descriptions and specifications incorporated herein and (ii) be free of defects in material or workmanship for a period of 12 months from the date of operation, or 18 months after date of shipment, whichever occurs first. There is an additional four (4) year warranty on certain transformers manufactured by Seller. Refer to AMETEK Solidstate Controls' Manufacturer's warranty for a more detailed explanation of warranties. **THE FOREGOING WARRANTIES ARE IN LIEU OF ALL OTHER WARRANTIES, WHETHER ORAL, WRITTEN, EXPRESS, IMPLIED OR STATUTORY. NO IMPLIED OR STATUTORY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE SHALL APPLY.**

If Buyer notifies Seller in writing within the warranty period, that the Goods or any part thereof fail to comply with these warranties, then Seller will correct such nonconformity by repair or replacement, at Seller's option. If repairs are completed at Buyer's site, then Seller will provide replacement parts at no charge, but Buyer shall pay all labor charges at Seller's standard per diem field service rates plus travel and living expenses (portal to portal) of Seller's service personnel except unless the equipment was purchased with an enhanced warranty that covers travel and living expenses within the 48 contiguous U.S. states. Buyer shall also pay such charges where a service call would not have been necessary if Buyer had followed Seller's written instructions accompanying the Goods. In no event shall Seller be responsible for gaining access to the Goods, or for disassembly or reassembly. Freight charges for warranty replacement items will be as provided in the original order. In lieu of repairing or replacing the non-conforming Goods or part, Seller shall have the right, at its sole option, to refund the purchase price.

In certain situations, Seller's warranty may extend to products supplied by, but not manufactured by Seller (e.g., batteries and battery racks). In all other cases, as an accommodation, Seller will pass on to Buyer whatever warranty Seller receives from its supplier of such products, but only to the extent allowed by such supplier.

If Buyer or any other person, without the prior written consent of Seller, repairs or modifies all or part of the Goods, or if the Goods are not stored, installed or used in accordance with Seller's instructions or standard industry practices, this warranty shall be considered null and void.

Limitation of Liability

The total liability of Seller on any claim, whether in contract, tort (including negligence of any degree and strict liability) or otherwise arising out of, connected with, or resulting from the manufacture, sale, delivery, resale, repair, replacement or use of any Products/Services, shall not exceed \$3,000,000.00

IN NO EVENT, WHETHER AS A RESULT OF BREACH OF CONTRACT, WARRANTY, TORT, (INCLUDING NEGLIGENCE OF ANY DEGREE, STRICT LIABILITY OR PATENT INFRINGEMENT) OR OTHERWISE, SHALL SELLER, ITS AFFILIATES, SUBCONTRACTORS, OR SUPPLIERS BE LIABLE FOR ANY LOSS OF PROFIT OR REVENUES, LOSS OF USE OF THE PRODUCTS OR SERVICES, OR ANY ASSOCIATED EQUIPMENT, COST OF CAPITAL, COST OF SUBSTITUTE GOODS, FACILITIES, SERVICES OR REPLACEMENT POWER, DOWNTIME COSTS OR CLAIMS OF BUYER'S CUSTOMERS FOR DAMAGES OR FOR ANY SPECIAL, PROXIMATE, CONSEQUENTIAL, INCIDENTAL, INDIRECT OR EXEMPLARY DAMAGES. If Buyer transfers title to, or leases Products sold hereunder to, or otherwise permits or suffers use by, any third party, Buyer shall obtain from such third party a provision affording Seller and its subcontractors/suppliers the protection of the preceding sentence. Any action against Seller must be brought within 18 months after cause of action accrues

Indemnification

If this sale includes services to be performed on Buyer's premises, then Seller agrees to indemnify and save Buyer harmless against claims of third parties for physical damage to property and personal injury (including death) resulting directly and solely from the negligence of Seller's employees while providing services on Buyer's premises, but such indemnification shall not exceed the purchase price of the Goods. If requested by Buyer, Seller shall provide evidence of public liability and worker's compensation insurance coverage.

Patents

If Buyer receives a claim that any Goods or part thereof manufactured by Seller infringes a United States patent, then Buyer will notify Seller promptly in writing and give Seller all necessary information and assistance and the exclusive authority to evaluate, defend and settle such claim. If buyer has made all payments due hereunder, Seller, at its own expense and option, will then (a) settle or defend against such claim, or (b) procure for Buyer the right to use such product, or (c) replace or modify the product to avoid infringement, or (d) remove it and refund the purchase price less reasonable amount for depreciation. Provided timely notice has been given by Buyer, should any court of competent jurisdiction hold such product to constitute infringement and, if the use of such product is enjoined, Seller will take, at its option, one or more of the actions described in (b), (c) or (d) above. With respect to any product or part thereof not manufactured by Seller, only the patent indemnity, if any, given by the manufacturer thereof will apply. The foregoing indemnity will not apply to any product made to the specification or design of Buyer. The rights and obligations of the parties with respect to patents are solely and exclusively as stated herein.

Excusable Delays

A. Seller shall not be liable for delays in delivery or failure to perform due directly or indirectly to causes beyond Seller's reasonable control including but not limited to: acts of God; war; terrorism; civil commotion; riots; embargoes; government regulations, orders, instructions or priorities; port congestion; acts of or failure to act on the part of Buyer or its agents/employees; fires; floods; sabotage; nuclear incidents; earthquakes; storms; epidemics; strikes; lockouts or other labor difficulties; shortages of or inability to timely obtain proper labor, materials, components, shipping space or transportation, fuel, supplies or power at current prices; or due to limitations imposed by the extent of availability of Seller's normal manufacturing facilities.

B. If a delay excused per the above extends for more than 90 days and the parties have not agreed upon a revised basis for continuing providing Products/Services at the end of the delay, including adjustment of the price, then either party (except where delay is caused by Buyer, in which event only Seller) upon thirty (30) days' notice may terminate the Order with respect to the unexecuted portion of the Products/Services, whereupon Buyer shall promptly pay Seller its reasonable termination charges upon submission of Seller's invoices thereof.

Returns

Authorization and shipping instructions must be obtained from Seller prior to the return of any Goods, and all authorized returns must include complete product identification and must be shipped freight prepaid to Seller's plant. A restocking charge will be imposed by Seller to place the returned Goods to a saleable condition.

Delay, Suspension and Termination

- a. If any Goods cannot be delivered when ready because of causes beyond Seller's control, then Seller may place the Goods in storage. In such event, (i) Seller's delivery obligation shall be deemed fulfilled and the risk of loss shall pass to Buyer; (ii) any amounts payable to Seller shall be payable upon presentation of Seller's invoice; and (iii) all expenses for preparation and placement in storage, demurrage, storage insurance (if placed) and handling shall be payable upon presentation of Seller's invoice.
- b. Any order held, delayed or rescheduled at Buyer's request may be subject to an equitable price increase. Unless agreed otherwise, the US Bureau of Labor's Producers Price Index (PPI Detailed Report online at <http://www.bls.gov/ppi>) for "All Other Miscellaneous Electrical Equipment and Component Manufacturing", NA-ICS 335999, shall be applied to 100% of the proposed prices (without segregation of labor or material). The date of the Purchase Order will be used to establish the applicable base date for calculating the upward adjustment in price. If rescheduled beyond a reasonable period, then Seller may consider the order terminated by Buyer. Shipments delayed more than ninety (90) days at one time or one-hundred and twenty (120) days in the aggregate may be considered as terminated for the convenience of the Buyer and the appropriate cancellation schedule may be applied.

At any time, Buyer may terminate this order, in whole or in part, for convenience upon written notice to Seller. In either such termination, Seller shall be entitled to termination charges in whole or in part as follows (percentage due of purchase price):

<u>Milestone</u>	<u>Percent Cancellation Charges</u>
Prior to Release of Engineering	20%
During and Upon Completion of Engineering	40%
Fabrication Process	65%
Final Assembly	85%
Testing	100%

- c. Shipments may be suspended provided the Buyer provides written notice to the Seller no later than sixty (60) days prior to the shipment date. In the event the Buyer is unable to take delivery of the goods as scheduled, and so notifies the Seller less than sixty (60) days from the scheduled date of shipment or delivery, Seller will arrange in-transit storage at the Buyer's expense; however, passage of risk and title will occur when the goods are made available to the freight carrier under INCOTERMS 2010: FCA Origin.

General

- a. Seller's acceptance/order acknowledgment shall be made only at Seller's headquarters in Columbus, Ohio. Any Purchase Orders and Contracts shall be governed by the laws of the Commonwealth of Pennsylvania, U.S.A.
- b. The rights and obligations of the Buyer and Seller hereunder shall be governed in all respects by the law of the Commonwealth of Pennsylvania, U.S.A. The exclusive forum for adjudication of any disputes shall be the federal or state courts of the Commonwealth of Pennsylvania, and Buyer/Seller hereby consent to personal jurisdiction and venue in such courts in any proceeding. The United Nations Convention on the International Sale of Goods are hereby excluded from inclusion in any purchase order or contracts and shall not apply.
- c. These Terms and Conditions of Sale together with any other terms specifically agreed to in writing by Seller constitute the entire agreement between Buyer and Seller and supersede any prior or contemporaneous representations, agreements, proposals, warranties, or understandings, oral or written, express or implied. No waiver, modification, amendment, rescission or other change to these Terms and Conditions of Sale shall be binding unless specifically agreed to in writing by an authorized representative of Seller.
- d. The invalidity of any part hereof shall not affect the validity of the remainder. The failure of Seller to assert any right at any time hereunder shall not prevent Seller's subsequent assertion of the same or different rights.
- e. Buyer may not assign this contract without the prior written approval of the Seller.
- f. The drawing approval process assures that the Goods are designed in accordance with Buyer's specifications. It is incumbent on the Buyer to identify any errors or omissions at the time of initial drawing approval. If Buyer's specifications are silent or ambiguous, then Seller's design will be developed in accordance with good commercial and engineering practice. If Buyer changes its specifications after drawings have been prepared, then Seller will be reimbursed for reasonable charges and the shipping date may be adjusted to reflect such changes. Unless otherwise stated, if drawings have not been returned to Seller within thirty (30) days, then Seller may, at its discretion, proceed to manufacture the Goods in accordance with the drawings submitted to Buyer.
- g. Seller will provide a reasonable number of copies of drawings or other documents to Buyer for its use and for use by third parties required for the installation, operation, and maintenance of the Goods. If such documents bear Seller's legend that the data are proprietary, then no other disclosure, reproduction or other use shall be made without Seller's written permission.
- h. There shall be a minimum billing charge of \$250 plus transportation and taxes for any order.

Software / Technical / Proprietary Information

Buyer shall not acquire any rights to any software which may be delivered with Products, except as granted in Seller's standard software license. Any software license granted in connection with the Products shall be an interim license, which may be withdrawn, pending payment for Products in full.

The purchase of Products shall not include any right to supply of technical information such as drawings, design calculations, manuals or specifications.

Proprietary information, including drawings, documents, technical data, reports, software, designs, inventions and other technical information and general "Know-How" supplied by Seller in connection herewith (hereinafter called "Data"), shall remain Seller's sole property and shall be held in confidence by Buyer. Data shall not be reproduced, used or disclosed to others by Buyer without Seller's prior written consent. Upon completion of Order, Buyer shall promptly return all Data to Seller together with all copies or reprints thereof then in Buyer's possession or control, and Buyer shall thereafter make no future use, either directly or indirectly, of any Data or any information derived therefrom without Seller's prior written consent. The foregoing shall in no way obligate Seller to provide or supply Data.

Statutory Requirements

Seller reserves the right to make any changes in the general specifications of the Products which are required for the Products to conform to any statutory requirement.

Witness Testing / Witness of Factory Acceptance Tests:

FAT/Witness Testing is available for a fee of \$1,000.00 per day. Buyer is responsible for all travel and living costs. For safety reasons, no more than two Buyer's representatives can be in Seller's Production or Test facilities at the same time. All Buyer representatives shall be escorted by a Seller employee while on Seller's premises.

Any FAT/Witness Testing is to be conducted on a non-interference basis. In addition, failure of Buyer or Buyer's representative to perform FAT/Witness Testing on the scheduled date may be considered a waiver of the Buyer's right to witness the FAT. In that case, SCI's right and ability to ship equipment per the delivery terms of the Purchase Order on the agreed upon date(s) shall not be impeded.

Any Inspector dispatched by Buyer shall have authorization to issue all appropriate shipping releases within 24 hours of completed FAT.

Export Controls; FCPA Compliance; Anti-Boycott

- a. Buyer shall not make any disposition of the Products, by way of transshipment, re-export, diversion or otherwise, except as applicable U.S. export laws and regulations may expressly permit, and other than in and to the ultimate country of destination specified on Order(s) or declared as the country of ultimate destination on Seller's invoices or in the End Use Statement that Buyer provides to Seller. Seller shall not be named as shipper or exporter of record or U.S. principal party-in-interest (USPPI) unless specifically agreed to in writing by Seller in which case, Buyer shall provide Seller with a copy of the documents filed by Buyer for Export clearance purposes. At Seller's request, Buyer shall supply end-use and end-user information to determine export license applicability. Failure of Buyer to comply with this section shall constitute a material default allowing Seller to cancel related Order(s) without liability.
- b. Buyer warrants that it shall not violate or cause the Seller to violate the U.S. Foreign Corrupt Practices Act of 1977 (FCPA), as amended, the United Kingdom Bribery Act (UKBA) of 2010, as amended, or their respective implementing regulations in connection with Buyer's sale or distribution of the Products and/or Services, and that Buyer does not know or have reason to believe that any consultant, agent, representative or other person retained by Buyer in connection with the sale and/or distribution of Products/Services has violated, nor caused Seller to violate the FCPA and/or the UKBA. Where Buyer learns of or has reason to know of any violation of FCPA and/or or UKBA in connection with the sale or distribution of Products/Services, Buyer shall immediately advise Seller.
- c. Buyer further warrants that Buyer shall not violate or cause Seller to violate the U.S. Antiboycott Provisions of the U.S. Export Administration Regulations issued pursuant to the U.S. Export Administration Act of 1979, as amended, in connection with Buyer's purchase of Products/Services and that Buyer shall not request or require Seller to make statements or certifications against countries that are not subject to boycott by the U.S.

Nuclear Application

If Buyer or third parties use the Goods or any Service provided hereunder in connection with any activity or process involving nuclear fission or fusion, or involving any use or handling of any source, special nuclear or by-product material (all as defined in the US Atomic Energy Act of 1954, as amended), then these terms and conditions of sale shall be supplemented by Seller's Nuclear Terms and Conditions as noted in the following section. Buyer shall promptly notify Seller by certified mail of such nuclear application. Seller will not be obligated to deliver the Goods or provide the Services until the indemnities, insurance overages, and waivers of liability, recourse and subrogation and other provisions of Seller's Nuclear Terms and Conditions have been obtained or fulfilled, failing which Seller may rescind the sale without liability for damages of any nature.

SPECIAL CONDITIONS FOR THE SALE OF EQUIPMENT FOR USE IN A NUCLEAR FACILITY

The following conditions apply to all sales of material, equipment and/or services by AMETEK Solidstate Controls (hereinafter referred to as "Seller"), which are to be used directly or indirectly in or with any nuclear facility as hereinafter defined.

Nuclear Liability Protection

(a) The owner of the nuclear facility (hereinafter referred to as "Owner") will obtain and maintain (1) an agreement of indemnification with the United States Nuclear Regulatory Commission as provided by Section 170 of the Atomic Energy Act of 1954, as amended, and (2) nuclear liability insurance from NELIA or MAELU, or both, in such form and such amount as will meet the financial protection requirements established pursuant to Section 170 of said Act.

(b) The agreement of indemnification and nuclear liability insurance shall be in effect on or before commencement of operation of the nuclear facility or the first arrival of nuclear fuel at the site of the facility, whichever first occurs, and shall remain in effect during the period in which Owner owns and operates the facility.

(c) In the event that the nuclear liability protection system contemplated by Section 170 of the Atomic Energy Act of 1954, as amended, is repealed or changed, Owner will obtain and maintain in effect, to the extent available and consistent with general industry practice, nuclear liability protection which will not impair the protection provided by such nuclear liability protection system to Seller.

Property Damage

Seller shall not have any liability for damage to any property of Owner located at the site of the nuclear facility caused by or arising out of a nuclear incident. Owner also waives any other claim for damage to Owner's property located at the site of the nuclear facility caused by or arising out of any defect in Seller's equipment to the extent such damage is covered by Owner's property damage insurance. Any insurance deductible shall be for Owner's account.

Consequential Damages

Seller shall not have any liability for consequential damages arising out of delays or defects in Seller's equipment, including without limitation liability for loss of use, loss of profits or business interruption.

Definitions

(a) "Nuclear facility" means any facility required to provide financial protection pursuant to Section 170 of the Atomic Energy Act of 1954, as amended.

(b) "Nuclear incident" means any occurrence causing bodily injury, sickness, disease, or death, or loss of or damages to property, or loss of use of property, arising out of or resulting from the radioactive, toxic, explosive, or other hazardous properties of source, special nuclear, or byproduct materials.

(c) "Source, special nuclear, and byproduct materials" shall mean such materials as defined in the Atomic Energy Act of 1954, as amended.

Manufacturer's Warranty

(a.1.) Seller provides a warranty for component failures of any kind for one (1) year from date of operation or eighteen (18) months from date of original shipment, whichever occurs first, based upon the provisions contained in b. and c. below.

(a.2.) Beyond the original warranty provisions above for equipment installed within the 48 contiguous United States, Seller provides an additional four (4) years no-charge replacement only warranty on any transformer, choke, reactor, or ferroresonant transformer that was an integral part of a charger, rectifier, or inverter originally installed at the factory which fails under normal conditions. Buyer shall be responsible for all installation and shipping costs.

(a.3.) Seller expressly warrants that the Goods manufactured by it will (i) conform to the descriptions and specification incorporated herein and (ii) be free of defects in material or workmanship for a period of one (1) year from date of operation or eighteen (18) months from date of original shipment, whichever occurs first. If Buyer notifies Seller within the warranty period that the Goods or any part fail to comply with these warranties, Seller will correct such nonconformity by repair or replacement, at Seller's option, provided that Buyer returns such Goods or part to Seller's plant or repair facility.

(b.1) If Buyer within the 48 contiguous United States requests that repair be completed at Buyer's site within one year from date of operation, or eighteen months from original date of shipment, whichever occurs first, Seller will provide repair and replacement parts and labor (excluding travel & living expenses) at no charge unless a modification to this warranty has been made.

(b.2) If a Buyer outside the contiguous 48 United States requests that repair be completed at Buyer's site, Seller will provide replacement parts and labor, but Buyer shall pay all travel and living expenses (portal to portal) of Seller's service personnel.

(c.) Buyer shall also pay such charges at Seller's Standard Field Service Rates plus travel and living expenses where a service call would not have been necessary if Buyer had followed Seller's written instructions accompanying the Goods. In no event shall Seller be responsible for gaining access to the Goods, or for disassembly or reassembly. Freight charges for warranty replacement items will be as provided in the original order. In lieu of repairing or replacing the non-conforming Goods or, parts, Seller shall have the right, at its sole option, to refund the purchase prices therefor.

(d.) Seller's warranty also includes certain "Buy-Out" products supplied by, but not manufactured by, Seller. These Buy-Out products are limited to those specified and selected by Seller. Any Buy-Out item provided by, or specified exclusively by Buyer, will not be covered under this warranty. In those instances, as an accommodation, Seller will pass on to Buyer whatever warranty Seller receives from its suppliers of such products, but only to the extent allowed by such supplier. Seller will make good faith efforts to resolve any warranty claims on the behalf of the Buyer, if the Buyer requests the Seller's assistance.

(e.) If Buyer or any other person, without the prior written consent of Seller, repairs or modifies all or part of the Goods, or if the Goods are not stored, installed or used in accordance with Seller's instruction or standard industry practices, this warranty shall be void.

THESE ARE SELLER'S ONLY WARRANTIES. SELLER MAKES NO OTHER WARRANTY OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED. ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED BY SELLER AND EXCLUDED.

***Certification of Standard, Proprietary or
Original Equipment Manufacturer Item
For Purchase Requisition No. _____***

3-207 Procurement of Standard, Proprietary and Original Equipment Manufacturer Items

A contract may be awarded for supplies or services with limited competition when, under operational procedures, the chief purchasing officer or designee determines in writing that the supplies or services:

- (a) have been selected as a JEA standard in the course of a standards program or through the action of a standards committee (standard); or
- (b) must be a certain type, brand, make or manufacture (proprietary); or
- (c) must be obtained from the original equipment manufacturer or a distributor authorized by the original equipment manufacturer because of the criticality of the item or compatibility within the JEA system (original equipment manufacturer).

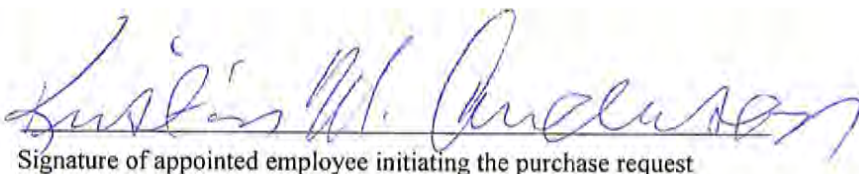

Category

The procurement item is (check the appropriate description):

 X Standard Proprietary Original Equipment Manufacturer

Certification

I the undersigned certify that the specific supplies, services or construction described in the above referenced purchase requisition are the only such supplies, services or construction that will fulfill the intended need for the following reasons: The Ametek Inverters, Battery Chargers, Remote Bypass Switches and bypass transformers have been chosen by the Brandy Branch Generating Station Standards Committee to be standardized on because an Ametek system is in service on ST4, N01 and N02 and have been reliable. It is ideal to have only one type of UPS System for all of the plants due to the benefit of having the operators and electricians only being required to understand one type of UPS system. It is considered to be cost effective to only require one set of spare parts for all four Generating Stations.

Signature of appointed employee initiating the purchase request

10/12/2020
Date

***This Certification shall be attached the purchase requisition when routed for approval.
Approval of the purchase requisition shall constitute affirmation of this Certification.***

EXHIBIT A

Standardization Request / Approval Form

To: Standardization Committee
From: Blake Bobitt

Date: 9/2/2020

In accordance with the JEA Purchasing Code and the Operational Procedure, I hereby request the following item(s)/parts/goods/service or specifications be approved as a standard: (List applicable name, Component tag #, manufacturer, model #, stock or non-stock item, etc.)

DESCRIPTION: Ametek DPI Inverters and DCR Battery Chargers Standard for CT Control UPS Systems.

Justification for Standardization:

Please check all that apply:

☒ The item requested must be obtained from the Original Equipment Manufacturer due to the criticality of the item or **compatibility with existing equipment currently in operation or use within the JEA system.**

☐ The item requested is only available from one source.

☐ This item is the most cost effective means to safely maintain the highest level of system availability & reliability

☐ The item purchase lead time/delivery is critical for continuous system operation .

☐ The item is used in large numbers throughout the JEA system.

☐ The item requested will provide documented long reliable service life at a lower life cycle cost.

☒ The item requested has better availability and delivery time, which is necessary for the particular application.

☒ Other: Ametek guarantees the availability of parts for the serviceable life of the equipment. CT personnel would like to only be required to understand how to operate one type of UPS system. Due to the critical nature of the equipment and the limited time to train operators and electricians to use the equipment, there is always a limited number of employees that know how to operate the equipment and this is the system that will keep the plant safe if we have a blackout. The existing Custom Power equipment can be repaired, however the parts are obsolete and are not guaranteed to be compatible after manufacture. Having multiple brands of spare parts, for the same system in the storeroom is unnecessary and more expensive than having one set of spare parts. If a maintenance contract is initiated, there is a high likelihood that a problem could be addressed on a unit that does not have the contract with no mobilization cost.

Standardization Committee Approval

Date

A handwritten signature in black ink, appearing to be "Blake Bobitt", is written over a horizontal line.

Meeting Minutes
September 2, 2020 ~ 1:00am

Purpose: Standardization Request for Ametek DPI Inverters / Battery Chargers and Beckwith Digital Motor Bus Transfers Relay.

Committee Members Present:

Bryan Holmes	David Biruk	Philip Mauro
Jim Stancin	Brian Wilds	Hans Connell
Joe Pineda	Kristin Anderson	Jessica Dotson

Other Attendees:

Jose Dominguez	Blake Bobitt
----------------	--------------

With a quorum established, Philipp Mauro called the meeting to order at 1:03 pm.

Discussion:

1. Blake Bobitt presents the request to standardize on Ametek DPI Inverters and DCR Battery Chargers. The biggest reason is the small amount of footprint spacing. Blake provides a presentation going over the layout of the transformers. Three quotes were provided from 3 manufactures, Ametek cost is close to the ABB option but is better in terms of functionality and safety. The third manufacturer's design would not fit in our application. Joe Pineda asked if the ABB option can be made with an external maintenance bypass switch, Blake Bobitt stated it could but it will not fit that way. Joe Pineda asked to confirm if Custom Power is out of business, which Blake Bobitt confirmed. David Biruk asked if we want these at all CT sites, which Blake Bobitt confirms. David Biruk states we need to change the wording on the standards form to reflect that. Jim Stancin motions for approval, Kristin Anderson seconds, all approved the motion at 1:27pm.
2. Jose Dominguez presents the Beckwith Digital Motor Bus Transfers Relay. David Biruk mentions that it is used in large numbers in the fleet. Joe Pineda asks if we looked at other relays, Jose Dominguez affirms and states the cost difference is negligible. Discussion about how long the Beckwiths have lasted on the equipment they are on. Jose states that some have been in-service since repowering, year 2000. Philip Mauro asks if we need them in stock. Agreement is that we do not need any in stock. Philip Mauro stated that this should not be considered an OEM item so we cannot use that as grounds for justification. The committee agreed that it does meet the terms of a large number in the fleet and is justifiable as a standard by that as well as the other reason mentioned on the Standardization Request Form. Joe Pineda made the initial motion to approve this as a standard followed by a second motion by Jim Stancin, all approved at 1:37pm.

With no further business, the Energy Generation Standards Committee Chairman adjourned the meeting at 1:45pm.

Distribution:

NGS Standards Committee Members

Other Attendees

James R Kipp, Senior Director

Electric Production: Ametek DPI Inverters and DCR Battery Chargers Standard

PREPARED FOR: JEA BBGS Standards Committee
PREPARED BY: Blake Bobitt
DATE: 8/31/2020

1.0 Background

Ametek inverters and battery chargers have proven to be the most reliable at SJRPP, NGS and at BBGS among the few types of systems that have been in place at all of the generation stations over the past couple of decades. Personnel that have to work on this equipment in the event of loss of power are seriously challenged due to the fact that they do not regularly work on the inverters or battery chargers, even during outages, due to the critical nature of the equipment. If there are several different types in inverters and battery chargers around the plant, the likelihood that someone can be called in that has experience with the same type of equipment is very low.

2.0 Justification

Availability – Ametek is a nuclear certified company and that guarantees the availability of parts for the serviceable life of the equipment. Parts are also expensive to keep on hand. Having one set of spare parts for emergencies would reduce confusion, cost less and increase the likelihood that plant personnel can get the units back online without hiring a contractor to come in for emergency repairs.

Familiarity – Existing Ametek equipment is present and has been in use at the generation stations for an extended period of time (over 10 years). Plant personnel are familiar with Ametek products. It would benefit both operations and maintenance to have one type of system to be able to operate and maintain.

Reliability – Ametek are more efficient & reliable than the old & obsolete Custom Power. We have seen many operational and maintenance issues with these obsolete units.

Safety - Operations prefers to have the system set up to be transferred back to the normal source automatically. In the event of a system malfunction, it would benefit all stakeholders, for the Operator to have the same manual procedure for all UPS systems.

Maintainability - If a maintenance contract is initiated on any of the units, there is a high likelihood that a problem could be addressed on a unit that does not have the contract with no mobilization cost.

3.0 Recommendations

Ametek DPI PWM
Ametek DCR Battery Chargers

Formal Bid and Award System

Award #11 November 19, 2020

Type of Award Request: CHANGE ORDER

Requestor Name: Owens, Katura E. - Mgr Technology Project Mgmt

Requestor Phone: (904) 665-4215

Project Title: Capital Asset Management Software (CAMS) Unifier Purchase, Implementation and Training

Project Number: 8005780

Project Location: JEA

Funds: Capital

Budget Estimate: \$2,000,000.00 (\$235,579.57 current funds available)

Scope of Work:

This purchase is for a Capital Asset Management Software (CAMS) Implementation, and training to enable the efficient delivery of capital assets and support the Enterprise Asset Management (EAM) initiative. The capital asset project delivery groups currently rely on a system of spreadsheets, access databases, email, ad-hoc reports and a network drive to manage all aspects of project management and capital asset delivery at JEA. The information and business requirements to deliver even a small capital project are significant and not suited to management by email or spreadsheets. This solution accommodates current JEA work processes required to deliver capital projects.

JEA IFB/RFP/State/City/GSA#: 068-19

Purchasing Agent: Dambrose, Nick

Is this a Ratification?: No

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
ORACLE, INC.	Cory Davis	Cory.davis@oracle.com	500 Oracle Parkway Redwood Shores, CA 94065	(425) 890 2168	\$189,510.00

Amount of the Original Award: \$954,488.00

Date of the Original Award: 09/12/2019

Change Order Amount: \$189,510.00

List of Previous Change Order Amendments

CPA #	Amount	Date
184453	\$210,715.00	11/21/2019

Length of Contract: Project Completion

New Not to Exceed Amount: \$1,354,713.00

End Date (mm/dd/yyyy): Project Completion

JSEB Requirement: None. JSEBs were reviewed and no opportunities are available.

Background/Recommendations:

Originally bid and approved by Awards Committee on 09/14/2019 in the amount of \$954,488.00 to Oracle, Inc. A change order request in the amount of \$210,715.00 was completed on 11/21/2019 for additional funds related to the one-time implementation and integrating of Oracle Unifier Capital Portfolio. A copy of the original award and previous change order is attached as backup.

This change order request is for additional scope and \$189,510.00 in additional funds for:

1. Staffing changes for information security compliance to minimize JEA's risk of compromised information security by requiring that all staffing be provided from within the US vs. the current staffing offshore.
2. JEA is requesting to add seven (7) integration interfaces because additional business requirements have been discovered since the original statement of work was awarded.
3. The addition of Oracle Managed Services Agreement (MSA) in support of the Project Integration Framework (PIF) that allows JEA internal resources to better learn the technology. The PIF skillset is currently unavailable to JEA. JEA's need for managed services was discovered during the project.

The cost of these three additions are offset by a combined credit in the amount of \$65,000.00 for travel related budgeted expenses for unused remote services. The costs for this change order request are detailed below:

Amendment	Original	Change	Variance
1. Staffing Changes <ul style="list-style-type: none"> • Original integration staff plan = blended resourcing • Updated integration staff plan = all onshore resourcing 	\$190,715.00	\$249,448.60	\$58,733.60
2. Add seven (7) integration interfaces to existing scope of services <ul style="list-style-type: none"> • All onshore resourcing 	\$0.00	\$161,444.40	\$161,444.40
3. Add Oracle Managed Services Agreement for integration interfaces (PIF) Year 1 to Scope of Service	\$0.00	\$34,332.00	\$34,332.00
4. Credit unused estimated expenses – Exhibit 1 Services being performed remotely	\$65,000.00	\$16,000.00	(\$49,000.00)
5. Credit unused estimated expenses – Exhibit 2 being performed remotely	\$20,000.00	\$4,000.00	(\$16,000.00)
Change Order Request Total	\$275,715.00	\$465,225.00	\$189,510.00

The professional services hourly rates for onshore resources to be utilized for the staffing changes and integrations are the same as the rates approved with the original award. JEA received both onshore and offshore rates originally. For comparison, the Project Integration Framework (PIF) MSA service agreement costs are less than JEA's current costs for similar services for Oracle Unifier. The new vendor quote is attached as backup.

Request approval to award a change order to Oracle, Inc. for Oracle CAMS Unifier project related to staffing changes, additional interfaces and Oracle managed services in the amount of \$189,510.00, for a new not-to-exceed amount of \$1,354,713.00, subject to the availability of lawfully appropriated funds.

Change Request Details

This CO is in support of the following changes captured in Oracle US-9286588 Amendment 1.

Amendment	Orig	Change	Reference	Variance
1. Credit unused estimated expenses – Exhibit 1 • Services being performed remotely	\$65,000.00	\$16,000.00	Exhibit 1	(\$49,000.00)
2. Change integration staff plan @ Compliance Office direction • Original integration staff plan = blended resourcing • Updated integration staff plan = all onshore resourcing	\$190,715.00	\$249,448.60	Exhibit 2	\$58,733.60
3. Add seven (7) integration interfaces to scope of services • Seventeen (17) total interfaces • All onshore resourcing	\$0.00	\$161,444.40	Exhibit 2	\$161,444.40
4. Add Oracle Managed Services Agreement for integration interfaces (PIF) Year 1 to Scope of Service	\$0.00	\$34,332.00	Exhibit 2	\$34,332.00
5. Credit unused estimated expenses – Exhibit 2 • Services being performed remotely	\$20,000.00	\$4,000.00	Exhibit 2	(\$16,000.00)
Oracle CO Total	\$275,715.00	\$465,225.00		\$189,510.00

Impact Analysis

- Additional Integrations identified in order to satisfy business requirements as analyzed during the Analysis phase. (Increase from 10 identified during the bid/POC to 17 as a result of the activities leading to the conceptual business process designs). Increases development effort schedule/cost.**
- Change in Staffing Plan from the blended model originally negotiated to leveraging onshore resources only. Increase resource cost.**
- Addition of the PIF MSA for Year 1 support provides JEA technical support resources with an opportunity to ramp up on supporting/maintaining the PIF integrations.**

Deliverables Description	Effort Hours	Date Required	Resource(s) Required
1. Additional Integrations a. P6 to Schedule Sheet Integrations b. Create / Update Encumbrances c. Create / Update GL Budget d. Create / Update GL to Unifier GL Encumbrances e. Outbound Unifier Cloud to Oracle Primavera Cloud Create Projects 2 f. Inbound Oracle Primavera Cloud to Unifier Create / Update Project Budget 3a g. Decision	
<input type="checkbox"/> Approved <input type="checkbox"/> Approved with modifications	<input type="checkbox"/> Rejected <input type="checkbox"/> Deferred
Justifications	
<p>The Primavera Unifier SaaS provides a reporting shell, for which business processes (BPs) are used for configuration of the solution in order to satisfy the requirements of JEA. This change order will add resources and cost required to develop the additional integrations; accommodate the change in staffing plan and the addition of the PIF MSA.</p>

Formal Bid and Award System

Award #12 November 19, 2020

Type of Award Request: PROPRIETARY

Request #: 6449

Requestor Name: Christiansen, Sandra H. - Manager, ERP Systems

Requestor Phone: (904) 665-4563

Project Title: Oracle E-Business Suite (EBS), Oracle Databases, Middleware Maintenance and Support

Project Number: HEB0600

Project Location: JEA

Funds: O&M

Budget Estimate: \$3,800,000.00

Scope of Work:

This request is for a one (1) year proprietary award for all of Oracle's technical maintenance support services for Oracle's E-Business Suite (EBS), Middleware, and all Oracle databases software. Oracle's Customer Care and Billing (CC&B) utility billing software, which is used as the primary application throughout the company to record meter consumption, calculate usage, produce bills, receive payments and maintain customer relationship information has been migrated to the Oracle Customer to Meter (C2M) system and awarded separately. Oracle's EBS software is used for support of Oracle Apps and back-office processes including, but not limited to, Human Resources and Recruiting, Payroll and Benefits, Procurement (Accounts Payable, Purchasing, Inventory), Databases Software, Learning Management, Financials, Project Billing, and Cloud Management.

Oracle support is critical for software and hardware updates, troubleshooting, patches, as well as compliance and regulatory updates. A few of the specific ways JEA utilizes Oracle support include: searching for solutions, downloading patches and updates, accessing proactive support tools, and creating service requests.

JEA IFB/RFP/State/City/GSA#: SKY-309955

Purchasing Agent: Woyak, Nathan

Is this a Ratification?: NO

RECOMMENDED AWARDEE(S):

Name	Contact Name	Email	Address	Phone	Amount
ORACLE AMERICA INC.	Mavis Waters	mavis.waters@oracle.com	1910 Oracle Way Reston, VA 20190	(301) 641-0727	\$2,895,506.84

Amount for entire term of Contract: \$2,895,506.84

Award Amount for the remainder this FY: \$2,895,506.84

Length of Contract/PO Term: One (1) Year

Begin Date (mm/dd/yyyy): 12/01/2020

End Date (mm/dd/yyyy): 11/30/2021

Renewal Options: NO

JSEB Requirement: JSEB opportunities were review and none were available

Background/Recommendation:

JEA began purchasing Oracle EBS licenses in the mid-1990s and Oracle CC&B licenses in 2007. The Awards Committee has approved maintenance and support of these proprietary licenses since the time of purchase with the current contract ending 11/30/2020. The ordering document quote, and previous awards are attached as backup.

This request is for a one (1) year proprietary award in the amount of \$2,895,506.84, which includes all the maintenance and support for the Oracle EBS, Oracle Databases and Middleware. An explanation of the total amount paid in FY19, FY20, and FY21 is shown below. The agreed upon rates have remained flat for the three (3) years prior to FY20, however the rates in FY20 will increase by 3.5% and by 4.5% in FY21 on like for like items. JEA was able to remove five (5) unused items in FY20 equating to a \$206,027.25 reduction in annual support costs.

JEA is awarding a short-term one (1) year contract but only committing quarterly with Oracle to continue negotiating a reduction in the projected increase during each quarterly payment for the remainder of the FY21 year, and to continue researching the removal of additional unused items. This is also being awarded on a short term one (1) year basis since JEA is assessing the current contract through a feasibility analysis to determine the best path forward.

Oracle Contract	Start Date	End Date	Total Amount
FY19/SKY-3099550	12/01/2018	11/30/2019	\$3,007,623.91
FY20/SKY-3099550	12/01/2019	11/30/2020	\$2,846,173.64
FY21/SKY-3099550	12/01/2020	11/30/2021	\$2,895,506.84

Procurement tracks two different types of savings. The total cost difference is comparing the current pricing with the proposed pricing (+/-). The total sourcing savings is determined by negotiations, BAFO savings and value added savings. Below is the result for this award:

- Total cost difference: \$206,027.25

Request approval to award a one (1) year proprietary award to Oracle America Inc. for maintenance and support services for Oracle E-Business Suite (EBS), Oracle Databases and Middleware in the amount of \$2,895,506.84, subject to the availability of lawfully appropriated funds.

Director: Van Den Heuvel, Sharon - Director, ERP Systems
VP: Datz, Stephen H. - Interim Chief Information Officer

Dear Sandi Christiansen

The technical support services provided under support service number SKY-3099550 will expire, or have expired, on 30-Nov-20. Please find attached an ordering document for the renewal of these technical support services. If applicable, the attached ordering document may include technical support services that you have requested to order that are in addition to the technical support services that you are renewing.

To prevent interruption to and/ or termination of technical support services, please complete your order for the renewal of technical support services, identified in the ordering document, by issuing a form of payment acceptable to Oracle in accordance with the Order Processing Details section of the ordering document on or before 1-Nov-20.

Have a question about your renewal? Call 301-641-0727 or email Oracle at mavis.waters@oracle.com.

Have a question regarding Auto Renew or the acceptance process on Oracle Store? Call 301-641-0727, Chat on [Store](#), or [Request Assistance](#).

Please note the following:

- If You have questions regarding the Service Details section of this ordering document, or believe that corrections are required, please contact Your Oracle Support Sales Representative identified on the first page of this ordering document.
- Please review Oracle's technical support policies, including the Lifetime Support Policy, before entering into this ordering document. Under Oracle's Lifetime Support Policy, the support level for an Oracle product, if applicable, may change during the term of the services purchased under this ordering document. If extended support is offered, an additional fee will be charged for such support if ordered. If You would like to purchase extended support please contact Your Oracle Support Sales Representative identified on the first page of this ordering document.
- If Oracle accepts Your order, the start date set forth in the Service Details table above shall serve as the commencement date of the technical support services and the technical support services ordered under this ordering document will be provided through the end date specified in the table for the applicable programs and/ or hardware ("Support Period").
- If any of the fields listed in the Service Details table above are blank, then such fields do not apply for the applicable programs and/or hardware for which You are purchasing technical support services.

TECHNICAL SUPPORT SERVICES TERMS

If the Customer and the Customer Quote To name identified in the General Information table above are not the same, JEA represents that Customer has authorized JEA to execute this ordering document on Customer's behalf and to bind Customer to the terms described herein. JEA agrees that the services ordered are for the sole benefit of Customer and shall only be used by Customer. JEA agrees to advise Customer of the terms of this ordering document as well as any communications received from Oracle regarding the services.

If the Customer and the Customer Bill To name identified in the General Information table above are not the same, Customer agrees that: a) Customer has the ultimate responsibility for payments under this ordering document; and, b) any failure of JEA to make timely payment per the terms of this ordering document shall be deemed a breach by Customer and, in addition to any other remedies available to Oracle, Oracle may terminate Customer's technical support service under this ordering document.

Technical support is provided under Oracle's technical support policies in effect at the time the services are provided. The technical support policies are subject to change at Oracle's discretion; however, Oracle will not materially reduce the level of services provided for supported programs and/or hardware during the period for which technical support has been paid, or for U.S. federal and public sector entities, the period for which services have been ordered. You should review the technical support policies prior to entering into this ordering document. The current version of the technical support policies may be accessed at <http://www.oracle.com/us/support/policies/index.html>.

The technical support services acquired under this ordering document are governed by the terms and conditions of the SLSA-215070-18-MAY-95 ("agreement"). Any use of the programs and/or hardware, which includes updates and other materials provided or made available by Oracle as part of technical support services, is subject to the rights granted for the programs and/or hardware set forth in the order in which the programs and/or hardware were acquired.

This ordering document incorporates the agreement by reference. In the event of inconsistencies between the terms contained in this ordering document and the agreement, this ordering document shall take precedence.

ORDER PROCESSING DETAILS

Your order is subject to Oracle's acceptance. Your order is deemed to be placed when You provide Oracle with details for payment (e.g., Your purchase order, Your check, or a credit card confirmation for the order as detailed below) or an executed Oracle Financing contract. Once placed, Your order shall be non-cancelable and the sums paid nonrefundable, except as provided in the agreement.

Please note that unless You are a U.S. federal government or public sector entity, if the pre-tax value of this ordering document is USD \$2,000 or less, the technical support services ordered (i) must be paid by credit card; or (ii) You must renew Your support via the Oracle Store. Please contact Your Oracle Support Sales Representative for details regarding renewing Your support via the Oracle Store.

Technical Support fees are invoiced Quarterly in Arrears. All fees payable to Oracle are due within 30 NET from date of invoice.

Oracle will issue an invoice to You upon receipt of a purchase order or a form of payment acceptable to Oracle. If You are an U.S. federal government or public sector entity, Oracle will issue You an invoice quarterly in arrears after the services are performed. You agree to pay any sales, value-added or other similar taxes imposed by applicable law, except for taxes based on Oracle's income.

Unless you are an U.S. federal government entity, Oracle's invoice includes applicable sales tax, GST, or VAT (collectively referred to as "tax"). If JEA is a tax exempt organization and is not an U.S. federal government entity, a copy of JEA's tax exemption certificate must be submitted with JEA's purchase order, credit card or other acceptable form of payment.

PAYMENT DETAILS

Purchase Order

If You are submitting a purchase order for the payment of the renewal of the technical support services on this renewal order, the purchase order must be in a non-editable format (e.g., PDF) and include the following information:

- Support Service Number: SKY-3099550
- Total Price: USD 2,895,506.84 (excluding applicable tax)
- Local Tax, if applicable

In issuing a purchase order, JEA agrees that the terms of this renewal order and the agreement supersede the terms in the purchase order or any other non-Oracle document, and no terms included in any such purchase order or other non-Oracle document will apply to the technical support services renewed under this renewal order.

Please contact Oracle per the General Information section above to issue Your purchase order.

Credit Card

If You wish to use a credit card to pay for the renewal of the technical support services on this renewal order, please contact Oracle per the General Information section above. Please note that Oracle is unable to process credit card transactions of USD \$100,000 or greater or transactions that are not in USD.

Check

If the technical support services on this ordering document will be ordered and paid by check, the check must include the following information:

- Support Service Number: SKY-3099550
- Total Price: USD 2,895,506.84 (excluding applicable tax)
- Local Tax, if applicable

In issuing a check, JEA agrees that only the terms of this ordering document and the agreement shall apply to the technical support services ordered under this ordering document. No terms attached or submitted with the check shall apply.

Please mail check payments in accordance with the Remittance Details section below.

Checks for technical support services renewed under this renewal order should be sent to:

AK, AZ, CA, HI, ID, NV, OR, UT, WA:

Formal Bid and Award System

Award #14 November 19, 2020

Type of Award Request: EMERGENCY

Requestor Name: Thomas, Paul M. - Mgr Safety & Health Services; Becker, Carl R. - Manager Benefits Services

Requestor Phone: (904) 665-4225

Project Title: COVID-19 Return to Work Testing

Project Number: A0200

Project Location: JEA

Funds: O&M

Budget Estimate: N/A

Scope of Work:

JEA requires two negative COVID-19 tests prior to allowing employees to return to work. This is in an effort to prevent ongoing dangerous conditions for employees. In April of 2020, a Purchase Order (P.O.) was issued to the Mayo Clinic in the amount of \$10,000.00 to perform testing, while JEA could gather requirements for a competitive bid. However, requirement gathering and the timeline on the street took longer than expected and the stop gap P.O. of \$10,000.00 was not enough to cover services.

This is an emergency request to increase the original \$10,000.00 amount by \$86,464.00 and to ratify the purchase to \$96,464.00 to accommodate additional testing.

JEA IFB/RFP/State/City/GSA#: N/A

Purchasing Agent: Selders, Elaine

Is this a Ratification?: YES

If yes, explain: This is a ratification due to pandemic/medical insurance billing uncertainties and delays in completing the competitive solicitation. The ratification amount is \$96,464.00.

RECOMMENDED AWARDEE(S):

Name	Contact Name	Address	Phone	Amount
MAYO CLINIC FLORIDA	Lisa Nordan	4500 San Pablo Road S, Jacksonville Florida 32224	904-953-2000	\$86,464.00

Amount of Original Award: \$10,000.00

Date of Original Award: 04/01/2020

Change Order Amount: \$86,464.00

New Not-To-Exceed-Amount: \$96,464.00

Length of Contract/PO Term: Seven Months w/ No Renewals

Begin Date (mm/dd/yyyy): 04/01/2020

End Date (mm/dd/yyyy): 11/02/2020

JSEB Requirement: N/A - Emergency

BIDDER:

Name	Amount
MAYO CLINIC FLORIDA	\$96,464.00

Background/Recommendations:

When employees were first diagnosed with COVID-19 their Health Insurance Plans were charged and the charge was classified as an initial diagnosis. JEA required two negative return to work tests. Because of the pandemic status and not having any precedent set Florida Blue began rejecting invoices for return to work testing. JEA initially issued a PO to the Mayo Clinic in the amount of \$10,000.00 to cover return to work testing while Procurement worked with the Employee Benefits and Safety teams to competitively bid this service out. In July, an informal solicitation was posted but was rescinded due to updated recommended testing protocol by the Florida Department of Health. The technical specifications were updated with the proper testing requirements and the RFP was re-posted. In the meantime, the Mayo Clinic Florida continued to complete return to work testing under the initial purchase order. The invoices were being sent to JEA but were not addressed to a specific contact, which resulted in the invoices not being processed in a timely manner. The new competitively bid contract has been awarded informally to the Mayo Clinic Florida and will be used to pay for testing services in the future. The emergency form and current outstanding invoice are attached as backup.

Request approval for an emergency change order to the Mayo Clinic Florida for COVID-19 Return to Work Testing in the amount of \$86,464.00, subject to the availability of lawfully appropriated funds.

Manager: Thomas, Paul M. - Mgr Safety & Health Services; Becker, Carl R. - Manager Benefits Services

Last Name: ZZ-JEA

Certification of Emergency Procurement

For Purchase Requisition No. _____

3-113 Emergency Procurements.

Notwithstanding any other provision of this Code, the Chief Procurement Officer or Designee may make or authorize Emergency Procurements when there exists an Emergency as defined in Section 1-113(1)(2), provided that such Emergency Procurements shall be made with such competition as is practicable under the circumstances. A written determination of the basis for the Emergency and for the selection of the particular Company shall be included in the Procurement file.

COMMENTARY:

(1) This section authorizes the procurement of supplies, services, construction or real estate where the urgency of the need does not permit the delay involved in utilizing other methods of source selection.

(2) While in a particular emergency an award may be made without any competition, the intent of this Code is to require as much competition as practicable in a given situation.

Basis of Emergency

I the undersigned certify that the specific supplies, services, construction or real estate described in the above referenced purchase requisition must be procured on an emergency basis for the following reasons:

- _____ a reasonably unforeseen breakdown in machinery;
- _____ a threatened termination of an essential service;
- CB _____ the development of a dangerous condition;
- _____ the development of a circumstance causing curtailment or diminution of an essential service;
- _____ the opportunity to secure significant financial gain through immediate or timely action; or
- _____ the opportunity to avoid significant financial loss through immediate or timely action.

Brief Description of Services/Supplies

Solicitation Summary (List all solicitations, quotations and indicate contractor/supplier selected)

Emergency return to work testing needed for Covid-19 pandemic while services were being bid out.

Explanation of Basis of Selection (Price, availability, delivery or specify other basis)

Local, most reputable, with high efficacy with 24 hour turn around results.

JEA Mgr, Benefit Services

17 Nov 2020

Signature of appointed employee certifying the emergency procurement

Date

To be completed by the Procurement Department:

Contract or Purchase Order Number: _____ Amount: \$ 86,464.00

This Certification shall be attached the purchase requisition when routed for approval.

Approval of the purchase requisition shall constitute affirmation of this Certification.

This emergency procurement shall be reported to the JEA Board in accordance with

Section 1-113(2) of the JEA Purchasing Code

Formal Bid and Award System

Award #15 November 19, 2020

Type of Award Request: SOLE SOURCE
Requestor Name: Newton-Green, Melanie - Associate Mgr Facilities Asset Support
Requestor Phone: 904-665-6913
Project Title: Non-JEA Electric Utilities
Project Number: 30801
Project Location: JEA
Funds: O&M
Budget Estimate: \$1,288,146.00

Scope of Work:

This sole source request is for approval to purchase non-JEA electric utility services. JEA has facilities located outside of the JEA service territory. For example, JEA has lift stations located in Ponte Vedra which is outside of our electric service territory but is responsible for paying an electric bill to a different utility. The estimated FY21 for all non-JEA electric utilities is \$1,288,146.00. Request approval to award services to the following non-JEA Utilities for the following service providers whose FY21 charges are estimated to exceed \$10,000.00 in the amount of \$1,278,546.00.

JEA IFB/RFP/State/City/GSA#: N/A
Purchasing Agent: Selders, Elaine
Is this a ratification?: NO

RECOMMENDED AWARDEE(S):

Name	Address	Phone	Amount
BEACHES ENERGY SERVICES	PO BOX 51389 JACKSONVILLE BCH, FL 32240-1389	904-247-6248	\$235,000.00
CLAY ELECTRIC COOPERATIVE INC.	PO BOX 308 KEYSTONE HEIGHTS, FL 32656-0308	904-473-4911	\$16,000.00
FLORIDA POWER & LIGHT CO	GENERAL MAIL FACILITY Miami, Miami-Dade, FL 33188-0001	561-904-3468	\$672,546.00
ST JOHNS COUNTY UTILITY DEPARTMENT	PO BOX 1988 ST AUGUSTINE, FL 32085-1988	904-209-0333	\$355,000.00

Amount for entire term of Contract/PO: \$1,278,546.00
Award Amount for remainder of this FY: \$1,278,546.00
Length of Contract/PO Term: One Year w/ No Renewals

Begin Date (mm/dd/yyyy): 10/01/2020
End Date (mm/dd/yyyy): 09/30/2021
JSEB Requirement: N/A – Sole Source

Background/Recommendations:

JEA has lift stations located in various areas outside of our electric service territory. At these lift stations, JEA is responsible for paying an electric bill to various utilities companies. JEA has no plans to relocate facilities serviced by non-JEA utility providers and all of these providers are monopolies in their own territories. Shared Services recommends that we continue to utilize these services and pay the related bills, and as with all our consumption, to reduce usage when and where possible. The FY21 total budget for all non-JEA utilities is \$1,288,146.00. The table below includes all non-JEA utility payments including the estimated utility payments that are under \$10,000.00, which are not considered part of this sole source award. The requested service is an appropriate Sole Source Award because there is only one justifiable source for these services. The sole source form and the FY20 expenses are attached as backup.

Vendor	FY21 Approved Budget Amount
BEACHES ENERGY SERVICES	\$235,000.00.00
CITY OF ATLANTIC BEACH	\$1,000.00
CITY OF NEPTUNE BEACH	\$6,000.00
CLAY ELECTRIC COOPERATIVE INC.	\$16,000.00
FLORIDA POWER & LIGHT CO	\$672,546.00
NEIGHBORHOOD UTILITIES INC	\$1,600.00
ST JOHNS COUNTY UTILITY DEPARTMENT	\$355,000.00
TOWN OF ORANGE PARK	\$1,000.00
TOTAL	\$1,288,146.00

Request approval for a sole source award to Beaches Energy Services in the amount of \$235,000.00, Clay Electric Cooperative Inc. in the amount of \$16,000.00, Florida Power & Light Co. in the amount of \$672,546.00 and St. Johns County Utility Department in the amount of \$355,000.00 for electric utility services, for a not-to-exceed total of \$1,278,546.00, subject to the availability of lawfully appropriated funds.

Manager: Crane, Christopher T. - Manager, Facilities Operations
Chief: McElroy, Alan D. - Interim Chief Supply Chain Officer

APPROVALS:

Chairman, Awards Committee **Date**

Budget Representative **Date**

Certification of Sole Source

3-111 Sole Source Procurements

(1) Conditions for Use. A Contract may be awarded for Supplies or Services as a Sole Source when, pursuant to the Operational Procedures, the Chief Procurement Officer or Designee determines that:

- (a) there is only one justifiable source for the required Supplies or Services; or
- (b) a service is a follow-up of Services that may only be done efficiently and effectively by the Company that rendered the initial Services to JEA, provided the initial procurement was competitive.

COMMENTARY:

This method of procurement involves no competition and should be utilized only when justified and necessary to serve JEA needs. This Code contemplates that the chief purchasing officer promulgate operational procedures that establish standards applicable to procurement needs that may warrant award on a sole source basis.

Name of Contractor or Supplier

Beaches Energy Services - \$235,000.00

Clay County Cooperative - \$16,000.00

Florida Power and Light - \$672,546.00

St Johns County Utility - \$355,000.00

Description of Services or Supplies –Each of these suppliers are the sole source for providing electricity in their respective areas. JEA owns and operates business properties that fall within each of these suppliers' respective districts and therefore requires electricity to operate.

Certification

I the undersigned certify that:

MNG there is only one justifiable source for the required supplies, services, construction or real estate; or _____ this is a professional service which is a follow-up of services that may only be done efficiently and effectively by the firm that previously rendered the initial services to JEA

(Fill in with explanation)

This request is for approval to purchase non-JEA Utility services. JEA has facilities located outside of the JEA service territory. For example, JEA has lift stations located in Ponte Vedra which is outside of our electric service territory. At these lift stations; JEA is responsible for paying an electric bill and there is only one option in each area for supply.
